Angel Patriots Alexander Riley, 2015-03-13 When United Flight 93, the fourth plane hijacked in the September 11, 2001 terrorist attacks, crashed into a field near Shanksville, Pennsylvania, the gash it left in the ground became a national site of mourning. The flight's 40 passengers became a media obsession, and countless books, movies, and articles told the tale of their heroic fight to band together and sacrifice their lives to stop Flight 93 from becoming a weapon of terror. In *Angel Patriots*, Alexander Riley argues that by memorializing these individuals as patriots, we have woven them into much larger story of our nation—an existing web of narratives, values, dramatic frameworks, and cultural characters about what it means to be truly American. Riley examines the symbolic impact and role of the Flight 93 disaster in the nation's collective consciousness, delving into the spontaneous memorial efforts that blossomed in Shanksville immediately after the news of the crash spread; the ad-hoc sites honoring the victims that in time emerged, such as a Parks Department-maintained memorial close to the crash site and a Flight 93 Chapel created by a local Catholic priest; and finally, the creation of an official, permanent crash monument in Shanksville like those built for past American wars. Riley also analyzes the cultural narratives that evolved in films and in books around the events on the day of the crash and the lives and deaths of its "angel patriot" passengers, uncovering how these representations of the event reflect the myth of the authentic American nation—one that Americans believed was gravely threatened in the September 11 attacks. A profound and thought-provoking study, *Angel Patriots* unveils how, in the wake of 9/11, America mourned

much more than the loss of life.

The Goddess of Love and the Angel of Death Tom Slattery, 2000-07-28 The Goddess of Love and the Angel of Death revolves around a nude female nightclub stripper, Selina, and a nude male art model, Owen. Conceived of as a modernized Adam and Eve, gender-reversing Owen tempts Selina with a piece of plastic sculpture. A generation later, their daughter, Lisa, who had been adopted as a baby, learns of them from a psychology professor who had met them while researching pornography in which they peripherally participated. As the story unfolds, Lisa learns that her biological parents were also talented artists. The story itself is a love story of a young black woman, Selina, and an older white man, Owen. If their art and love may be the good of the tree of knowledge of good and evil, neo-Nazi racism and drug gang-banging may be the evil. The underlying theme is a triumph of art and life over pornography. The story's complex ending may bring sorrow and meaning while gladdening the heart.

Hospital Angel Jess Levins,2022-08-23 Doctor Angel Carpenter is a doctor, but is he an Angel? Angel is the former leader of the gang called the Angels. He is deeply religious and tries to do the right thing, but the right thing is not always legal. Some claim he is an actual angel since his terminal cancer patients refuse to die, while others feel he should be behind bars. Angel developed a holistic method to increase the cure rate for a cancer drug that could save millions of lives, but he is arrested as a serial killer since his fingerprints are on the murder weapon. He keeps telling people he is not an angel, but the crowd surrounding the hospital and his apartment does not believe him. An anti-religious organization wants him dead, and this organization may be more difficult to treat than the cancer affecting his patients. They initially offered a million euros for his death and then increased it to five million. Assassins converge on Miami for an easy kill and a huge reward. They failed to realize one of the female cancer survivors is a member of a mafia family. She is indebted to Angel, and she pays her debts.

Intelligent Robotics and Applications Ming Xie, Youlun Xiong, Caihua Xiong, Zhencheng Hu, 2009-12-14 The market demands for skills, knowledge and personalities have positioned robotics as an important field in both engineering and science. To meet these challenging demands, robotics has already seen its success in automating many industrial tasks in factories. And, a new era will come for us to see a greater success of robotics in non-industrial environments. In anticipating a wider deployment of intelligent and autonomous robots for tasks such as manufacturing, eldercare, homecare, edutainment, search and rescue, de-mining, surveillance, exploration, and security missions, it is necessary for us to push the frontier of robotics into a new dimension, in which motion and intelligence play equally important roles. After the success

of the inaugural conference, the purpose of the Second International Conference on Intelligent Robotics and Applications was to provide a venue where researchers, scientists, engineers and practitioners throughout the world could come together to present and discuss the latest achievement, future challenges and exciting applications of intelligent and autonomous robots. In particular, the emphasis of this year's conference was on "robot intelligence for achieving digital manufacturing and intelligent automations." This volume of Springer's Lecture Notes in Artificial Intelligence and Lecture Notes in Computer Science contains accepted papers presented at ICIRA 2009, held in Singapore, December 16–18, 2009.
