**Snappy Interviews** Christopher Lawson,2008-01-24 The questions in this guide have been selected using this framework: (1) Questions should reflect understanding of concepts (2) Questions should reflect actual hands-on experience (3) Questions should not be based on memorization of arcane names or syntax (4) Questions should reflect issues seen by the majority of DBAs of that skill level. The intent of the questions is that most DBAs, for a given skill level, can successfully answer most of the interview questions. Naturally, no one person could be expected to flawlessly answer all of the senior-level questions. Even the most adept DBAs have some areas of weakness. In order to test the fairness of the questions, I asked numerous DBAs, from different backgrounds and companies, to review the questions.

*Ask the Oracle* Priya Hemenway, Philip Dunn, 2004-03-01 Trying to make sense out of things is just plain difficult. We don't know who we are. We know very little about where we have come from, and we know absolutely nothing about where we are headed. In order to help deal with the choices that continuously face us, the Oracle has emerged. -From *Ask the Oracle* Consulting oracles for answers to life's complex questions has been practiced for centuries. From ancient Egypt, Greece, and Rome to the Far East, Africa, and Europe, a rich tradition has evolved for revealing and interpreting signs to show us the way. Here in America, too, the tradition of seeking answers runs deep. It is from this world reservoir of probing and discovery that *Ask the Oracle: Predicting Answers to Questions of Mind, Heart, and Soul* enlightens our present world with solutions for our puzzling existence. Part one of *Ask the Oracle* provides a brief illustrated account of these ancient practices. Readers gain a sense of the history, prominent sign readers, and the rich Eastern and Western stories that help to explain this powerful phenomenon. The Oracle is a voice that speaks when we are most in need, the text explains. It speaks through many mediums, whispering its secrets to those who unlock the doors behind which its silence is preserved. Part two of the book incorporates a set of 30 accompanying sticks, traditionally one of the simplest forms for consulting the oracle with personal questions. Detailed instructions on throwing the sticks and interpreting their meaning are provided. Directions for reading answers fall into three sections: questions of the mind, heart, and soul. Numerous paintings and drawings, suggestive of nature and Eastern spiritual contemplation, set a tone of peacefulness and reflection for the book. The combination of art and answers will make this a true winner in an increasingly complex and confounding modern world.

Guerrilla Gunsmithing Ragnar Benson,2001-01-01 There may come a time when government restrictions severely limit not only access to firearms but the tools and means to repair and maintain them, or you may someday find yourself in the boondocks with a busted weapon. That's where the guerrilla gunsmith comes in. Ragnar Benson has had experience fixing junk guns in some tough places around the world, and here he shares some innovative ways to patch up, cobble together and otherwise make operational everything from antique rifles still found in remote war zones to modern firearms suffering from appalling abuse. Drawing on lessons and stories from backwoods experts he's worked with under desperate

conditions in Africa, the Philippines, Thailand, Pakistan and beyond, Ragnar tells how to employ last-resort but effective techniques to remove hopelessly stuck rounds and other barrel obstructions, straighten bent barrels, replace lost parts, smooth out dented magazines, make repairs to some pretty hopeless stocks, scrounge up workable ammo and more. These are last-ditch, do-it-yourself methods, but they may be all you'll have to fall back on deep in the bush or with your back to the wall, when the only things between you and the enemy are a rifle and the know-how to make it work.

**SQL Tuning** Dan Tow,2003-11-19 A poorly performing database application not only costs users time, but also has an impact on other applications running on the same computer or the same network. SQL Tuning provides an essential next step for SQL developers and database administrators who want to extend their SQL tuning expertise and get the most from their database applications. There are two basic issues to focus on when tuning SQL: how to find and interpret the execution plan of an SQL statement and how to change SQL to get a specific alternate execution plan. SQL Tuning provides answers to these questions and addresses a third issue that's even more important: how to find the optimal execution plan for the query to use. Author Dan Tow outlines a timesaving method he's developed for finding the optimum execution plan--rapidly and systematically--regardless of the complexity of the SQL or the database platform being used. You'll learn how to understand and control SQL execution plans and how to diagram SQL queries to deduce the best execution plan for a query. Key chapters in the book include exercises to reinforce the concepts you've learned. SQL Tuning concludes by addressing special concerns and unique solutions to unsolvable problems. Whether you are a programmer who develops SQL-based applications or a database administrator or other who troubleshoots poorly tuned applications, SQL Tuning will arm you with a reliable and deterministic method for tuning your SQL queries to gain optimal performance.

**Intelligent Virtual Agents** Zsófia Ruttkay, Michael Kipp, Anton Nijholt, Hannes Högni Vilhjálmsson, 2009-09-03 Welcome to the proceedings of the 9th International Conference on Intelligent Virtual Agents, held September 14–16, 2009 in Amsterdam, The Netherlands. Intelligent virtual agents (IVAs) are interactive characters that exhibit human-like qualities and communicate with humans or with each other using natural human modalities such as speech and gesture. They are capable of real-time perception, cognition and action, allowing them to participate in a dynamic physical and social environment. IVA is an interdisciplinary annual conference and the main forum for presenting research on modeling, developing and evaluating IVAs with a focus on communicative abilities and social behavior. The development of IVAs requires expertise in multimodal interaction and several AI fields such as cognitive modeling, planning, vision and natural language processing. Computational models are typically based on experimental studies and theories of human-human and human-robot interaction; conversely, IVA technology may provide interesting lessons for these fields. The realization of engaging IVAs is a challenging task, so reusable modules and tools are of great value. The fields of application range from robot assistants, social simulation and tutoring to games and artistic exploration.
