Securities Markets Richard J. Hillman (au),2005-11 In early 2001, U.S. stock & option markets began quoting prices in decimal increments rather than fractions of a dollar. At the same time, the minimum price increment, or tick size, was reduced to a penny on the stock markets & to 10¢ & 5¢ on the option markets. Although many believe that decimal pricing has benefited small individual (retail) investors, concerns have been raised that the smaller tick sizes have made trading more challenging & costly for large institutional investors, including mutual funds & pension plans. The financial livelihood of market intermediaries may also have been negatively affected by the lower ticks. This report assesses the effect of decimal pricing on retail & institutional investors & on market intermediaries. Charts.

A Modern Approach to Graham and Dodd Investing Thomas P. Au,2004-04-26 An updated approach to classic security analysis The principles of value investing outlined by Graham and Dodd in the 1940s continues to be used today by individuals and companies who face challenging investment decisions. A Modern Approach to Graham and Dodd Investing examines the classic Graham and Dodd approach to valuation and updates it for the twenty-first century. Thomas Au, a credentialed analyst with a leading insurance company and an ex-Value Line analyst, reworks the basics of value investing from net present value, financial statement analysis, and return on capital to return and leverage, asset allocation, and diversification. Through case studies and real-time analysis, A Modern Approach to Graham and Dodd Investing presents readers with examples that will make analysis and portfolio theory more relevant and powerful. Thomas P. Au (Hartford, CT) is a Vice President and Portfolio Manager for the investment arm of a large insurance and

healthcare provider. His specialty is emerging and international markets. He received his BA, cum laude, with a double major in economics and history, from Yale University, and an MBA in finance from New York University.

Stock Market Strategies that Work in Australia Matthew Brooks, Paul Nojin, 2010

Investors select shares in a number of ways. Some buy for ?income? and choose shares that pay good dividends; others try to buy ?cheap? and purchase stocks with low P/E ratios; some only buy Top 200 stocks while others go for the small caps. Wouldn't it be great to test these strategies and find out which really work and really work in Australia? Inspired by James O'Shaughnessy's ground-breaking research, written up in his best-selling book, *What Works on Wall Street*, local authors Matthew Brooks and Paul Nojin decided to test the performance of investing strategies in Australia to find the ultimate share investing strategy. Using all the data available on Australian stocks they conducted their own extensive quantitative analysis over the period of 1995 to 2009. In *Stock Market Strategies That Work in Australia* the authors have done all the hard work for investors. They communicate the results of their research in easy- to-understand language and round off each chapter with a ?What to Remember? wrap up. ?What to Remember? about the whole book can be encapsulated below: This simple quantitative strategy beat the All Ords by 11.03% per year- You don't need to be a stock market expert or spend countless hours analysing financial statements to dramatically improve your chances of beating the market over the long term- What works in the US does NOT always work in Australia- These results possible from quantitative investing, are truly remarkable. Authors Matthew Brooks and Paul Nojin are pioneers of quantitative investing in Australia. Matthew Brooks has a Masters in

Economics with Honours from Sydney University and has worked as an investment strategist and economist with leading institutions. Paul Nojin studied economics at university before starting his career with Bankers Trust. Together they produceÂ The Super Investor Report www.TheSuperInvestor.com.au which has helped thousands of Australian investors achieve a better result in the share market.

The Media and Communications in Australia Stuart Cunningham, Sue Turnbull, 2020-07-16 Traditional media are being reshaped by digital technologies. The funding model for quality journalism has been undermined by the drift of advertising online, demarcations between different forms of media are rapidly fading, and audiences have fragmented. We can catch up with our favourite TV show on a tablet, social media can be more important than mainstream radio in a crisis, and organisations large and small have become publishers in their own right on apps. Nevertheless mainstream media remain powerful. *The Media and Communications in Australia* offers a systematic introduction to this dynamic field. Fully updated and revised to take account of recent developments, this fourth edition outlines the key media industries and explains how communications technologies are impacting on them. It provides a thorough overview of the main approaches taken in studying the media, and includes an expanded 'issues' section with new chapters on social media, gaming, apps, the environment, media regulation, ethics and privacy. With contributions from some of Australia's best researchers and teachers in the field, *The Media and Communications in Australia* remains the most comprehensive and reliable introduction to media and communications available. It is an ideal student text, and a reference for teachers of media and anyone interested in this influential industry.

Creativity and Creative Industries in Regional Australia Phillip McIntyre,Susan Kerrigan,Janet Fulton,Evelyn King,Claire Williams,2023-12-26 This book explores the relationship between creativity, creative people, and creative industries in regional Australia through examining lived experience. The authors draw on more than 100 qualitative interviews with creative workers, and contextualise this creative work within the broader social and cultural structures of Australia's Hunter region (located north of Sydney, in New South Wales). An invaluable resource for anyone interested in creative ecosystems as well as creativity and innovation, this book is an ethnographic study using the Hunter region as a case connected to the national and global networks that typify the creative industry.
