ECEL2015-14th European Conference on e-Learning, Amanda Jefferies and Marija Cubric ,2015-10-13 These Proceedings represent the work of contributors to the 14th European Conference on e-Learning, ECEL 2015, hosted this year by the University of Hertfordshire, Hatfield, UK on 29-30 October 2015. The Conference and Programme Co-Chairs are Professor Amanda Jefferies and Dr Marija Cubric, both from the University of Hertfordshire. The conference will be opened with a keynote address by Professor Patrick McAndrew, Director, Institute of Educational Technology, Open University, UK with a talk on Innovating for learning: designing for the future of education. On the second day the keynote will be delivered by Professor John Traxler, University of Wolverhampton, UK on the subject of Mobile Learning - No Longer Just e-Learning with Mobiles. ECEL provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in many different branches of e-Learning. At the same time, it provides an important opportunity for members of the EL community to come together with peers, share knowledge and exchange ideas. With an initial submission of 169 abstracts, after the double blind, peer review process there are 86 academic papers,16 Phd Papers, 5 Work in Progress papers and 1 non academic papers in these Conference Proceedings. These papers reflect the truly global nature of research in the area with contributions from Algeria, Australia, Austria, Belgium, Botswana, Canada, Chile, Coventry, Czech Republic, Denmark, Egypt, England, Estonia, France, Germany, Ireland, Japan, Kazakhstan, New Zealand, Nigeria, Norway, Oman, Portugal, Republic of Kazakhstan, Romania, Saudi Arabia, Scotland, Singapore, South Africa, Sweden, the Czech Republic, Turkey, Uganda, UK, United Arab Emirates, UK and USA, Zimbabwe. A selection of papers - those agreed by a panel of reviewers and the editor will be published in a special conference edition of the EJEL (Electronic Journal of e-Learning www.ejel.org).

Plant Invasions Anna Traveset,David M. Richardson,2020-11-20 There are many books on aspects of plant invasions, but none that focus on the key role of species interactions in mediating invasions. This book reviews exciting new findings and explores how new methods and tools are shedding new light on crucial processes in plant invasions. This book will be of interest to academics and students of ecology, researchers engaged in developing management solutions, scientific managers of natural ecosystems, and policy-makers.

Ebbs and Flows of Ancient Imperial Power, 3000 BC-AD 900 Will Slatyer,2014-05 Ebbs and Flows of Ancient Imperial Power, 3000 BC-AD 900 provides a flow of history throughout the ancient world, describing the ebbs and flows of empires and their power. Author Will Slatyer presents empires in China and India in the same timeframes as Mediterranean empires to show patterns of similarity. During ancient times, wars were a vital part of power-building, focusing on gaining territory and wealth for ancient priests and kings who evolved into imperial leaders with absolute power. Religion was an important factor in allowing the popular power of leaders--until contamination of foreign religions diluted their authority. the financial evolution had its origins in the weights of precious metals owned by temples, which were then converted into gold and silver coins that could be used for retail purchases and to pay individual taxes. When governments took full control of the minting of coins, they also commenced the debasement of the value of money that continues to the present day. Ebbs and Flows of Ancient Imperial Power, 3000 BC-AD 900 shows that fear and greed experienced by the priest, kings, pharaohs, and emperors of ancient times have not changed from the fear and greed of modern leaders. Much can be learned from an overview of historic empires.

Dictionary of Arabic and allied loanwords Frederico Corriente,2008-10-31 A survey of Arabic and allied loanwords in Western languages is a first-rate tool to assess the impact of Islamic factors in the emergence and background of Western civilization. The Romance languages of the Iberian Peninsula are in an ideal position for this kind of research, considering the length and strength of Muslim states on its soil.

Human Exploitation and Biodiversity Conservation David L. Hawksworth,Alan T. Bull,2008-01-03 This book presents a wide range of contributions addressing diverse aspects of biodiversity exploitation and conservation. These collectively provide a snapshot of ongoing action and state-of-the-art research, rather than a series of necessarily more superficial overviews. Examples presented here derive from studies in 17 countries including Africa, Asia, Europe, and North and South America. These reports will stimulate future work toward attaining a sustainable balance between the conservation and exploitation of biodiversity.

Invaders and Infidels (Book 1) Sandeep Balakrishna,2020-11-28 The Islamic conquest of India is probably the bloodiest story in history. It is a discouraging tale, for its evident moral is that civilisation is a precious good, whose delicate complex of order and freedom, culture and peace can at any moment be overthrown by barbarians invading from without or multiplying within. ~Will Durant, American historian *Invaders and Infidels: From Sindh to Delhi: The 500-Year Journey of Islamic Invasions* is a work of gripping history, which tells the story of the origins and trajectory of Islamic invasions into India. It begins with the first Muslim conquest and ends with Babur's invasion of Hindustan, spanning the period of the Delhi Sultanate which was in power for almost 320 years. This epochal story encompasses a vast sweep of events, which changed the history of India forever, and introduced it to an alien faith and a religious despotism such as the country had never experienced before. It comprises major and minor sagas of great heroism, untold savagery, stout resistance, brutal intrigues and epic tragedies. Embedded in this narrative are two major themes, largely overlooked in the inherited Indian historical and cultural memory. For more than three hundred years, alien Muslim invasions into India were largely fleeting, transitory and unstable. However, the lasting legacy of these Muslim invasions is the permanent destruction and disappearance of Classical India. *Invaders and Infidels* will fascinate anyone interested in the story of pre-Medieval India, a gateway era in the history of this ancient culture and civilisation.

Invasive Stink Bugs and Related Species (Pentatomoidea) J.E. McPherson,2018-01-17 Key features: Presents a brief history of past classifications, a summary of present classification, and speculation on how the

classification may evolve in the future Includes keys for the identification of families and subfamilies of the Pentatomoidea and for the tribes in the Pentatomidae Explains transmission of plant pathogens and concepts of pathology and heteropteran feeding for the non-specialist Provides an extensive literature review of transmission by stink bugs of viral, bacterial, fungal, and protozoan organisms that cause diseases of plants Discusses the diversity of microbial symbionts in the Pentatomidae and related species, showing how microorganisms underpin the evolution of this insect group Reviews semiochemicals (pheromones, kairomones, allomones) of the Pentatomoidea and their vital role in the life histories of pest and beneficial species and their exploitation by natural enemies of true bugs Covers past, current, and future control options for insects, with a focus on stink bugs and related heteropterans The Superfamily Pentatomoidea (stink bugs and their relatives) is comprised of 18 families with over 8,000 species, the largest of which is the family Pentatomidae (about 5,000 species). These species primarily are phytophagous, and many cause tremendous economic damage to crops worldwide. Within this superfamily are six invasive species, two that occur worldwide and four that are recent invaders in North America. Once established in new geographic regions, these species have increased their numbers and geographic distributions dramatically, causing economic damage totaling billions of dollars. Invasive Stink Bugs and Related Species (Pentatomoidea): Biology, Higher Systematics, Semiochemistry, and Management is the first book that presents comprehensive coverage of the biology of invasive pentatomoids and related true bug species and addresses issues of rapidly growing economic and environmental concerns. Containing the contributions of more than 60 stink bug specialists from 15 countries, this book provides a better understanding of the biology and economic importance of these invasive species, why they became invasive, and how their continued geographical expansion is likely to affect numerous agricultural systems and natural environments. Including over 3,500 references, this authoritative work serves as an access point to the primary literature on their life histories, higher systematics, diapause and seasonal cycles, pathogens, symbionts, semiochemistry, and pest management control strategies for pentatomoid bugs.
