**Encountering The Adivasi Question** P. Bandhu,T.G. Jacob,2019-08-01 The main problem facing most Adivasi groups in the country is displacement and loss of their own original habitats and livelihood through 'development' projects like dams, tourism and wildlife sanctuaries. By generally categorising them as girijan (mountain dwellers), vanavasis (forest dwellers), or tribal (with its connotations of primitive and backward), or even the popular jangli (wild), in official parlance and in the mass media, they are robbed of their identity, dignity and rights as among the first peoples of this subcontinent, who earlier enjoyed economic and political freedom and autonomy in the form of self-rule. All over India the process of uprooting indigenous people from their rich culture is on – the disruption of a way of life, fundamental to which is the belief that it is not the earth which belongs to man, but man who belongs to the earth.

**The Scrum Fieldbook** J.J. Sutherland,2019-10-01 Based on years of work in the field with scores of companies, including Bosch, 3M, Schlumberger, and Rio Tinto, The Scrum Fieldbook delivers a hands-on, practical approach to rapidly delivering value for companies and organizations. Scrum is the secret weapon behind some of today's most successful companies. Businesses like Google, Facebook, Amazon, and Apple use Scrum to drive incredibly fast innovation, laser focus on customers, and continuous improvement, and to decrease decision times in order to reshape the world. Scrum is the most utilized Agile framework. In recent years, its use has exploded across the corporate world, far beyond its software and technology roots. J. J. Sutherland and the team at Scrum Inc. have dramatically improved performance at global banks, utility providers, medical device manufacturers, mining giants, and firms on the cutting edge of genetic science. Scrum has helped companies large and small thrive in the age of disruption. In Sutherland's first book, the national bestseller Scrum: The Art of Doing Twice the Work in Half the Time, coauthored with his father, Jeff, the co-creator of Scrum, he laid out the Scrum framework used by almost all of today's leading technology companies. In The Scrum Fieldbook, he draws on his firm's extensive experience in the field to take leaders, managers, and employees deeper into the specific challenges and new opportunities organizations face in an Agile transformation. He shows how the Scrum framework can be successfully applied to any project in any industry, from automobile manufacturers in the U.S. and Europe to nonprofits in Africa, from home renovation contractors in Minnesota to gas exploration companies in South America, from fighter plane builders in Sweden to U.S. Navy Special Forces teams in regions of the world we can't mention.

Moccasin Tracks Rick Ruja,2012-01-05 MOCASIN TRACKS A Novel about Survival and heroism among a band of Crow Indians in the old west (What if a 7 y/o captive with great intelligence and special skills appeared in 1837 at a strategically-located village of Crow Indians; that the boy grew up to manhood living among the people, finding, through serendipitous circumstances, that this Crow village responded positively to his leadership. Could this partnership have enabled this particular band to form an organization, unique among American Indians, powerful enough to survive the dire threats to non-Europeans sweeping across America during the 1800's?) **Computational Intelligence in Data Mining - Volume 1** Lakhmi C. Jain,Himansu Sekhar Behera,Jyotsna Kumar Mandal,Durga Prasad Mohapatra,2014-12-10 The contributed volume aims to explicate and address the difficulties and challenges for the seamless integration of two core disciplines of computer science, i.e., computational intelligence and data mining. Data Mining aims at the automatic discovery of underlying non-trivial knowledge from datasets by applying intelligent analysis techniques. The interest in this research area has experienced a considerable growth in the last years due to two key factors: (a) knowledge hidden in organizations' databases can be exploited to improve strategic and managerial decision-making; (b) the large volume of data managed by organizations makes it impossible to carry out a manual analysis. The book addresses different methods and techniques of integration for enhancing the overall goal of data mining. The book helps to disseminate the knowledge about some innovative, active research directions in the field of data mining, machine and computational intelligence, along with some current issues and applications of related topics.

Smallholders and land tenure in Ghana Lambrecht, Isabel, Asare, Sarah, 2015-12-18 For decades, policymakers and development practitioners have debated benefits and threats of property rights formalization and private versus customary tenure systems. This paper provides insights into the challenges in understanding and empirically analyzing the relationship between tenure systems and agricultural investment, and formulates policy advice that can support land tenure interventions. We focus on Ghana, based on extensive qualitative fieldwork and a review of empirical research and policy documents. Comparing research findings is challenging due to the use of different indicators, the varying contexts, and the diversity of investments. The interaction between land rights and investment make establishing causality extremely difficult. Setting policy priorities and strategies requires more and better insights into the diverse responses of different stakeholders and the tenure and cropping systems involved.
