🔍 **Emerging Networking in the Digital Transformation Age** Mikhailo Klymash,Andriy Luntovskyy,Mykola Beshley,Igor Melnyk,Alexander Schill,2023-03-20 This book covers a range of leading-edge topics. It is suitable for teaching specialists for advanced lectures in the domains of systems architecture and distributed platforms. Furthermore, it serves as a basis for undergraduates as well as an inspiration for interesting postgraduates, looking for new challenges. It addresses a holistic view of QoS, which becomes nowadays via Digital Transformations less technically and more socially driven. This includes IoT, energy efficiency, secure transactions, blockchains, and smart contracting. Under the term Emerging Networking (EMN), we cover the steadily growing diversity of smart mobile and robotic apps and unmanned scenarios (UAV). EMN supports distributed intelligence across the combined mobile, wireless, and fixed networks in the edge-to-cloud continuum. The 6G driving factors and potentials in the mid-term are examined. Operative (emergency) networking, which assists rescue troops at sites, also belongs to the above-mentioned problems. The EMN architecture includes the components of SDN, blockchain, and AI with efficient slicing and cloud support. The design peculiarities in dynamically changing domains, such as smart shopping/office/home, context-sensitive intelligent apps, are discussed. Altogether, the provided content is technically interesting while still being rather practically oriented and therefore straightforward to understand. This book originated from the close cooperation of scientists from Germany, Ukraine, Israel, Switzerland, Slovak Republic, Poland, Czech Republic, South Korea, China, Italy, North Macedonia, Azerbaijan, Kazakhstan, France, Latvia, Greece, Romania, USA, Finland, Morocco, Ireland, and the United Kingdom. We wish all readers success and lots of inspiration from this useful book!

🔍 **Robopocalypse** Daniel H. Wilson,2012-04-17 In this terrifying tale of humanity’s desperate stand against a robot uprising, Daniel H. Wilson has written the most entertaining sci-fi thriller in years. Not far into our future, the dazzling technology that runs our world turns against us. Controlled by a childlike—yet massively powerful—artificial intelligence known as Archos, the global network of machines on which our world has grown dependent suddenly becomes an implacable, deadly foe. At Zero Hour—the moment the robots attack—the human race is almost annihilated, but as its scattered remnants regroup, humanity for the first time unites in a determined effort to fight back. This is the oral history of that conflict, told by an international cast of survivors who experienced this long and bloody confrontation with the machines. Brilliantly conceived and amazingly detailed, Robopocalypse is an action-packed epic with chilling implications about the real technology that surrounds us.
