Take Control of macOS Media Apps Kirk McElhearn, 2024-04-12 Discover Apple's Music, TV, Podcasts, and Books apps Version 1.9, updated April 12, 2024 Are you bewildered with the apps that replaced iTunes in macOS? Befuddled by Apple Music? Do you want to customize the Music app sidebar? Wish you could organize your podcasts? Wondering what the difference is between loves and stars? In this book, Kirk McElhearn (author of three previous Take Control titles on iTunes, going back to 2010) explains not only how Apple's media apps work, but also how normal people can make the Music, TV, Podcasts, and Books apps do what they want. Starting in macOS 10.15 Catalina, Apple finally did away with iTunes. In its place are three new apps—Music, TV, and Podcasts—with audiobooks now handled by the Books app and syncing of mobile devices handled by the Finder. Where once iTunes was an all-purpose media hub, now you may use up to five apps to accomplish the same things. The new apps also add more features (while, sadly, removing a few things too). Take Control of macOS Media Apps is your guide to the post-iTunes world. Kirk McElhearn, whose earlier books on iTunes 10, 11, and 12 collectively sold nearly 14,000 copies, is back with a new book that shows you how to manage your music, videos, podcasts, and audiobooks in Catalina and later. Whether you just want to play your media, or you want to go deeper with special features like Genius, Shuffle, Playing Next, Apple Music, and iTunes Match, this comprehensive guide has the answers you need. Kirk also looks at various ways of bringing audio and video into Apple's media apps, tagging songs and videos so you can find them more easily later, creating playlists, sharing your library over a home network, and syncing media with your iPhone, iPad, or iPod. The book covers how to:

- **Play Music:** Learn the basics of playing audio (and even music videos) in the Music app. You'll also find tips on making quick playlists with Genius and Playing Next, learn the best ways to search for the music you want to hear, stream music to other devices in your home, and view lyrics while tunes play.
- **Stream Music:** Use Apple Music, a paid service, to listen to any of 100 million tracks. Or listen to live broadcasts from Apple Music Radio (including Apple Music 1).
- **View Your Music and Other Content:** Learn how to use the sidebar, view your music library, and work with contextual menus in the Music app.
- **Store Your Music Library in the Cloud:** What are the pros and cons of using the Sync Library setting to store your music in the cloud? How do Music and iTunes Match figure out whether to upload your music when that setting is enabled? You'll get answers to these questions and more.
- **Use the iTunes Store:** iTunes may be gone, but the iTunes Store is still open for business! Find tips on shopping in the iTunes Store, and get advice on sharing your purchases with family members and among your various Apple devices.
- **Tag Your Music:** Tags are bits of information (also known as “metadata”) that can describe your media. Learn which tags to bother changing, the best ways to add lyrics and album art, how to rate songs with stars, loves, or both, and more.
- **Organize Your Music:** Make a simple playlist of romantic songs, workout songs, or whatever theme you like. You'll learn how to create smart playlists that, for example, comprise only your 5-star faves or only tunes you haven't heard recently, and how to transfer playlists to the Apple Watch. You'll also find help with operational issues like eliminating duplicates from your music library.
- **Manage and Share Media Files:** Whether you want to casually share a playlist from your laptop when visiting a friend or you want to make all your media available on all your home's computers, you'll find out how Media Sharing and Home Sharing make sharing possible. You'll also learn how to manage massive media libraries and store media files on external drives.
- **Listen to Audiobooks:** Discover how to download and play audiobooks in the Books app, and how to manage your audiobook library.
- **View Movies and TV Shows:** Use the TV app (with or without the forthcoming Apple TV+ service) to watch videos, including those purchased or rented from the iTunes Store

and those you add yourself. • Listen to and Watch Podcasts: You'll be sampling and subscribing to podcasts in no time with Kirk's advice, plus you'll pick a method of syncing podcast episodes to your iPhone or iPad and even learn about creating your own podcast station. • Sync Media: You've put all your media on your Mac...now, how do you transfer it to a mobile Apple device such as an iPhone, an iPad, an old-school iPod, or an Apple Watch? And how do you use an Apple TV to enjoy the media on your Mac? Learn the best approach for your situation. • Rip, Burn, and Print: Add content to your media apps with Kirk's detailed steps for "ripping" music CDs and audiobooks. Also learn how to burn music from Music onto a CD, and get directions for printing a song list—for example, to include in the jewel case of said CD. • Extend with AppleScript: Mac users can make the Music and TV apps do more with AppleScript. Learn about key AppleScripts that you can download to make your media apps jump through even more hoops.

Your 2019 iPad Cathy Young, 2019-05-03 So, you have a new iPad. A hearty congratulations to you! No doubt you've heard about messaging, email, and productivity apps. My goal is to help you enjoy the wonder of discovering your iPad. Along the way, I want to: • Demonstrate the cool and awe-inspiring features of the iPad. These aren't random tips and tricks. Instead, I have showcased them in a way that lets you find them while exploring a particular feature or topic. • Help you find what you want, when you want it. The organized and detailed Table of Contents includes 600 topics. Skip around to your heart's content. • The Visual Index showcases over 125 icons for Apple apps, third-party apps, and iOS controls and icons. Next time you wonder "What does that icon mean?" you'll have an answer at your fingertips. • Explore over 175 third-party apps in Chapter 7, including IFTTT. When a manufacturer doesn't have an app that does what you want, chances are they do have IFTTT integrations. Logitech Harmony, eBay, and Twitter IFTTT services are discussed in Chapter 7. We also cover creating your own IFTTT applets and multi-step IFTTT Maker apps. • Use multitasking to split your screen and work with two apps simultaneously as outlined in Chapter 4. In Chapter 6 learn how to open two Safari browser windows side-by-side. • Set up a shared grocery list and add items with your digital assistant. Everyone in your family can view and check off items on your family's grocery list. Use Siri, Alexa, Google Home, or Microsoft Cortana to add items to your grocery list. Chapter 7 covers setting up iOS family sharing and a shared iOS reminder list. Steps for creating IFTTT integrations that link iOS reminders and digital assistants are also included. • iOS 12 introduced "Passwords & Accounts." All your accounts and passwords are stored in one place - your iCloud Keychain. Your security information is available on any Apple device when you authenticate with Face ID, Touch ID, or your passcode. iOS 12 will generate strong passwords for you, identify weak passwords, and autofill. Chapter 3 has the details. • Create your own Siri Shortcuts, or take advantage of Third-Party apps that support the "Add to Siri" options. Apps like AirBnB and Waze support Siri Shortcuts. Search for a location in Waze like your work address, and add it as a Siri Shortcut. Simply say, "Siri, Go to Work" and Siri launches the Waze app and navigates to the location. Chapter 6 includes details and examples of the new "Shortcuts" app. • iMessages support Digital Touch, Camera Effects, sending cash with Apple Pay, and so much more. Chapters 4 and 6 have detailed examples. • The iWork apps are designed for Apple Pencil. Smart annotation anchors comments and proof marks to the original text in the Pages app, so that document changes occur around the smart annotations. • Learn how to set up custom app notifications. iOS 12 uses geofencing to silence alerts until you leave a location. Temporarily silence alerts for a period of time, or for a particular app. Chapter 5 covers all the details of the Notification Center and demonstrates calendar alerts, mail VIP alerts, and more. • Turn on the "Speak Screen" setting to listen to the content of the screen. This feature works with any app, but I love it for books, as shown in Chapter 3. This book is specifically for the 2019 Air and Mini iPad, with iOS 12. Much of the content does apply equally to older iPad models, as well as Apple devices running iOS 12. Are you ready for the iPad experience? Let's get started.
