More&More (A Guide to the Harmonized System) Marina Zurkow, 2016 More&More is an art and research project that explores the language and mechanics of global trade, container shipping, and the exchange of goods. It questions a mercantile structure that by necessity disallows the presence of ocean as a real space in order to flatten the world into a Pangaea of capital. The project is presented in two volumes, released in conjunction with an exhibition of Marina Zurkow's work (with collaborators Sarah Rothberg, Surya Mattu, and others) at bitforms gallery in New York City in February 2016. This book, *More&More (A Guide to the Harmonized System)*, is an experimental brick of a book that intervenes in the Harmonized Commodity Description and Coding System (also known as the HS Code). The HS Code is the internationally accepted standard of product classification, which codifies the way nations conduct import/export. All legal trade products (and illegal ones that find loopholes) are shipped using this system. *More&More (A Guide to the Harmonized System)* lists the astonishing variety of items that are shipped around the world, and includes instructions for using the code to ship items (both legally and illegally). It also includes poetic, personal, and scholarly annotations by Stacy Alaimo, Heather Davis, Kathleen Forde, Dylan Gauthier, Elena Glasberg, Calliope Mathios, Steve Mentz, Astrida Neimanis, Chris Piuma, Elspeth Probyn, Sarah Rothberg, Phil Steinberg, Rita Wong, and Marina Zurkow.

North American Industry Classification System (NAICS) Reprint United States 2017 Edition Brian Greul, 2021-01-17
The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy. It is a joint work between the United States, Canada, and Mexico that allows a high level of comparability between the

countries. The NAICS officially replaced the SIC (Standard Industrial Classification) system in 1997. The publisher has included the SBA Size Standards Table as an appendix at the back of this book to assist users of the data. Financial Statistics of Major U.S. Investor-Owned

Electric Utilities 1996 ,2001 The Financial Statistics of Major US Investor-Owned Electric Utilities publication presents summary and detailed financial accounting data on the investor-owned electric utilities. The objective of the publication is to provide Federal and State governments, industry, and the general public with current and historical data that can be used for making policy and decisions relating to investor-owned electric utility issues. The US electric power industry is a combination of electric utilities (investor-owned, publicly owned, Federal, and cooperatives) and nonutility power producers. Investor-owned electric utilities account for over three-fourths of electric sales and revenue. Historically, the investor-owned electric utilities have served the large consolidated markets. There is substantial diversity among the investor-owned electric utilities in terms of services, size, fuel usage, and prices charged. Most investor-owned electric utilities generate, transmit, and distribute electric power. Investor-owned electric utilities operate in all States except Nebraska; Hawaii is the only State in which all electricity is supplied by investor-owned electric utilities. 5 figs., 57 tabs.

The Underground Railroad Mary Ellen

Snodgrass,2015-03-26 The culmination of years of research in dozens of archives and libraries, this fascinating encyclopedia provides an unprecedented look at the network known as the Underground Railroad - that mysterious system of individuals and organizations that helped slaves escape the American South to freedom during the years before the Civil War. In operation as early as the 1500s and reaching its peak with the abolitionist movement of the antebellum period, the Underground Railroad saved countless lives and helped alter the course of American history. This is the most complete reference on the Underground Railroad ever published. It includes full coverage of the Railroad in both the United States and Canada, which was the ultimate destination of many of the escaping slaves. The Underground Railroad: An Encyclopedia of People, Places, and Operations explores the people, places, writings, laws, and organizations that made this network possible. More than 1,500 entries detail the families and personalities involved in the operation, and sidebars extract primary source materials for longer entries. This encyclopedia features extensive supporting materials, including maps with actual Underground Railroad escape routes, photos, a chronology, genealogies of those involved in the operation, a listing of Underground Railroad operatives by state or Canadian province, a passenger list of escaping slaves, and primary and secondary source bibliographies.

Bringing Climate Change Into Natural Resource Management

Linda Joyce,2008 This workshop furthers the dialogue among scientists, land managers, landowners, interested stakeholders & the public about how individuals are addressing climate change in natural resource management. Discussions illustrated the complexity of global climate change & the need for managers to consider how the impacts of climate change will unfold across regional & local landscapes. The workshop offered examples of how managers are already responding to those aspects of the global climate change that they can see or perceive. While no comprehensive solutions emerged, there was an appreciation that policy complexity may exceed the science complexity but that eventually the accumulation of local actions will shape the future.
