Why TV is Not Our Fault Eileen R. Meehan, 2005

For more than five decades, we've been told by pundits, commentators, advertisers, scholars, and politicians that television is both a window on the world and a mirror reflecting our culture. We've been led to believe that it shows us the world's events through news programs and, through entertainment programs, reflects the preferences,

values, beliefs, and understandings shared by most Americans. We're told that if you don't like what you see on TV, don't blame the industry, blame yourself. This book dispels the myth that the television industry is just giving viewers the programming they want to see and, thus, we as viewers are responsible for the existence of shows like Fear Factor and yet another Survivor. In fact, Eileen Meehan explains, viewers exert no demand in the market for ratings, advertising slots, program production, or telecasting. She also counters the idea that TV programs reflect our culture directly. Introducing us to the political economy of television, Meehan covers programming, corporate strategies, advertising, the misnomer of competition among networks, and organizations that seek more industry accountability. She tells us why TV isn't our fault--and who's really to blame.

Post-TV Michael Strangelove, 2015-03-27 In the late 2000s, television no longer referred to an object to be watched; it had transformed into content to be streamed, downloaded, and shared. Tens of millions of viewers have "cut the cord," abandoned cable television, tuned into online services like Netflix, Hulu, and YouTube, and also watch pirated movies and programmes at an unprecedented rate. The idea that the Internet will devastate the television and film industry in the same way that it gutted the music industry no longer seems farfetched. The television industry, however, remains driven by outmoded market-based business models that ignore audience behaviour and preferences. In Post-TV, Michael Strangelove

explores the viewing habits and values of the post-television generation, one that finds new ways to exploit technology to find its entertainment for free, rather than for a fee. Challenging the notion that the audience is constrained by regulatory and industrial regimes, Strangelove argues that cord-cutting, digital piracy, increased competition, and new modes of production and distribution are making audiences and content more difficult to control, opening up the possibility of a freer, more democratic, media environment. A follow-up to the award-winning *Watching YouTube*, *Post-TV* is a lively examination of the social and economic implications of a world where people can watch what they want, when they want, wherever they want.

Streaming Wheeler W. Dixon, 2013-06-19 Analyzes the cultural and social effects of the increasing digital distribution of movies, discussing the ways in which it has impacted the making of motion pictures and altered the behavior and habits of the film audience.

The Secret Language of Competitive Intelligence

Leonard Fuld, 2010-04-21 THE ART OF SMART . . . how not to get blindsided by the competition Your key competitor has a cost advantage and you can't for the life of you figure out why or how. • A new technology or competitor is on the horizon that will completely upset the applecart in your business as Google is now doing in advertising and Wal-Mart has done in retailing. • You think a key competitor may drastically drop prices or perhaps roll out a significant new product. What can you do to ascertain what their major moves will be? Competitive intelligence, the ability to see through or stay ahead of your competition, is the unspoken, hidden key to success. It is the means to knowing a customer's strategic thinking, a rival's cost structure when making a bid, or a competitor's new product plans. Much as in a game of chess, you must think many moves ahead of your rivals—exactly the advantage competitive intelligence can give you. Leonard Fuld provides the tools to cut through the smoke screens and rumors that distort reality and shows: • How to avoid becoming your own worst enemy by removing blinders that can hide a competitor's threatening moves • How to see your competitor's vulnerability and take advantage of the easily exploitable opportunities it presents • How to run a war game to anticipate a rival's pricing moves, new product introduction, or distribution strategy, and even to avoid being surprised by new entrants who play by different rules altogether For more than twenty-five years, Leonard Fuld has been developing groundbreaking ways for managers to stay two steps ahead of the competition, providing

effective ways of finding out about pricing, new product rollouts, strategic alliances, outsourcing, and cost of operations. In *The Secret Language of Competitive Intelligence* he shows how to take data that is widely available to everyone, think critically about it, and convert it into highly refined intelligence that leads to effective market-based decisions. Digital TV Over Broadband Joan Van Tassel, 2013-10-08 *Digital TV Over Broadband: Harvesting Bandwidth* offers a clear overview of how technological developments are revolutionizing television. It details the recent shift in focus from HDTV to a more broadly defined DTV and to the increasing importance of webcasting for interactive television. *Digital Television* examines the recent industry toward a combination of digital services, including the use of the new bandwidth for additional channels of programming, as well as some high definition television. The book discusses the increasingly rapid convergence of telecommunications, television and computers and the important role of the web in the future of interactive programming. This new edition not only covers the new technology, but also demonstrates practical uses of the technology in business models.

The Television Will be Revolutionized Amanda D. Lotz, 2007-11-01 *Choice Outstanding Academic Title for 2008* After occupying a central space in American living rooms for the past fifty years, is television, as we've known it, dead? The capabilities and features of that simple box have been so radically redefined that it's now nearly unrecognizable. Today, viewers with digital video recorders such as TiVo may elect to circumvent scheduling constraints and commercials. Owners of iPods and other portable viewing devices are able to download the latest episodes of their favorite

shows and watch them whenever and wherever they want. Still others rent television shows on DVD, or download them through legal and illegal sources online. But these changes have not been hastening the demise of the medium. They are revolutionizing it. *The Television Will Be Revolutionized* examines television at the turn of the twenty-first century — what Amanda D. Lotz terms the “post-network” era. Television, both as a technology and a tool for cultural storytelling, remains as important today as ever, but it has changed in fundamental ways as the result of technological innovations, proliferating cable channels targeting ever more specific niche audiences, and evolving forms of advertising such as product placement and branded entertainment. Many of the conventional practices and even the industry’s basic business model are proving unworkable in this new context, resulting in a crisis in norms and practices. Through interviews with those working in the industry, attendance of various industry summits and meetings, surveys of trade publications, and consideration of an extensive array of popular television shows, Lotz takes us behind the screen to explore what is changing, why it’s changing, and why these changes matter.

Organization and Management Nick van Dam, Jos Marcus, 2012-11-12 *Organization and Management* is an introduction to theories and contemporary practice in cross-border business management. The book reviews the practice of management where a home-market approach no longer achieves and sustains success in an increasingly competitive global environment. Readers will learn about the

experiences of companies in many industries operating in countries such as Argentina, China, Britain, France, Germany, India, the Netherlands, Poland, and the United States. This book is designed for students taking introductory courses in organization, and international management. Through carefully developed case studies, exercises, and integrated text material, this book bridges theory and practice. The full colour layout of the book supports self-study, as well as group study and team work.

Television on Demand MJ Robinson, 2017-06-01 Since the beginning of broadcasting, radio and television producers have pushed their shows to audiences in controlled environments that end in a discrete and quantifiable site to be transformed into advertising rates. Today's viewers program their DVR's to create their own viewing schedules, wait to watch entire seasons in marathon DVD viewing sessions and stream shows to their mobile devices. The rise of a curatorial culture where viewers create their own entertainment packages and select from a buffet of viewing options and venues has caused a seismic shift for the traditional television industry. While audiences clamor for more story-driven and scripted

entertainment, their new viewing habits undermine the dominant economic structures that fund quality episodic series. Television on Demand examines how we have reached this present moment; and considers the viable future(s) of this crucial culture industry. This leads to an understanding of an empowered audience that realizes its means of control of how it consumes media, as well as a new way of looking at the industry we have traditionally and currently call 'television.'
