Women, Gender and Religious Nationalism Amrita Basu,Tanika Sarkar,2022-08-31 This book reflects the changing modalities of Hindu nationalist organizing among women and youth. It provides unique insights into how this immensely powerful political formation has been able to preside over a massive network of grassroots organisations among most segments of Indian society and capture national power. Chapters explore the techniques the RSS, VHP and BJP employ and the messages they convey about masculinity, femininity, and LGBTQ communities, and analyze contrasting forms of women's activism in defending and opposing Hindu nationalism. This book contributes to the global literature on the gender dimensions of rightwing politics. By exploring why women advance the agenda of the Hindu Right despite its conservative views on gender and sexuality, the book makes an important intervention in feminist and women's studies scholarship.

**Internet Arabic** Mourad Diouri, 2013-08-31 What is the Arabic term for 'homepage', 'cloud computing' and 'Arabizi? How would you say 'blogging', 'podcasting', 'social networking' and 'tagging'? This vocabulary gives you ready-made lists of key terms in Internet Arabic for translating both from and into Arabic, grouped together in the way you'll use them. Divided into 11 key areas: general terminology, web browsing, written online communication (emails and online forms; blogging; collaborative writing), audio-visual online communication, searching for Information on the web, e-learning, online social networking, netiquette, online security, internet services and my digital identity.

*Challenging the Monolingual Mindset* John Hajek, Yvette Slaughter, 2014-10-02 This volume illustrates the distinctive and interconnected use of languages in increasingly diversified communities, examining a range of multilingual contexts, including post-migration settlement, language policy, education, language contact and intercultural communication. With contributions from researchers in Australia, Europe and Asia, the book discusses the opportunities and tensions that can emerge when societies attempt to manage and understand multilingual communication within and across communities. Reflecting the ideas of Professor Michael Clyne, the volume makes clear how ongoing research across a broad range of topics can assist in challenging the monolingual mindset by bringing to the attention of readers the rich linguistic diversity, as well as linguistic potential, of our communities around the world.

*RSS 360* Ratan Sharda, 2018-06-18 Founded in 1925, banned three times by the governments of independent India but with a widespread network of thousands of local branches and millions of volunteers, the Rashtriya Swayamsevak Sangh's (RSS) presence and influence is formidable. However, it has long been acknowledged that the best way to know the RSS is to join it. Perhaps, this is why there is very little literature on how it functions. As a senior member who has managed various responsibilities in the RSS over the years, Ratan Sharda reveals the supposedly secret world of this volunteer organisation. He presents a comprehensive view of the Sangh's philosophy, its workings and its humungous reach through various organisations inspired by it across India in a simple and easy-flowing manner, sprinkled with interesting anecdotes. With an insider's knowledge of the philosophy, organisational structure and working of this huge cadre-based organisation, RSS 360 is a compelling read, attempting to lift the alleged veil of secrecy that shrouds the organisation.

**Neural Generation of Textual Summaries from Knowledge Base Triples** P. Vougiouklis, 2020-04-07 Most people need textual or visual interfaces to help them make sense of Semantic Web data. In this book, the author investigates the problems associated with generating natural language summaries for structured data encoded as triples using deep neural networks. An end-to-end trainable architecture is proposed, which encodes the information from a set of knowledge graph triples into a vector of fixed dimensionality, and generates a textual summary by conditioning the output on this encoded vector. Different methodologies for building the required data-to-text corpora are explored to train and evaluate the performance of the approach. Attention is first focused on generating biographies, and the author demonstrates that the technique is capable of scaling to domains with larger and more challenging vocabularies. The applicability of the technique for the generation of open-domain Wikipedia

summaries in Arabic and Esperanto – two under-resourced languages – is then discussed, and a set of community studies, devised to measure the usability of the automatically generated content by Wikipedia readers and editors, is described. Finally, the book explains an extension of the original model with a pointer mechanism that enables it to learn to verbalise in a different number of ways the content from the triples while retaining the capacity to generate words from a fixed target vocabulary. The evaluation of performance using a dataset encompassing all of English Wikipedia is described, with results from both automatic and human evaluation both of which highlight the superiority of the latter approach as compared to the original architecture.

*The Semantic Web* Aldo Gangemi,Roberto Navigli,Maria-Esther Vidal,Pascal Hitzler,Raphaël Troncy,Laura Hollink,Anna Tordai,Mehwish Alam,2018-06-02 This book constitutes the refereed proceedings of the 15th International Semantic Web Conference, ESWC 2018, held in Heraklion, Crete, Greece. The papers cover a large range of topics such as logical modelling and reasoning, natural language processing, databases and data storage and access, machine learning, distributed systems, information retrieval and data mining, social networks, and Web science and Web engineering.

*Multilinguality in Knowledge Graphs* L.-A. Kaffee,2023-11-14 Content on the web is predominantly written in English, making it inaccessible to those who only speak other languages. Knowledge graphs can store multilingual information, facilitate the creation of multilingual applications, and make content accessible to multiple language communities. This book, Multilinguality in Knowledge Graphs, presents studies which assess and improve the state of labels and languages in knowledge graphs and the application of multilingual information. The author proposes ways of using multilingual knowledge graphs to reduce the gaps in coverage between languages, and the book explores the current state of language distribution in knowledge graphs by developing a framework based on existing standards, frameworks, and guidelines to measure label and language distribution in knowledge graphs. Applying this framework to a dataset representing the web of data, and to Wikidata, both a lack of labeling on the web and a bias towards a small set of languages were found. The book explores how a knowledge of labels and languages can be used in the domain of answering questions, and demonstrates how the framework can be applied to the task of ranking and selecting knowledge graphs for a set of user questions. Transliteration and translation of knowledge graph labels and aliases are also covered, as is the automatic classification of labels into one or the other to train a model for each task. The book provides a wide range of information on working with data and knowledge graphs in less-resourced languages.

**Muslim Politics in Bihar** Mohammad Sajjad, 2014-08-13 This book studies the engagement of various Muslim communities with Bihar politics from colonial times to present-day India. It debunks several myths in highlighting Muslim resistance to the Two-Nation theory, and counters the ‘Isolation Syndrome’ faced by Muslim communities after Independence. Using rare archival sources and hitherto unexamined Urdu texts, this book offers a nuanced exploration of complex themes such as the struggle against Bengali hegemony, communalism, regionalism and alienation before Independence, recent language politics, the political assertion of low-caste Muslims in current Bihar, as well as their quest for social and gender justice. An important contribution to the study of South Asian Islam, this book will interest students and scholars of modern Indian history, politics, sociology, religion, gender, and minority studies.
