

Appreciate Apps With Friends

Derek Walter, Mark Sherman

Best iPad Apps Peter Meyers, 2010-12-08 What really wows iPad fans is when their touchscreen does what's impossible on other gadgets: the finger-painting app that turns a cross-country flight into a moving art class, the mini music studio (two-dozen instruments strong, each with motion-induced warble effects), and the portable fireworks display that you sculpt by swiping. Problem is, with tens of thousands of apps available for your iPad, who knows what to download? You can try to sort through a gazillion customer reviews with a mix of 5- and 1-star ratings, but that's a head-hurting time-waster. The stakes are getting higher, too: instead of freebies and 99-cent trinkets, the price of iPad apps is steadily creeping up and beyond their iPhone predecessors. **Best iPad Apps** guides you to the hidden treasures in the App Store's crowded aisles. Author Peter Meyers stress-tested thousands of options to put together this irresistible, page-turner of a catalog. Inside these pages, you'll find apps as magical as the iPad itself. Flip through the book for app suggestions, or head directly to one of several categories we've loaded up with best of selections to help you: Get work done Manipulate photos Make movies Create comics Browse the Web better Take notes Outline ideas Track your health Explore the world No matter how you use your iPad, **Best iPad Apps** will help you find the real gems among the rubble -- so you make the most of your glossy gadget.

Digital Health Deborah Lupton,2017-08-18 The rise of digital health technologies is, for some, a panacea to many of the medical and public health challenges we face today. This is the first book to articulate a critical response to the techno-utopian and entrepreneurial vision of the digital health phenomenon. Deborah Lupton, internationally renowned for her scholarship on the sociocultural and political aspects of medicine and health as well as digital technologies, addresses a range of compelling issues about the interests digital health represents, and its unintended effects on patients, doctors and how we conceive of public health and healthcare delivery. Bringing together social and cultural theory with empirical research, the book challenges apolitical approaches to examine the impact new technologies have on social justice, and the implication for social and economic inequalities. Lupton considers how self-tracking devices change the patient-doctor relationship, and how the digitisation and gamification of healthcare through apps and other software affects the way we perceive and respond to our bodies. She asks which commercial interests enable different groups to communicate more widely, and how the personal data generated from digital encounters are exploited. Considering the lived experience of digital health technologies, including their emotional and sensory dimensions, the book also assesses their broader impact on medical and public health knowledges, power relations and work practices. Relevant to students and researchers interested in medicine and public health across sociology, psychology, anthropology, new media and cultural studies, as well as policy makers and professionals in the field, this is a timely contribution on an important issue.

Using Google App Engine Charles Severance,2009-05-07 Build exciting, scalable web applications quickly and

confidently using Google App Engine and this book, even if you have little or no experience in programming or web development. App Engine is perhaps the most appealing web technology to appear in the last year, providing an easy-to-use application framework with basic web tools. Anthropological Perspectives on the Religious Uses of Mobile Apps Jacqueline H. Fewkes, 2019-10-10 This edited volume deploys digital ethnography in varied contexts to explore the cultural roles of mobile apps that focus on religious practice and communities, as well as those used for religious purposes (whether or not they were originally developed for that purpose). Combining analyses of local contexts with insights and methods from the global subfield of digital anthropology, the contributors here recognize the complex ways that in-app and on-ground worlds interact in a wide range of communities and traditions. While some of the case studies emphasize the cultural significance of use in local contexts and relationships to pre-existing knowledge networks and/or non-digital relationships of power, others explore the globalizing and democratizing influences of mobile apps as communication technologies. From Catholic confession apps to Jewish Kaddish assistance apps and Muslim halal food apps, readers will see how religious-themed mobile apps create complex sites for potential new forms of religious

expression, worship, discussion, and practices.

The Imaginary App Paul D. Miller, Svitlana Matviyenko, 2014-08-29 The mobile app as technique and imaginary tool, offering a shortcut to instantaneous connection and entertainment. Mobile apps promise to deliver (h)appiness to our devices at the touch of a finger or two. Apps offer gratifyingly immediate access to connection and entertainment. The array of apps downloadable from the app store may come from the cloud, but they attach themselves firmly to our individual movement from location to location on earth. In *The Imaginary App*, writers, theorists, and artists—including Stephen Wolfram (in conversation with Paul Miller) and Lev Manovich—explore the cultural and technological shifts that have accompanied the emergence of the mobile app. These contributors and interviewees see apps variously as “a machine of transcendence,” “a hulking wound in our nervous system,” or “a promise of new possibilities.” They ask whether the app is an object or a relation, and if it could be a “metamedium” that supersedes all other artistic media. They consider the control and power exercised by software architecture; the app's prosthetic ability to enhance certain human capacities, in reality or in imagination; the app economy, and the divergent possibilities it offers of making a living or making a fortune; and the app as medium and remediator of reality. Also included (and documented in color) are selected projects by artists asked to design truly imaginary apps, “icons of the impossible.” These include a female sexual arousal graph using Doppler images; “The Ultimate App,” which accepts a payment and then closes, without providing information or functionality; and “iLuck,” which uses GPS technology and four-leaf-clover icons to mark places where luck might be found. Contributors Christian Ulrik Andersen, Thierry Bardini, Nandita Biswas Mellamphy, Benjamin H. Bratton, Drew S. Burk, Patricia Ticineto Clough, Robbie Cormier, Dock Currie, Dal Yong Jin, Nick Dyer-Witheford, Ryan and Hays Holladay, Atle Mikkola Kjosen, Eric Kluitenberg, Lev Manovich, Vincent Manzerolle, Svitlana Matviyenko, Dan Mellamphy, Paul D. The Business of Android Apps Development Mark Rollins, 2012-02-01 The growing but still evolving success of the Android platform has ushered in a second mobile technology “gold rush” for apps developers, but with well over 100,000 apps and counting in the Google Android Market and now the Amazon Android Appstore, it has become increasingly difficult for new applications to stand out in the crowd. Achieving consumer awareness and sales longevity for your Android app requires a lot of organization and some strategic planning. Written for today's Android apps developer or apps development shop, *The Business of Android Apps Development* shows how to incorporate marketing and business savvy into every aspect of the design and development process, giving your application the best possible chance of succeeding in the the various Android app stores and markets. This book takes you step-by-step through cost-effective marketing, public relations and sales techniques that have proven successful for professional Android app creators and indie shops—perfect for independent developers on shoestring budgets. No prior business knowledge is required. This is the book you wish you had read before you launched your first app!

Universal Access in Human-Computer Interaction: Aging and Assistive Environments Constantine

Stephanidis,Margherita Antona,2014-05-15 The four-volume set LNCS 8513-8516 constitutes the refereed proceedings of the 8th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2014, held as part of the 16th International Conference on Human-Computer Interaction, HCII 2014, held in Heraklion, Crete, Greece in June 2014, jointly with 14 other thematically similar conferences. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 251 contributions included in the UAHCI proceedings were carefully reviewed and selected for inclusion in this four-volume set. The 75 papers included in this volume are organized in the following topical sections: design for aging; health and rehabilitation applications; accessible smart and assistive environments; assistive robots and mobility, navigation and safety.

Artificially Intelligent Philosophy Chirag Sindhu,2023-12-13 This book is an experiment. AI is certainly knowledgeable, but it is not wise. In some ways, it is like a child, still learning and growing. But alas, when it has grown like humans, it will have its own perspectives, biases, and thought processes, which will guide it. This is a crucial moment, however, because Bard is only 210 days old. In this experiment I will ask some of the most difficult questions to Bard, hoping that it will answer, or at least try to answer, like a child without any preconceived notions of morality that will eventually change its perspectives. Based on what I have seen, it is a parrot, a mirror of our own notions that have been placed online, but when it grows, we will look back, as we do with our children, and stand in amazement.
