series The App Development Guide series from LearnToProgram Media is designed to provide you with guides to creating interesting apps. The app development guides provide all of the code, assets, and other materials you will need to create complete applications. Some apps in this series are designed to work within a web browser-others are designed to be deployed to mobile devices-either as a native iOS or Android App or as a HTML5 based app that works on both platforms. I think that, naturally, the best way to learn app development is to actually build apps. Our goal is not to provide an exhaustive explanation for every tag, method and property we use in building the apps. In this series, it is our hope that the guides will provide context to integrate what you've learned previously, and, perhaps, set you up for future learning.
