The Body in Asia Bryan S. Turner, Yangwen Zheng, 2009 The past few decades have seen growing interest in the study of the body. However, the increasing number of exciting and influential publications has primarily, if not exclusively, focused on the body in Western cultures. The various works produced by Asian scholars remain largely unknown to Western academic debates even though Asia is home to a host of rich body cultures and religions. The peoples of Asia have experienced colonization, decolonization, and now globalization, all of which make the 'body in Asia' a rewarding field of research. This unique volume brings together a number of scholars who work on East, Southeast and South Asia and presents original and cutting edge research on the body in various Asian cultures.

International Relations of Asia David Shambaugh, Michael Yahuda, 2014-03-13 As the world's most dynamic region, Asia embodies explosive economic growth, diverse political systems, vibrant societies, modernizing militaries, cutting-edge technologies, rich cultural traditions amid globalization, and strategic competition among major powers. As a result, international relations in Asia are evolving rapidly. In this fully updated and expanded volume, leading scholars from Asia, Europe, and North America offer the most current and definitive analysis available of Asia's regional relationships. They set developments in Asia in theoretical context, assess the role of leading external and regional powers, and consider the importance of subregional actors and linkages. Combining interpretive richness and factual depth, their essays provide an authoritative and stimulating overview. Students of contemporary Asian affairs—new to the field and old hands alike—will find this book an invaluable read. Contributions by: Amitav Acharya, Sebastian Bersick, Nayan Chanda, Ralph A. Cossa, Michael Green, Samuel S. Kim, Edward J. Lincoln, Martha Brill Olcott, T.V. Paul, Phillip C. Saunders, David Shambaugh, Sheldon W. Simon, Scott Snyder, Robert Sutter, Hugh White, and Michael Yahuda

By More Than Providence Michael J. Green, 2017-03-21 Soon after the American Revolution, certain of the founders began to recognize the strategic significance of Asia and the Pacific and the vast material and cultural resources at stake there. Over the coming generations, the United States continued to ask how best to expand trade with the region and whether to partner with China, at the center of the continent, or Japan, looking toward the Pacific. Where should the United States draw its defensive line, and how should it export democratic principles? In a history that spans the eighteenth century to the present, Michael J. Green follows the development of U.S. strategic thinking toward East Asia, identifying recurring themes in American statecraft that reflect the nation's political philosophy and material realities. Drawing on archives, interviews, and his own experience in the Pentagon and White House, Green finds one overarching concern driving U.S. policy toward East Asia: a fear that a rival power might use the Pacific to isolate and threaten the United States and prevent the ocean from becoming a conduit for the westward free flow of trade, values, and forward defense. *By More Than Providence* works through these problems from the perspective of history's major strategists and statesmen, from Thomas Jefferson to Alfred Thayer Mahan and Henry Kissinger. It records the fate of their ideas as they collided with the realities of the Far East and adds clarity to America's stakes in the region, especially when compared with those of Europe and the Middle East.

Narratives of Diaspora W. Lim, 2013-12-17 Chinese American authors often find it necessary to represent Asian history in their literary works. Tracing the development of the literary production of Maxine Hong Kingston, Amy Tan, Lisa See, and Russell Leong, among others, this book captures the effects of international politics and globalization on Chinese American diasporic consciousness.

The United States and Asia Robert G. Sutter, 2019-11-15 Now in a fully revised and updated edition, this cogent book provides an overview of the historical context and enduring patterns of U.S. relations with Asia. Noted scholar Robert G. Sutter offers a balanced analysis of post-Cold War dynamics in Asia, which involve interrelated questions of security, economics, national identity, and regional institution building. He demonstrates how these critical concerns manifest a complex mix of realist, liberal, and constructivist tendencies that define the regional order. He describes how the United States has responded to Asia's growing strength and importance while at the same time trying to maintain its leading position as an Asian power despite China's rising influence. Considering the most important transition in American policy toward Asia since the end of the Cold War, Sutter assesses the growing U.S.-China rivalry that now dominates both regional dynamics in the Asia-Pacific and U.S. policy in the region.

Trade and Regional Integration in South Asia Selim Raihan, Prabir De, 2020-04-27 Gathering contributions from leading academics and international trade experts from South Asia, this book is dedicated to the late Dr. Saman Kelegama, whose untimely death in June 2017 left a huge void in the field of regional economic cooperation. Keeping in mind his enduring legacy regarding regional cooperation in South Asia, it covers issues related to the challenges of deeper regional integration in South Asia and proposes strategies to address these challenges. It also offers an up-to-date, rigorous academic analysis of various issues related to low intra-regional trade in South Asia; prevalence of tariff barriers; incidence of a range of non-tariff measures; challenges of weak-trade-related infrastructure and the need for trade facilitation; the political economics of regional integration, highlighting how bilateral political relations affect the integration process; low level of intra-regional investment; South Asia's pattern of integration with the global and regional value chains; pattern and dominance of informal trade; and alternative regional integration initiatives in South Asia, such as the bilateral, regional, and sub-regional trade agreements within and countries outside this region. Intended primarily for researchers and students of international trade, and policymakers from South Asia and beyond, the book is also a valuable supplementary reference resource for researchers and students. Furthermore, the pragmatic analysis of the policy options presented offers guidance for policymakers in South Asia wanting to implement effective policies and strategies for deeper regional integration.

Researching Higher Education in Asia Jisun Jung, Hugo Horta, Akiyoshi Yonezawa, 2017-09-05 This book discusses higher education research as a field of study in Asia. It traces the evolution of research in the field of higher education in several Asian countries, and shares ideas about the evolving higher education research communities in Asia. It also identifies common and dissimilar challenges across national communities, providing researchers and policymakers essential new insights into the relevance of a greater regional articulation of national higher education research communities, and their further integration into and contribution to the international higher education research community as a whole.

Regional Security Structures in Asia Ashok Kapur, 2018-10-24 Kapur argues that explanations of international relations in Asia in the post-Second World War period have relied too much on the Cold War as a key explanatory factor, and have not given enough emphasis to the useful concepts of 'regional power formation', 'conflict

formation' and 'conflict resolution'. The author outlines these concepts and goes on to elaborate on them, and to apply them to three key Asian regions - northeast, southeast, and south Asia - discussing practical strategic issues in an historical perspective and arguing that these concepts, and other concepts which he discusses, are extremely helpful in making sense of the complex pattern of international relations in Asia.

The Social Sciences in the Asian Century Carol Johnson,Vera Mackie,Tessa Morris-Suzuki,2015-09-30 In this collection of essays, we reflect on what it means to practise the social sciences in the twenty-first century. The book brings together leading social scientists from the Asia-Pacific region. We argue for the benefit of dialogue between the diverse theories and methods of social sciences in the region, the role of the social sciences in addressing real-world problems, the need to transcend national boundaries in addressing regional problems, and the challenges for an increasingly globalised higher education sector in the twenty-first century. The chapters are a combination of theoretical reflections and locally focused case studies of processes that are embedded in global dynamics and the changing geopolitics of knowledge. In an increasingly connected world, these reflections will be of global relevance

Strategy in Asia Thomas Mahnken,Dan Blumenthal,2014-10-15 Some of the United States' greatest challenges over the coming decades are likely to emanate from the Asia-Pacific region. China and India are rising and Militant Islam continues to take root in Pakistan, while nuclear proliferation threatens to continue in fits and starts. If America is to meet these challenges comprehensively, strategists will have to learn more about Asia, and Asian scholars, policymakers, and analysts will need to understand better the enduring and timeless principles of strategy. Based on the premise therefore that the increasing strategic weight of the Asia-Pacific region warrants greater attention from both scholars and practitioners alike, *Strategy in Asia: The Past, Present, and Future of Regional Security* aims to marry the fields of strategic studies and Asian studies in order to help academics and practitioners to begin addressing these challenges. The book uses the lenses of geography, culture, and economics to examine in depth the strategic context that Asia presents to the major nations of the region—including the U.S. as a Pacific nation—and the strategic scenarios that may well play out in the region in the near future. Specific attention is paid to Asia as a warfighting environment, and to the warfighting traditions and current postures of the major nations.

State Violence in East Asia Narayanan Ganesan,Sung Chull Kim,2013-01-01 The world was watching when footage of the tank man -- the lone Chinese citizen blocking the passage of a column of tanks during the brutal 1989 crackdown on protesters in Beijing's Tiananmen Square -- first appeared in the media. The furtive video is now regarded as an iconic depiction of a government's violence against its own people. Throughout the twentieth century, states across East Asia committed many relatively undocumented atrocities, with victims numbering in the millions. The contributors to this insightful volume analyze many of the most notorious cases, including the Japanese army's Okinawan killings in 1945, Indonesia's anticommunist purge in 1965--1968, Thailand's Red Drum incinerations in 1972--1975, Cambodia's Khmer Rouge massacre in 1975--1978, Korea's Kwangju crackdown in 1980, the Philippines' Mendiola incident in 1987, Myanmar's suppression of the democratic movement in 1988, and China's Tiananmen incident. With in-depth investigation of events that have long been misunderstood or kept hidden from public scrutiny, State Violence in East Asia provides critical insights into the political and cultural dynamics of state-sanctioned violence and discusses ways to prevent it in the future.
