Too Fast to Think Chris Lewis,2016-10-03 Our lives are getting faster and faster. We are engulfed in constant distraction from email, social media and our 'always on' work culture. We are too busy, too overloaded with information and too focused on analytical left-brain thinking processes to be creative. Too Fast to Think exposes how our current work practices, media culture and education systems are detrimental to innovation. The speed and noise of modern life is undermining the clarity and quiet that is essential to power individual thought. Our best ideas are often generated when we are free to think diffusely, in an uninterrupted environment, which is why moments of inspiration so often occur in places completely separate to our offices. To reclaim creativity, Too Fast to Think teaches you how to retrain your brain into allowing creative ideas to emerge, before they are shut down by interruption, distraction or the self-doubt of your over-rational brain. This is essential reading for anyone who wants to maximize their creative potential, as well as that of their team. Supported by cutting-edge research from the University of the Arts London and insightful interviews with business leaders, academics, artists, politicians and psychologists, Chris Lewis takes a holistic approach to explain the 8 crucial traits that are inherently linked to creation and innovation.

Signal App Dr. Timothy Zahar,2021-01-17 How do you feel? How do you feel when Twitter, Facebook, Snapchat... turn off the US President Donald Trump's account permanently? I understand that some of you are supportive, some are not interested, and the rest (many people) feel outraged and angry. What are they doing with the President of the United States? The man who truly kept his promise Make America great again We resent not only because that is how to behave in the style of imposing, gagging. It is because that act seriously violates the freedom we worship in the West (And that is the reason why social networks exist). But they broke their promise, patted themselves on the face. They have exceeded their own limits. They engage in politics, expressing their likes and dislikes, not in a neutral position. The behavior of social media platforms must comply with the laws and legal frameworks set by the legislators, not the political views of the company executives. Obviously, when these tech giants shake hands together, they will manipulate everything, and we will be manipulated. It was Facebook and Twitter that controlled, navigated, and manipulated the news surrounding the 2020 US presidential election. All the above shares, each of us see existence before our eyes. But what's behind all of the above? Why did those big techs do that? The answer is... Rights To Private Personal Information On Internet. We are being watched every moment. We have been violated personal privacy when participating in platforms Facebook, Twitter... They have collected the maximum of all the data about us. Sometimes I still tell my friends, Facebook knows you better than you do. So, is there a way for us to escape their influence and manipulation? Yes! We have 2 options.

· Or not join any social networking platform. This is difficult today because our work is tied to social connections. · Or we choose a social networking platform that is committed to respecting our privacy. And don't just end up with commitments, they need to give us the tools to proactively establish their own security. And luckily for you and me, there are platforms now that meet these criteria. That is Singal - A security-proven messaging app by tech giants like Elon Musk. Or even the CEO of Twitter (Jack Dorsey) also publicly uses and encourages people to use Signal. What do you learn more from reading this book? 1. I will show you 7 powerful reasons why you should immediately quit WhatsApp, Facebook Messenger, and switch to Signal immediately. And not only that you will also encourage your friends and colleagues to do the same. I commit to this. 2. I will show you how to install Signal and set up the perfect features to help you keep your personal information secure on the Internet. So that we will not be under surveillance, control and navigate. I will write about personal security on the Internet in the simplest, most popular way that a 7-year-old can understand and share with everyone. Now let us get started, the journey of finding real freedom on social media platforms. Dr. Timothy Zahar
