Fluent Forever Gabriel Wyner, 2014-08-05 NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you’ll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you’ll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare

minutes of your day.

Learning Vocabulary with Anki Chien Duong, 2020-02-20 Research Paper (postgraduate) from the year 2020 in the subject Speech Science / Linguistics, language: English, abstract: This study investigates the impacts of Anki, a web-based flashcard program, on learners' vocabulary learning and their perceptions towards the program based on three criteria: usefulness, usability and enjoyment. Participants from two intact classes who were at the elementary level were included in the study. Both groups underwent a pre-test and then were required to learn the KET Vocabulary List developed by Cambridge TESOL, which is corresponding to their level at A2 according to CEFR over a period of three weeks. The control group (n = 18) utilized paper flashcards while the experimental group (n = 18) used Anki flashcards. They then took a post-test so that comparisons between two methods of learning vocabulary could be made. The results showed that making use of traditional flashcards and Anki did lead to the improvement of learners; however, those who used Anki had better performance than those who did not. Therefore, it can be concluded that Anki is an effective vocabulary learning tool for language learners. In order to gain insights into their perceptions about Anki, the researcher asked the participants to take part in a survey, some of

whom joined an interview to elaborate their thoughts afterwards. Analysis of the responses revealed that the learners found it useful and rather enjoyable, but some were of the opinion that this program is not user-friendly. As the technology is proliferating worldwide over the past century, web-based tools are becoming increasingly commonplace in language teaching and learning. Godwin-Jones (2011) indicated that state-of-the-art electronic gadgets for the past decade have supplied learners with a wide array of opportunities to study L2 vocabulary, and the vocabulary learning process primarily takes place in the form of web-based flashcards. Many studies found that digital flashcards is beneficial i

Hacking Chinese Olle Linge, 2016-03-26 Learning Chinese can be frustrating

and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to

do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study. - Geoff van der Meer, VP engineering This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision. - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.

How We Learn Benedict Carey, 2014-09-11 From an early age, we are told that restlessness, distraction, and ignorance are the enemies of success. Learning is all self-discipline, so we must confine ourselves to designated study areas, turn off the music, and maintain a strict ritual. But what if almost everything we were told about learning is wrong? And what if there was a way

to achieve more with less effort? Here, award-winning science reporter Benedict Carey sifts through decades of education research to uncover the truth about how our brains absorb and retain information. What he discovers is that, from the moment we are born, we all learn quickly, efficiently, and automatically; but in our zeal to systematize the process we have ignored valuable, naturally enjoyable learning tools like forgetting, sleeping, and daydreaming. Is a dedicated desk in a quiet room really the best way to study? Can altering your routine improve your recall? Are there times when distraction is good? Is repetition necessary? Carey's search for answers to these questions yields a wealth of strategies that make learning more a part of our everyday lives--and less of a chore.--From publisher description.
