International Financial Statistics, September 2018 International Monetary Fund. Statistics Dept.,2018-09-04 This monthly issue of International Financial Statistics (IFS) contains country tables for most IMF members, as well as for Anguilla, Aruba, the Central African Economic and Monetary Community, Curaçao, the currency union of Curaçao and Sint Maarten, the Eastern Caribbean Currency Union, the euro area, Montserrat, the former Netherlands Antilles, Sint Maarten, the West African Economic Monetary Union, West Bank and Gaza, and some non-sovereign territorial entities for which statistics are provided internationally on a separate basis. Exchange rates in IFS are classified into three broad categories, reflecting the role of the authorities in determining the rates and/or the multiplicity of the exchange rates in a country. The three categories are the market rate, describing an exchange rate determined largely by market forces; the official rate, describing an exchange rate determined by the authorities—sometimes in a flexible manner; and the principal, secondary, or tertiary rate, for countries maintaining multiple exchange arrangements.

Theology of the New Testament Frank S. Thielman,2011-03-22 Studying the theology of the New Testament can be a daunting task, even to the knowledgeable Bible student or pastor. Each of the twenty-seven books, written by various authors, has its own theological emphasis and nuances. How do we elicit a coherent message from such theological diversity, especially given that some of the theological statements in the New Testament seem to be at odds with one another? Is such an endeavor achievable or even valid? Theology of the New Testament takes a balanced approach in response to these challenges. Frank Thielman presents a theology of the New Testament that is careful to take into account the cultural and historical circumstances surrounding each book and the New Testament as a whole. He not only examines each book's theological content individually, but also in relation to the rest of the New Testament, particularly within each of the three theological units that comprise the New Testament: the gospels and Acts, the Pauline epistles, and the general epistles and Revelation. This canonical and synthetic approach honors both the theological diversity of the various books and the theological connections between the books. In the end, Thielman finds a unified theological vision of the New Testament, anchored in the centrality of Jesus Christ. Frank Thielman's Theology of the New Testament is an outstanding achievement. The book is marked by scholarly depth, exegetical rigor, and theological profundity. Both students and professors will profit immensely from this lucid treatment of the theology contained in the New Testament documents. Thomas R. Schreiner Professor of New Testament, The Southern Baptist Theological Seminary An accessible presentation of the key theological points of the New Testament books by an accomplished New Testament scholar and teacher. Its clear style, lucid organization, and sound theological insight make it a prime resource for serious students in both the academy and the church. Karen H. Jobes, PhD Associate Professor of New Testament, Westmont College

The report consists of three volumes. This volume addresses American prisoners of war (POW) and missing in action (MIA) cases who were not repatriated following the Korean War, with particular emphasis on whether any American servicemen were transferred to USSR territory during the war. The author finds evidence that Americans were in fact transferred to the USSR from the Korean War zone of combat operations. The tentative identity of one individual is presented, as is an estimate that approximately 50 American POW/MIAs were transferred to Soviet territory. The report looks at evidence that Americans were transported to and retained in the People's Republic of China, concluding that with the exception of highly publicized cases that eventually led to repatriation, American servicemen were not retained in China following the war. The report also discusses the location of American remains in North Korean territory and suggests policy measures that could improve the chances of their recovery and repatriation. It concludes with recommendations for a U.S. policy toward recovering remains from North Korea. The central elements of this strategy derive from the requirement to retrieve additional identification media from North Korea. The proposed change in U.S. policy shifts priority to methods of recovering remains that will increase the possibility that remains can be confidently associated with Americans who did not return from the Korean War.
