This book covers all the steps needed to make a podcast using a Mac, iPhone, iPad, or iPod touch. Create your own podcast—or improve an existing podcast—using your Mac, iPhone, iPad, or iPod touch! This book walks you through every step of the process, from choosing equipment and software through recording, editing, mixing, and polishing. Once your audio is in the can, you'll find real-world advice and steps for encoding and publishing your episodes. This book replaces and updates Andy's earlier title, *Take Control of Podcasting on the Mac*, with up-to-date instructions and complete coverage of iOS and iPadOS devices. The book includes more than dozen sound samples from various combinations of mics, positions, filters, and processing, so that you can hear the differences before you buy any special gear. *Take Control of Podcasting* provides the help you need for creating podcasts on a Mac, iOS, or iPadOS device:

Apps that are discussed briefly include Amadeus Pro, Ecamm Call Recorder, Fission, Izotope RX Elements, Loopback, Sound Studio, SoundSoap, and The Levelator. Human Language Technology. Challenges of the Information Society Zygmunt Vetulani,Hans Uszkoreit,2009-08-25 Half a centuryago not manypeople had realizedthat a new epoch in the history of homo sapiens had just started. The term “Information Society Age” seems an appropriate name for this epoch. Communication was without a doubt a lever of the conquest of the human race over the rest of the animate world. There is little doubt that the human racebegan when our predecessorsstarted to communicate with each other using language.This highly abstractmeans of communicationwas probably one of the major factors contributing to the evolutionary success of the human race within the animal world. Physically weak and imperfect, humans started to dominate the rest of the world through the creation of communication-based societies where individuals communicated initially to satisfy immediate needs, and then to create, accumulate and process knowledge for future use. The crucial step in the history of humanity was the invention of writing. It is worth noting that writing is a human invention, not a phenomenon resulting from natural evolution. Humans invented writing as a technique for recording speech as well as for storing and facilitating the dissemination of knowledge across the world. Humans continue to be born illiterate, and therefore teaching and conscious supervised learning is necessary to maintain this basic social skill.
