Doing Their Bit Michael S. Shull, David E. Wilt, 2014-05-23 The golden age of animation stretched from the early 1930s to the mid-1950s, with movie cartoons reaching an extraordinarily high level of artistry and technique--far higher than today's TV cartoons, for instance. Nearly 1000 cartoons were produced by the seven major animation studios in the U.S. between January 1, 1939, and September 30, 1945--the immediate pre-World War II period up to the cessation of hostilities. More than a quarter of the cartoons substantially refer to the war, and thereby are invaluable in helping to understand American attitudes and Hollywood's reflection of them. The meat of *Doing Their Bit* is a filmography with extremely detailed summaries of the 260 or so commercially produced, animated, war-related shorts, 1939-1945. There is also a good bit of overall commentary on these films as a group. Two chapters wrap up animated cartoons of World War I and the general political tenor of animated talkies of the 1930s. This edition also includes a new chapter on the outrageous government-sponsored Pvt Snafus.

For No Reason at All Jeffrey A. Hinkelman, 2022-02-04 The years following the signing of the Armistice saw a transformation of traditional attitudes regarding military conflict as America attempted to digest the enormity and futility of the First World War. During these years popular film culture in the United States created new ways of addressing the impact of the war on both individuals and society. Filmmakers with direct experience of combat created works that promoted their own ideas about the depiction of wartime service—ideas that frequently conflicted with established, heroic tropes for the portrayal of warfare on film. Those filmmakers spent years modifying existing standards and working through a variety of storytelling options before achieving a consensus regarding the fitting method for rendering war on screen. That consensus incorporated facets of the experience of Great War veterans, and these countered and undermined previously accepted narrative strategies. This process reached its peak during the Pre-Code Era of the early 1930s when the initially prevailing narrative would be briefly supplanted by an entirely new approach that questioned the very premises of wartime service. Even more significantly, the rhetoric of these films argued strongly for an antiwar stance that questioned every aspect of the wartime experience. *For No Reason at All: The Changing Narrative of the First World War in American Film* discusses a variety of Great War-themed films made from 1915 to the present, tracing the changing approaches to the conflict over time. Individual chapters focus on movie antecedents, animated films and comedies, the influence of literary precursors, the African American film industry, women-centered films, and the effect of the Second World War on depictions of the First. Films discussed include *Hearts of the World*, *The Cradle of Courage*, *Birthright*, *The Big Parade*, *She Goes to War*, *Doughboys*, *Young Eagles*, *The Last Flight*, *Broken Lullaby*, *Lafayette Escadrille*, and *Wonder Woman*, among many others.

Guns and Values Dylan S. McLean, Anthony K. Fleming, 2023-07-24 The American gun control debate is best understood as a battle in a war over the influence of individualism on American culture, politics, and policy. This book demonstrates that the gun debate is fundamentally about values. Specifically, it is about what we value most: private rights, or the public good. This helps explain why the technical, empirical, or legalistic arguments we hear aren't persuasive. A review of scholarly literature on both the politics of gun control and American political culture finds an American bias toward an individualism that embraces personal rights. We argue that this bias stacks the deck against gun control. Interviews we conducted with activists show that support for, or opposition to, gun control is linked to concern for the public, or private, good. Finally, we trace the federal gun control debate in Washington from the 1960s to 2010s to show the ebbs and flows of individualism's influence.

3000 Facts about Animated Shows James Egan, 2016

Drawn to Television M. Keith Booker, 2006-08-30 Since late evening cartoons first aired in 1960, prime-time animated series have had a profound effect on American television and American culture at large. The characters and motifs from such shows as The Flintstones and The Simpsons are among the best-known images in world popular culture; and tellingly, even series that have not done well in prime time—series like The Jetsons, for instance—have yielded similarly iconic images. The advent of cable and several new channels devoted exclusively to animated programming have brought old series back to life in syndication, while also providing new markets for additional, often more experimental animated series. Even on the conventional networks, programs such as The Flintstones and The Simpsons, not to mention Family Guy and King of the Hill, have consistently shown a smartness and a satirical punch that goes well beyond the norm in network programming. Drawn to Television traces the history of prime-time animation from The Flintstones' initial extension of Saturday mornings to Family Guy and South Park's late-night appeal in the 21st century. In the process, it sheds a surprising light on just how much the kid inside us all still has to say. Drawn to Television describes the content and style of all the major prime-time animated series, while also placing these series within their political and cultural contexts. It also tackles a number of important questions about animated programming, such as: how animated series differ from conventional series; why animated programming tends to be so effective as a vehicle for social and political satire; what makes animated characters so readily convertible into icons; and what the likely effects of new technologies (such as digital animation) will be on this genre in the future.

The Guns of August Barbara W. Tuchman, 2004-08-03 PULITZER PRIZE WINNER • “A brilliant piece of military history which proves up to the hilt the force of Winston Churchill's statement that the first month of World War I was ‘a drama never surpassed.’”—Newsweek Selected by the Modern Library as one of the 100 best nonfiction books of all time In this landmark account, renowned historian Barbara W. Tuchman re-creates the first month of World War I: thirty days in the summer of 1914 that determined the course of the conflict, the century, and ultimately our present world. Beginning with the funeral of Edward VII, Tuchman traces each step that led to the inevitable clash. And inevitable it was, with all sides plotting their war for a generation. Dizzily comprehensive and spectacularly portrayed with her famous talent for evoking the characters of the war's key players,

Tuchman's magnum opus is a classic for the ages. The Proud Tower, the Pulitzer Prize-winning The Guns of August, and The Zimmermann Telegram comprise Barbara W. Tuchman's classic histories of the First World War era

The Story of British Animation Jez Stewart, 2021-08-26 A Sight & Sound Book of the Year Jez Stewart charts the course of this extraordinarily fertile area of British film from early experiments with stop-motion and the flourishing of animated drawings during WWI. He reveals how the rockier interwar period set the shape of the industry in enduring ways, and how creatives like Len Lye and Lotte Reiniger brought art to advertising and sponsored films, building a foundation for such distinctive talents as Bob Godfrey, Alison De Vere and George Dunning to unleash their independent visions in the age of commercial TV. Stewart highlights the integral role of women in the industry, the crucial boost delivered by the arrival of Channel 4, the emergence of online animation and much more. The book features 'close-up' analyses of key animators such as Lancelot Speed and Richard Williams, as well as more thematic takes on art, politics and music. It builds a framework for better appreciating Britain's landmark contributions to the art of animation, including Halas and Batchelor's Animal Farm (1954), Dunning's Yellow Submarine (1968) and the creations of Aardman Animations.

To Shake Their Guns in the Tyrant's Face Robert H Churchill, 2011-01-24 "To Shake Their Guns in the Tyrant's Face addresses an area—the relationship of American political violence to American ideology—that is of growing importance and that is commanding an ever increasing audience, and it does so in a way like nothing else in the field." —David Williams, Indiana University School of Law, Bloomington After the bombings of Oklahoma City in 1995, most Americans were shocked to discover that tens of thousands of their fellow citizens had banded together in homegrown militias. Within the next few years, numerous studies and media reports appeared revealing the unseen world of the American militia movement, a loose alliance of groups with widely divergent views. Not surprisingly, it was the movement's most extreme voices that attracted the lion's share of attention. In reality, Robert Churchill writes, the militia movement was neither as irrational nor as new as it was portrayed in the press. Churchill uses three case studies to illustrate the origin of some of the core values of the modern militia movement: Fries' Rebellion in Pennsylvania at the end of the 18th century, the Sons of Liberty Conspiracy in Civil War-era Indiana and Illinois, and the Black Legion in Michigan and Ohio during the Depression. Building on extensive interviews with militia members, the author places the contemporary militia movement in the context of these earlier insurrectionary movements which, animated by a libertarian interpretation of the American Revolution, used force to resist the authority of the federal government.
