**Radio Audiences and Participation in the Age of Network Society** Tiziano Bonini, Belén Monclús, 2014-12-05 This book maps, describes and further explores all contemporary forms of interaction between radio and its public, with a specific focus on those forms of content co-creation that link producers and listeners. Each essay will analyze one or more case studies, piecing together a map of emerging co-creation practices in contemporary radio. Contributors describe the rise of a new class of radio listeners: the networked ones. Networked audiences are made up of listeners that are not only able to produce written and audio content for radio and co-create along with the radio producers (even definitively bypassing the central hub of the radio station, by making podcasts), but that also produce social data, calling for an alternative rating system, which is less focused on attention and more on other sources, such as engagement, sentiment, affection, reputation, and influence. What are the economic and political consequences of this paradigm shift? How are radio audiences perceived by radio producers in this new radioscope? What's the true value of radio audiences in this new frame? How do radio audiences take part in the radio flow in this age? Are audiences' interactions and co-creations overrated or underrated by radio producers? To what extent listeners' generated content can be considered a form of participation or free labour exploitation? What's the role of community radio in this new context? These are some of the many issues that this book aims to explore. **Mediactive** Dan Gillmor, 2010 We're in an age of information overload, and too much of what we watch, hear and read is mistaken, deceitful or even dangerous. Yet you and I can take control and make media serve us -- all of us -- by being active consumers and participants. Here's how. With a Foreword by Clay Shirky Praise for Mediactive: Dan Gillmor has thought more deeply, more usefully, and over a longer period of time about the next stages of media evolution than just about anyone else. In Mediactive, he puts the results of his ideas and experiments together in a guide full of practical tips and longer-term inspirations for everyone affected by rapid changes in the news ecology. This book is a very worthy successor to his influential We the Media. --James Fallows, Atlantic Magazine, author of Postcards from Tomorrow Square and Breaking the News Dan's book helps us understand when the news we read is reliable and trustworthy, and how to determine when what we're reading is intended to deceive. A trustworthy press is required for the survival of a democracy, and we really need this book right now. --Craig Newmark, founder of craigslist A master-class in media-literacy for the 21st century, operating on all scales from the tiniest details of navigating wiki software all the way up to sensible and smart suggestions for reforming law and policy to make the news better and fairer. Gillmor's a reporter's reporter for the information age, Mediactive made me want to stand up and salute. --Cory Doctorow, co-editor/owner, Boing Boing; author of For the Win As the lines between professional and citizen journalists continue to blur, Mediactive provides a useful roadmap to help us become savvier consumers and creators alike. -- Steve Case, chairman and CEO of Revolution and co-founder of America Online It's all true - at least to someone. And that's the problem in a hypermediated world where everyone and anyone can represent his own reality. Gillmor attacks the problem of representation and reality head on, demanding we become media-active users of our emerging media, instead of passive consumers. If this book doesn't get you out of Facebook and back on the real Internet, nothing will. --Douglas Rushkoff, author of Program or Be Programmed: Ten Commands for a Digital Age An important book showing people how to swim rather than drown in today's torrent of information. Dan Gillmor lives on the front line of digital information - there's no-one better

to help us understand the risks and opportunities or help us ask the right questions. --Richard Sambrook, Global Vice Chairman and Chief Content Officer at Edelman, and former BBC Director of Global News With the future of journalism and democracy in peril, Mediactive comes along with sage and practical advice at a crucial time. Dan Gillmor, pioneering journalist and teacher of journalists, offers a practical guide to citizens who now need to become active producers as well as critical consumers of media. Read this book right away, buy one for a friend and another one for a student, and then put Gillmor's advice into action. --Howard Rheingold, author of the Smart Mobs and other books about our digital future Through common-sense guidelines and well-chosen examples, Gillmor shows how anyone can navigate the half-truths, exaggerations and outright falsehoods that permeate today's media environment and ferret out what is true and important. As Gillmor writes, 'When we have unlimited sources of information, and when so much of what comes at us is questionable, our lives get more challenging. They also get more interesting.' --Dan Kennedy, assistant professor of journalism at Northeastern University, former Boston Phoenix media critic, and author of the Media Nation blog at [www.dankennedy.net](http://www.dankennedy.net)

*The Power of Dyslexic Thinking* Robert W. Langston, 2009-10 In *The Power of Dyslexic Thinking*, Robert Langston shares the inspirational stories of people who overcame the hurdles of living with dyslexia to become influential business and cultural leaders. From Kinko's founder Paul Orfalea to prominent financier Charles Schwab to Pulitzer Prize-winning cartoonist Mike Peters, Langston profiles some of the biggest players in the business world and elsewhere to paint amazing portraits of courage and dedication. Through both research and personal experience, Langston has come to believe that dyslexia is a condition that does not need curing, but rather a greater understanding of the different capabilities and skills it can provide those who have it. He hopes that understanding more about the creative and intuitive benefits of dyslexia will allow educators and parents, as well as dyslexic children, to see dyslexia not as a disability, but as a gift.

*The Four Dragons* Damo Mitchell, 2014-08-21 Within the context of a larger discussion of Dao Yin, Damo Mitchell teaches and explains the Dragon Dao Yin exercises, a set of four short sequences designed to work with the subtle energies of the spine and lead pathogenic energies out of the body. More 'Yang' in nature than Qi Gong, Dao Yin focuses on outwards movements and strong internal cleansing. The book highlights this important distinction and covers the theory, history and development of Dao Yin exercises, as well as the relationship between Chinese medical theory and Dao Yin training. One chapter is devoted to problems related to stagnation and the flow of Qi, and explains the different causes and forms of stagnation. Later chapters look at breathing patterns and the extension of Yi, opening the joints, and rotating the bones and spine. Damo Mitchell also discusses stillness as the source of movement, the philosophical significance of the Dragon and the pearl, and the means of hardwiring Dao Yin exercises into the energetic body. Central to the discussion is the concept of the spine, and how to wake it up. For the first time in the English language, the Dragon exercises - Awakening, Swimming, Soaring and Drunken - are described in detail, with photographs and step-by-step instructions on each of the exercises as individual therapeutic exercises and as a form.
