Manga and Anime Go to Hollywood Northrop Davis, 2015-12-17 The media industries in the United States and Japan are similar in much the same way different animal species are: while a horse and a kangaroo share maybe 95% of their DNA, they're nonetheless very different animals-and so it is with manga and anime in Japanese and Hollywood animation, movies, and television. Though they share some key common elements, they developed mostly separately while still influencing each other significantly along the way. That confluence is now accelerating into new forms of hybridization that will drive much of future storytelling entertainment. Packed with original interviews with top creators in these fields and illuminating case studies, *Manga and Anime Go to Hollywood* helps to parse out these shared and diverging genetic codes, revealing the cross-influences and independent traits of Japanese and American animation. In addition, *Manga and Anime Go to Hollywood* shows how to use this knowledge creatively to shape the future of global narrative storytelling, including through the educational system. Northrop Davis paints a fascinating picture of the interrelated history of Japanese manga/anime and Hollywood since the Meiji period through to World War II and up to the present day - and even to into the future.

Shōjo Across Media Jaqueline Berndt, Kazumi Nagaike, Fusami Ogi, 2019-02-22 Since the 2000s, the Japanese word *shōjo* has gained global currency, accompanying the transcultural spread of other popular Japanese media such as manga and anime. The term refers to both a character type specifically, as well as commercial genres marketed to female audiences more generally. Through its diverse chapters this edited collection introduces the two main currents of *shōjo* research: on the one hand, historical investigations of Japan's modern girl culture and its representations, informed by Japanese-studies and gender-studies concerns; on the other hand, explorations of the transcultural performativity of *shōjo* as a crafted concept and affect-prone code, shaped by media studies, genre theory, and fan-culture research. While acknowledging that *shōjo* has mediated multiple discourses throughout the twentieth century—discourses on Japan and its modernity, consumption and consumerism, non-hegemonic gender, and also technology—this volume shifts the focus to *shōjo* mediations, stretching from media by and for actual girls, to *shōjo* as media. As a result, the Japan-derived concept, while still situated, begins to offer possibilities for broader conceptualizations of girlness within the contemporary global digital

mediascape.

Japanese Animation in Asia Marco Pellitteri, Wong Heung-wah, 2021-09-28 Anime is a quintessentially Japanese form of animation consisting of both hand drawn and computer-generated imagery, and is often characterised by colourful graphics, vibrant characters, and fantastical themes. As an increasingly globalising expression of popular art and entertainment, and distributed through cinema, television, and over the internet, anime series and films have an enormous following, not only in Japan but also in Asia. This book provides a comprehensive survey of the historical development, industrial structure, and technical features of Japanese animation and of the overall dynamics of its globalisation in key contexts of the Asian region. Specific chapters cover anime's production logics, its features as an 'emotion industry', and the involvement of a range of Asian countries in the production, consumption, and cultural impact of Japanese animation.

Television, Japan, and Globalization Mitsuhiro Yoshimoto, Eva Tsai, JungBong Choi, 2016-02-02 Michigan Monograph Series in Japanese Studies No. 67 Television, Japan, and Globalization is a collection of essays that describe vivid and compelling examples of Japanese media and analyze them with sophisticated theoretical methods. The book makes a stunning contribution to the literature of television studies, which has increasingly recognized its problematic focus on U.S. and Western European media, and a compelling intervention in discussions of globalization, through its careful attention to contradictory and complex phenomena on Japanese TV. Case studies include talent and stars, romance, anime, telops, game/talk shows, and live action nostalgia shows. The book also looks at Japanese television from a political and economic perspective, with attention to Sky TV, production trends, and Fuji TV as an architectural presence in Tokyo. The combination of textual analysis, brilliant argument, and historical and economic context makes this book ideal for media studies audiences. Its most important contribution may be the way these essays move the study of Japanese popular culture beyond the tired truisms about postmodernism and open up new lines of thinking about television and popular culture within and between nations.

Anime's Knowledge Cultures Jinying Li, 2024-03-12 Unlocking the technosocial implications of global geek cultures Why has anime, a “low-tech” medium from last century, suddenly become the cultural “new cool” in the information age? Through the lens of anime and its transnational fandom, Jinying Li explores the meanings and logics of “geekdom” as one of the most significant sociocultural groups of our time. In *Anime's Knowledge Cultures*, Li shifts the center of global geography in knowledge culture from the computer boys in Silicon Valley to the anime fandom in East Asia. Drawing from film studies, animation studies, media theories, fan studies, and area studies, she provides broad cultural and theoretical explanations of anime's appeal to a new body of tech-savvy knowledge workers and consumers commonly known as geeks, otaku, or zhai. Examining the forms, techniques, and aesthetics of anime, as well as the organization, practices, and sensibilities of its fandom, *Anime's Knowledge Cultures* is at once a theorization of anime as a media environment as well as a historical and cultural study of transnational geekdom as a knowledge culture. Li analyzes anime culture beyond the national and subcultural frameworks of Japan or Japanese otaku, instead theorizing anime's transnational, transmedial network as the epitome of the postindustrial knowledge culture of global geekdom. By interrogating the connection between the anime boom and global geekdom, Li reshapes how we understand the meanings and significance of anime culture in relation to changing social and technological environments.

The Representation of Japanese Politics in Manga Roman Rosenbaum, 2020-10-29 This edited volume explores political motives, discourses and agendas in Japanese manga and graphic art with the objective of highlighting the agency of Japanese and wider Asian story-telling traditions within the context of global political traditions. Highly illustrated chapters presented here investigate the multifaceted relationship between Japan's political storytelling practices, media and bureaucratic discourse, as played out between both the visual arts and modern pop-cultural authors. From pioneering cartoonist Tezuka Osamu, contemporary manga artists such as Kotobuki Shiriagari and Fumiyo Kōno, to videogames and everyday merchandise, a wealth of source material is analysed using cross-genre techniques. Furthermore, the book resists claims that manga, unlike the bandes dessinées and American superhero comic traditions, is apolitical. On the contrary, contributors demonstrate that manga and the mediality of graphic arts have begun to actively incorporate political discourses, undermining hegemonic cultural constructs that support either the status quo, or emerging brands of neonationalism in Japanese society. *The Representation of Politics in Manga* will be a dynamic resource for students and scholars of Japanese studies, media and popular cultural studies, as well as practitioners in the graphic arts.

Animation in Asia and the Pacific John A. Lent,2001 Animation has had a global renaissance during the 1990s, and nowhere is this more evident than in Asia. With the exception of China and Japan, most Asian nations are relatively new to this art form. Over the last decade, countries such as Taiwan, South Korea, the Philippines, and Thailand, as well as China, have acted as major offshore production plants for North American and European studios. One of the spurs for this increase in activity has been the global growth of terrestrial, cable, satellite, and video systems, all demanding large menus of programming, including animation. A second spur has been the exceptional popularity that Japanese animé has enjoyed across Asia, Europe, and the United States. Despite these developments, there has not been corresponding growth of a serious literature covering industrial and aesthetic issues about Asian animation, and the small amount of work that has been produced has not been published in English. Animation in Asia and the Pacific provides the first continent-wide analysis, delving into issues of production, distribution, exhibition, aesthetics, and regulation in this burgeoning field. Animation in Asia and the Pacific also offers vignettes of the fascinating experiences of a group of animation pioneers. The historical and contemporary perspectives derive from interviews, textual analysis, archival research, and participation/observation data.

The Animation Studies Reader Nichola Dobson,Annabelle Honess Roe,Amy Ratelle,Caroline Ruddell,2018-10-18 The Animation Studies Reader brings together both key writings within animation studies and new material in emerging areas of the field. The collection provides readers with seminal texts that ground animation studies within the contexts of theory and aesthetics, form and genre, and issues of representation. The first section collates key readings on animation theory, on how we might conceptualise animation, and on some of the fundamental qualities of animation. New material is also introduced in this section specifically addressing questions raised by the nature, style and materiality of animation. The second section outlines some of the main forms that animation takes, which includes discussions of genre. Although this section cannot be exhaustive, the material chosen is

particularly useful as it provides samples of analysis that can illuminate some of the issues the first section of the book raises. The third section focuses on issues of representation and how the medium of animation might have an impact on how bodies, gender, sexuality, race and ethnicity are represented. These representations can only be read through an understanding of the questions that the first two sections of the book raise; we can only decode these representations if we take into account form and genre, and theoretical conceptualisations such as visual pleasure, spectacle, the uncanny, realism etc.
