Precambrian in Younger Fold Belts Vladim?r

Zoubek,1988-09-20 The first book to survey structure and development of the Precambrian basement in the Central and West European Variscan Belt, and in the Carpathian and Balkan mountains. Stratigraphy, lithology, tectonics, petrology, volcanism, metamorphism, plutonism, metallogeny, geochemistry, geochronology, and paleontology are combined to create a comprehensive and complex picture of the Precambrian basement in these younger fold belts. Stresses the stratigraphic viewpoint for research into Precambrian complexes, even when it is difficult to recognize in the Precambrian polystructural and polymetamorphic basement. Aeons and eras are correlated using the standard global geochronologic scale and lithostratigraphic units have been used for further subdivision.

Activity-Based Cost Management Gary Cokins,2001-10-08

Proven strategy for reducing production and operating costs while increasing profits As the growth of the Internet shifts power to consumers, the pressure on companies to keep prices low will continue to mount. Increasingly corporations are relying on margin management and supply chain management as a means of keeping prices low while raising profits. Activity-based costing and management (ABC/M) data is key to succeeding in both these critical management strategies. This book explains how executives can effectively use the information furnished by cutting-edge ABC/M systems. The author, an acknowledged expert in the field, clearly defines the ABC/M system and explains how to use the information it provides for best results. He provides a rational framework for understanding the fifteen key defining characteristics of ABC/M and arms readers with an ABC/M Readiness Assessment test along with extremely user-friendly exhibits.

On the Balance of Trade David Hume,2015-12-16 David

Hume (7 May 1711- 25 August 1776) was a Scottish philosopher, historian, economist, and essayist, known especially for his philosophical empiricism and skepticism. He is regarded as one of the most important figures in the history of Western philosophy and the Scottish Enlightenment. Hume is often grouped with John Locke, George Berkeley, and a handful of others as a British Empiricist. Beginning with his *A Treatise of Human Nature* (1739), Hume strove to create a total naturalistic science of man that examined the psychological basis of human nature. In stark opposition to the rationalists who preceded him, most notably Descartes, he concluded that desire rather than reason governed human behaviour, saying: Reason is, and ought only to be the slave of the passions. A prominent figure in the skeptical philosophical tradition and a strong empiricist, he argued against the existence of innate ideas, concluding instead that humans have knowledge only of things they directly experience. Thus he divides perceptions between strong and lively impressions or direct sensations and fainter ideas, which are copied from impressions. He developed the position that mental behaviour is governed by custom; our use of induction, for example, is justified only by our idea of the constant conjunction of causes and effects. Hume held notoriously ambiguous views of Christianity, but he famously challenged the argument from design in his *Dialogues Concerning Natural Religion* (1779).
