**The Surviving Twin** Diana Lockwood,2020-10-13 This memoir chronicles the unique ordeals of identical twin sisters Diana and Julia Lockwood. Even among twins, Diana and Julia were especially close and deeply entwined--they were more than just sisters or best friends, they were like one soul in two bodies. While their total attunement sometimes saved them in funny and unexpected ways, it also eventually destroyed them. A survivor of sexual assault and anorexia and living with Asperger's, the author tells her own life story while weaving Julia's letters and journal entries into the text. While Diana survived the struggles that led her to three suicide attempts, her twin unfortunately took her own life only a year after their father did the same. This book explores the life and relationship of twins separated by tragedy and follows a woman's struggle to make it on her own.

CAV 2003 was the 15th in a series of conferences dedicated to the advancement of the theory and practice of computer-assisted formal analysis methods for hardware and software systems. The conference covers the spectrum from theoretical results to applications, with emphasis on practical verification tools, including algorithms and techniques needed for their implementation.
