U. S. Army Report and Message Formats (FM 6-99. 2 / 101-5-2) Department of the Army,2012-11-29 FM 6-99.2, "US Army Report and Message Formats," is the Army's keystone manual for standardized report and message formats. It provides a standard, readily available reference from which soldiers as well as automation designers can extract report and message templates. FM 6-99.2 is a compendium of formats commonly used by tactical units from small unit to corps and forms the baseline for reporting and communicating as command, control, and communications technology evolves. It allows a common, authoritative understanding of reporting and communicating to exist among all US Army elements. It also relates to, supports, and drives command, control, and communications doctrine and US Army interaction with the joint and multinational communications communities. FM 6-99.2 facilitates the tailoring and task organization of US Army elements through standardization of the command, control, and communications formats units use to communicate internally. The voice-message templates contained in FM 6-99.2 provide the bridge between technologically advanced units and those not yet modernized. This is significant because, while our modernized units are among the most capable, nonmodernized units currently comprise the majority of the US Army's active component, all of the reserve components, and the majority of our potential allies. The US Army will continue to modernize all units, but the requirement to communicate expeditiously and succinctly via voice will remain. Potential attacks on our command, control, and communications networks, equipment damage, incompatible communications systems, and equipment failures are other consequences that may require the use of voice message formats, even for modernized units. As the US Army's doctrinal library for report and message voice templates, FM 6-99.2 is intended to prevent units from wasting time and resources designing command and control formats. Units at different locations and echelons can develop similar SOPs for report and message formats (voice and digital) that facilitate command, control, communications, computer, and intelligence (C4I) exchanges. The FM 6-99.2 formats are derived from existing Army Battle Command System (ABCS), United States Message Text Formats (USMTF), Allied Procedures Publication- 9 (APP-9) formats, as well as numerous unit SOPs. These sources, especially the formats from existing unit SOPs, have been collected, discussed, and chosen as the most user friendly, functional, and adaptable. As a user's manual, FM 6-99.2 will drive the formatting of future ABCS report and messages, US Army input to the development of APP-9, and the USMTF message formats. Formats contained in FM 6-99.2 are the mechanism through which the US Army seeks to adapt these joint and multinational formats into a user-friendly and standardized land component message format library. Parallel formats for ABCS, APP-9 and USMTF will enable US Army units to operate in joint and multinational command structures without reconfiguring their normal mode of operation. All future digitization formats for the US Army will be based on these voice message templates.

Military Quantitative Physiology Karl Friedl,William R. Santee,Borden Institute (U.S.),2012 NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT-OVERSTOCK SALE -- Significantly reduced list price Few human activities demand or deserve as much attention of the citizens of a nation as the array of man-made and natural environmental threats faced by the soldiers and other warriors defending the nation - those that pose the risk of disease, injury, combat wounds, and even death. This book is the Army's first detailing research in computational physiology models and highlighting pivotal research. It outlines the extent to which basic and applied biomedical scientists, clinicians, modelers, and others stribe to understand the extent of these threats, and provide intellectual and materiel options to mitigate these risks. This book summarizes major Army research efforts to quantify and model military relevant physiology. These chapters highlight the translation of this research into useful predictive tools. The tools are of importance to medical planners, materiel developers, commanders, and in many cases, every soldier. These chapters detail the experimental basis for many of the predictive tools that are currently in use. This book is written for military clinicians, and medical researchers who may be reasonably expected to explain some of the background, as well as those who will extend the research. Many people will find this book interesting because it details research on topics that affect everyone in everyday life, including how we sleep, eat, and exercise, as well as more specific topics such as the effects of caffeine on performance, risks associated with laser pointers, and even Army blast models that have influenced safety thresholds for car airbag deployments.

Rethinking Reintegration and Veteran Identity Jeni Ruth Hunniecutt,2022-02-07 This book analyzes and discusses the U.S. Military Veteran identity. Throughout seven chapters spanning narrative, literature,

theory and analysis, the book combines the author's own personal story of joining, serving in, and separating from the U.S. military with corresponding research about military transitions, reintegration, Veteran suicides, and psychosocial adjustment challenges. The purpose of the book is to help readers understand Veteran identity in a way that centers the social implications of belonging to and serving in the military institution. In the final chapters of the book, existing theories and models related to military transitions are dissected before a new Model of Veteran Identity Hierarchy as well as a reconceptualization of Veteran identity are presented.

US Army Report and Message Formats Department Army,2013-08-19 Field Manual (FM) 6-99 provides a standardized readily available reference for Army forces to extract common reports and message templates. This manual is a collection of reports used by units of all sizes and forms the base of Army information exchange in a degraded network environment. FM 6-99 facilitates a common understanding of reporting and communicating throughout U.S. Army elements and it is the keystone manual for report and message formats.The principal audience for FM 6-99 is all members of the profession of arms. Commanders and staffs of Army headquarters serving as joint task force or multinational headquarters should also refer to applicable joint or multinational doctrine concerning the range of military operations and joint or multinational forces. Trainers and educators throughout the Army will also use this manual.Commanders, staffs, and subordinates ensure their decisions and actions comply with applicable U.S., international, and, in some cases, host-nation laws and regulations. Commanders at all levels ensure their Soldiers operate in accordance with the law of war and the rules of engagement. (See FM 27-10).
