**Red Moon** David Michaels,Daniel Brenton,2007-09 July 13, 1969. Three days before Apollo 11 lifts off from Cape Canaveral, the Soviet Union launches Luna 15, a rocket carrying the lunar lander, Firebird. They later claim it was a failed robotic probe, concealing a final attempt at beating America in the moon race and sealing the fate of its lone occupant, Grigor Belinsky, a cosmonaut blackmailed into flying the one-way mission. July, 2019. A multinational mission lands on the moon's Sea of Crises. American astronaut Janet Luckman leads a team in search of the Mother Lode: lunar ice, laced with Helium-3-a desperately needed energy source. The future of humanity rides on Luckman's success. Luckman discovers the Firebird and recovers its flight log, but the body of its mystery cosmonaut (Belinsky) is missing. Facing a 51 hour deadline, the dangerous lunar environment and a traitorous crew member bent on murder, she struggles to find the Mother Lode and uncover Belinsky's fate. A firestorm erupts on Earth as both American and Russian authorities attempt to hide the truth about Firebird. As renowned scientist, Milo Jefferson, investigates the Firebird mystery in Moscow, he finds himself in a hall of mirrors created by the sinister genius leading Russia's new Tsarist government: Mikhail Rabikoff. Rabikoff knows that the revelation of Belinsky's fate could topple his regime and will risk the fate of humanity in his attempt to elude Jefferson's inquiries and destroy the truth.

*Archaeo-Astronometria* Dean Clarke,2008-10-23 There have been many books on the origin of astronomy some good and some very poorly address the issues of ancient mans interests in the stars. The ancient Sumer and Egyptian notions of music mostly confirms how ancient this notion is in their chorded progressions of tone. This notion is more an Upper Paleolithic celestial idea. In a sense man during this time man was beginning to have a

concept of north, south, east and west in spatial terms. It involves the curvature of the ribs of Nut the Egyptian Sky Goddess as a ribbed vaulted sky, and sometimes in a horizon sense of a bowing arch of a stars path, or the curve of a bone in the stars moving path. The half way point of this fall for say our Nut, Adam and Eve would thus be about 27,000 BC which falls in a significant period Ice Age re-emergence and a deserts expanding in equator regions. These are only a small part of what had to be addressed in origins of night sky studies. The point being this piece as fake or not is that the components of the animals, man, plants and mans artifacts were very early on displayed. We might ask in such a condition what was their night sky? If we look at all of these constellations they fall below the Celestial Equator in the South Pole region mostly. It would seem that all these birds to them being placed in the night sky like the stars and as they watched what directions the birds along with stars as to where they went in order to ascertain their relations to dusk or dawn night sky. What caused the South Africa plight of 80,000 BC? The Antarctica had been growing ice forms from 170,000 BC to 80,000 BC towards the north, and then around 70,000 BC there seemed to be a melting trend back south. In an astronomy sense we can thank him for larger game entering in the pantheon of the constellations, or the leaf, otter, and some constellations lost to time like the mammoths. What does this have to do with constellations, taboos, or the advent of Cro-Magnon man well in the depictions of constellation images? Slowly from east to west the stars move, but then it did not take man not long after 70,000 BC to note that some planets or stars seemed to move retrograde in the night sky? This book address what ideas did they show or have before or after these earth changes. As ideas such as: Maybe, it was a lasso constellation for some animals capture as a God of Capture. And, Somewhere around the time of 50,000 BC in the region of northern England to the region above the Black Sea there occurred a melting phase between the ice ages and cultures

began to spread. The evidence of this is found by different locations in Europe and Central Europe of the use of rock shadows, stars noted by hands in movement, and certain hand symbols by star images or dots as stars not just stab marks. Ironical again that Man beside Woman on the pole treetop does not have strong reminders of the Adam-Eve Tree and the Serpent as maybe Draco? The symbol anciently always shows the snake at the foot of the tree or ascended the tree at the apex of the trunk which if astronomy wise would mean an ascended constellation to the Zenith or the Pole! Draco thus deposed Adam and Eve from their own constellation garden and domain by it ascending as an ancient Pole Axis Mundi? Thus the smoke screen really is a tie between this local area of France and Late Paleolithic Man's ideas of that region in the night sky of a certain year or month period of hunting. Although we have jumped forward in the time of ancient astronomy beginnings in a way really in this sense we have not. To the real beginnings of little known ancient astronomy.

*Astrotheurgy* Samael Aun Weor, 2007 This edition contains three books in its covers: Zodiacal Course, Esoteric Treatise of Hermetic Astrology and The Manual of Practical Magic. In the first two books, Samael Aun Weor gives a complete discourse on the nature of Astrology. In today's world, the true nature and application of this science has been forgotten completely. In these works, Samael Aun Weor sheds the light of wisdom upon a science that is as ancient as the universe. In the third book, Samael Aun Weor gives the secrets of Theurgy, White Magic, which is the science of influencing nature's phenomena in the internal and external worlds under the guidance of Divine Will and Intelligence. The planets move, evolve and progress within the consciousness. The sidereal temples are within the

consciousness. The human being is a zodiac and the zodiacal belt is within the consciousness. The ten Sephiroth of Kabbalah are the solar system. The seven inferior Sephiroth are the seven planets, and the crown formed by Kether, Chokmah and Binah, are the triune spiritual sun. These ten Sephiroth are within us and we must learn to manipulate them. We must learn how to transfer ourselves to the different stars in order to know the horoscopes of people. Conversing with the sidereal Gods, we will know our horoscope without the need for the much-boasted about arithmetic astrology. Arithmetic astrology was for the Black Age. The age of Astro-Theurgy has now arrived!

*Essays on the Foundations of Astrology* Charles E.O.

Carter, 2010-05 Charles Carter (1887-1968) wrote this book in London during World War II. It was his first book in more than a dozen years. In this book, Carter turns his attention to fundamentals. Why the planets are what they are. How the Sun differs from the Moon. How Jupiter and Mercury are interrelated. Having had his fill of aspects in terms of the planets, in this book Carter tells us of aspects in terms of signs and the elements they represent. A planet in a fire sign, in square to a planet in an earth sign, Carter says, is an obviously difficult combination: Fire consumes earth, or, earth smothers fire. On the other hand, air/water squares are much less stressful. Carter was particularly fascinated by the nativities of Benito Mussolini and Adolf Hitler, his contemporaries. Charts for both men are given. Mussolini he declares to be a bombastic Italian dictator, but Hitler remained a puzzle. \_\_\_\_\_ Charles E.O. Carter, one of the leading astrologers of the 20th century, was President of the Astrological Lodge at the Theosophical Society from 1920 to 1952. He was first Principal of the Faculty of Astrological Studies, which he helped found in 1948. He edited *The Astrologer's Quarterly* from 1926 until 1959. *Essays on the Foundations of Astrology* was first published in 1947.
