Comprehensive Corydoras Fish Care Guide Book
Cleta Arun M D, 2021-08-04 Cory Catfish, also called Cory Cats, Cory Fish and Corydoras Catfish, are very popular freshwater fish in pet stores. Corys are hardy fish for their size and are staples in freshwater community tanks. Cory Catfish are often described as armored catfish, due to their plates of bone-like material running the length of their bodies. There are many different Cory Catfish types, all varying in size and color, but Bronze Cory Catfish are probably the most common. The good news is that Cory Catfish care is easy regardless of the type. Because Cory Catfish care is basically effortless, they are especially popular with beginner hobbyists. This genus of South American catfish includes more than 160 species, with several hundred more that are waiting to be classified. Ranging from 1 to 3 inches long in the aquarium hobby, they're named after the bony plates of armor on their body. For protection against predators, these little catfish also have sharp spines in their fins that can sometimes produce a mild venom when stressed (in other words, don't try to catch them with your bare hands). Depending on the species, most cory catfish enjoy temperatures between 72 and 82°F. For example,

peppered cory catfish (*Corydoras paleatus*) and julii cory catfish (*Corydoras julii*) are found on the cooler end of the spectrum, whereas sterbai cory catfish (*Corydoras sterbai*) can live in higher temperatures. Read on to understand this fantastic catfish and learn why this fantastic fish breed is a great pet companion to have.
