  User Acceptance of Mobile Notifications Tilo Westermann,2017-03-14 This book presents an alternative approach to studying smartphone-app user notifications. It starts with insights into user acceptance of mobile notifications in order to provide tools to support users in managing these. It extends previous research by investigating factors that influence users' perception of notifications and proposes tools addressing the shortcomings of current systems. It presents a technical framework and testbed as an approach

for evaluating the usage of mobile applications and notifications, and then discusses a series of studies based on this framework that investigate factors influencing users' perceptions of mobile notifications.   Middleware 2000 Joseph Sventek,Geoffrey Coulson,2003-06-29 Middleware is
everywhere. Ever since the advent of sockets and other virtu- circuit
abstractions, researchers have been looking for ways to incorporate high-
value concepts into distributed systems platforms. Most distributed
applications, especially Internet applications, are now programmed using such
middleware platforms. Prior to 1998, there were several major conferences and
workshops at which research into middleware was reported, including ICODP
(International C- ference on Open Distributed Processing), ICDP
(International Conference on Distributed Platforms) and SDNE (Services in
Distributed and Networked - vironments). Middleware'98was a synthesis of
these three conferences. Middleware 2000 continued the excellent tradition of
Middleware'98. It p- vided a single venue for reporting state-of-the-art
results in the provision of distributed systems platforms. The focus of
Middleware 2000 was the design, implementation, deployment, and evaluation of
distributed systems platforms and architectures for future networked
environments. Among the 70 initial submissions to Middleware 2000, 21 papers
were - lected for inclusion in the technical program of the conference. Every
paper was reviewed by four members of the program committee. The papers were
judged - cording to their originality, presentation quality, and relevance to
the conference topics. The accepted papers cover various subjects such as

caching, re?ection, quality of service, and transactions.
