The Silver Market Phenomenon Florian Kohlbacher,Cornelius Herstatt,2010-11-01 The current shift in demographics – aging and shrinking populations – in many countries around the world presents a major challenge to companies and societies alike. One particularly essential implication is the emergence and constant growth of the so-called “graying market” or “silver market”, the market segment more or less broadly defined as those people aged 50 and older. Increasing in number and share of the total population while at the same time being relatively well-off, this market segment can be seen as very attractive and promising, although still very underdeveloped in terms of product and service offerings. This book offers a thorough and up-to-date analysis of the challenges and opportunities in leveraging innovation, technology, product development and marketing for older consumers and employees. Key lessons are drawn from a variety of industries and countries, including the lead market Japan.

Market Entry into the USA Ralf Drews,Melissa Lamson,2015-08-05 This book connects a buying psychology driven by American beliefs and values with a company’s go-to market strategy, the goal being to sensitize readers to how the cultural values of a particular country or region can impact the business environment. The book also addresses the reasons behind these differences and therefore begins with a detailed cultural comparison of the United States and Europe, and assessments of how these characteristics impact their respective markets and customer behavior differently. Another aspect that sets this book apart is that it argues for sound decision-making processes as the first priority in any international business strategy. Readers are provided detailed insights into the variables a European company needs to understand before it makes its “go/no-go” decision, along with the tools needed to evaluate the probability of success and the risks of going to market. Once a company decides to enter the US market, the book then offers a highly customer-centric approach to developing and executing an effective market strategy.

In After Steve (2022), Tripp Mickle lays out the internal and external struggles Apple faced after its iconic founder’s death. It seemed that all was well: chief designer Jony Ive continued to create exquisite designs, and they were backed by new CEO Tim Cook's deft ability to maximize sales. Apple developed indispensable products and services like Apple Watch, Apple Music, Apple Pay, and more, becoming America's first trillion-dollar company. However, the constant demand for new revolutionary products, combined with Cook’s tendency to favor speed over substance, pushed Apple away from its innovative roots and drove its creative soul, Ive, out of the company.
