**The Handbook of Emergent Technologies in Social Research** Sharlene Nagy Hesse-Biber,2011-03-03 Emergent technologies are pushing the boundaries of how both qualitative and quantitative researchers practice their craft, and it has become clear these changes are dramatically altering research design, from the questions researchers ask and the ways they collect data, to what they even consider data. Gathering a broad range of new developments in one place, The Handbook of Emergent Technologies in Social Research offers comprehensive, up-to-date thinking on technological innovations. In addition to addressing how to effectively apply new technologies-such as the internet, mobile technologies, geospatial technologies (GPS), and the incorporation of computer-assisted software programs (CAQDAS) to qualitative, quantitative, and mixed-methods approaches to research projects-many chapters provide in-depth examples of practices within both disciplinary and interdisciplinary environments and outside the academic world in multi-media laboratories and

research institutes. Not only an authoritative view of cutting-edge technologies and their applications, the Handbook examines the costs and benefits of utilizing new technologies on the research process, the potential misuse of these techniques for methods practices, and the ethical and moral dimensions of emergent technologies, especially with regard to issues of surveillance and privacy. The Handbook of Emergent Technologies in Social Research is an essential resource for research methods courses in various fields, including the social sciences, education, communications, computer science, and health services, and an indispensable guide for social researchers looking to incorporate emerging technologies into their methods and practice.

**Implementing a crowd-sourced picture archive for Bad Harzburg** Rieke Freund, Jan Philip Rättsch, Franziska Hradilak, Benedikt Vidic, Oliver Heß, Nils Lißner, Hendrik Wölert, Jens Lincke, Tom Beckmann, Robert Hirschfeld, 2023-06-06  
Pictures are a medium that helps make the past tangible and preserve memories. Without context, they are not able to do so. Pictures are brought to life by their associated stories. However, the older pictures become, the fewer contemporary witnesses can tell these stories. Especially for large, analog picture archives, knowledge and memories are spread over many people. This creates several challenges: First, the pictures must be digitized to save them from decaying and make them available to the public. Since a simple listing of all the pictures is confusing, the pictures should be structured accessibly. Second, known information that makes the stories vivid needs to

be added to the pictures. Users should get the opportunity to contribute their knowledge and memories. To make this usable for all interested parties, even for older, less technophile generations, the interface should be intuitive and error-tolerant. The resulting requirements are not covered in their entirety by any existing software solution without losing the intuitive interface or the scalability of the system. Therefore, we have developed our digital picture archive within the scope of a bachelor project in cooperation with the Bad Harzburg-Stiftung. For the implementation of this web application, we use the UI framework React in the frontend, which communicates via a GraphQL interface with the Content Management System Strapi in the backend. The use of this system enables our project partner to create an efficient process from scanning analog pictures to presenting them to visitors in an organized and annotated way. To customize the solution for both picture delivery and information contribution for our target group, we designed prototypes and evaluated them with people from Bad Harzburg. This helped us gain valuable insights into our system's usability and future challenges as well as requirements. Our web application is already being used daily by our project partner. During the project, we still came up with numerous ideas for additional features to further support the exchange of knowledge.

Digital Pharma Marketing Playbook Subba Rao Chaganti, 2022-10-22 Digital Pharma Marketing Playbook is a first-of-its-kind-of book. It is the first and only book that presents 101 cases in digital pharma marketing. These cases show how some of the leading pharmaceutical companies across the world have used digital and social media channels. They are also excellent learning opportunities to all pharma marketing and brand managers, and students of pharmaceutical marketing. Digital transformation is sweeping the world around us. Everything these days has become digital. The ever-increasing rate of adoption of wearable devices and the advent of the internet of things are digitizing more and more of our experience. At the same time, healthcare in general, and the pharmaceutical industry, in particular, have been lagging in adapting to a digital strategy. It is not that the pharma is new to multichannel marketing. The pharmaceutical industry traditionally has been following a multichannel marketing strategy, where most of the channels have been static rather than dynamic. The number of channels has increased significantly due to the internet explosion. Pharma is moving to a multi-stakeholder world, a world in which stakeholders beyond the prescriber are gaining importance. These new influencer groups such as patients, nurses, payers, and regulators are increasingly turning to digital channels for their information needs regarding healthcare. Digital, therefore, plays a vital role in reaching these new audiences. If you want to maximize the impact of your marketing communications, can you afford to ignore the channels that your stakeholders are frequently using? Of course, not. Therefore, the question is not, to digitize or not to digitize, but how soon and how effectively? Why a Digital Pharma Marketing Playbook? Because, a playbook is a one-stop-read or single-source resource for all the essential information that you need on a given sport – in our case, Digital Pharma Marketing. If you can make work more fun and enjoyable it is play! Moreover, when work becomes play, there are no goals that you cannot score! Contents: 1.

Challenging Times! Changing Rules! 2. Digital Revolution 3. Digital Pharma Marketing 4. Social Media Marketing and Pharma 5. Digital Transformation
