Telegraph Messenger Boys Gregory J. Downey,2014-04-08 In Telegraph Messenger Boys Gregory J. Downey provides an entirely new perspective on the telegraph system: a communications network that revolutionized human perceptions of time and space. The book goes beyond the advent of the telegraphy and tells a broader story of human interaction with technology and the social and cultural changes it brought about.

The Information Process: A Model and Hierarchy Victor Yang,2015-11-10 In this modern time of the Internet, information is just a click away. While it may be tempting to regard information as an object or an end-product, the acquisition of information is only the start to the process of gaining knowledge. This book proposes and describes the heart model and information hierarchy as a means to explain information as a process of gaining useful knowledge. This provides an effective approach to everyday decision-making and problem solving.

Mechanical and Electrical Equipment for Buildings Walter T. Grondzik,Alison G. Kwok,2014-10-06 The definitive guide to environmental control systems, updated with emerging technology and trends The Interactive Resource Center is an online learning environment where instructors and students can access the tools they need to make efficient use of their time, while reinforcing and assessing their understanding of key concepts for successful understanding of the course. An access card with redemption code for the online Interactive Resource Center is included with all new, print copies or can be purchased separately. (**If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code ISBN: 978111899616-4). The online Interactive Resource Center contains resources tied to the book, such as: Interactive Animations Interactive Self-tests Interactive Flashcards Case Studies Respondus Testbank (instructors only) Instructor's Manual (over 200

pages) including additional resources (Instructors only) Roadmap to the 12th Edition (Instructors only) Student Guide to the Textbook Mechanical and Electrical Equipment for Buildings, Twelfth Edition is the industry standard reference that comprehensively covers all aspects of building systems. With over 2,200 drawings and photographs, the book discusses basic theory, preliminary building design guidelines, and detailed design procedure for buildings of all sizes. The updated twelfth edition includes over 300 new illustrations, plus information on the latest design trends, codes, and technologies, while the companion website offers new interactive features including animations, additional case studies, quizzes, and more. Environmental control systems are the components of a building that keep occupants comfortable and help make the building work. Mechanical and Electrical Equipment for Buildings covers both active controls, like air conditioners and heaters, as well as passive controls like daylighting and natural ventilation. Because these systems comprise the entire energy use and costs of a building's life, the book stresses the importance of sustainability considerations during the design process, by both architects and builders. Authored by two leading green design educators, MEEB provides the most current information on low-energy architecture, including topics like: Context, comfort, and environmental resources Indoor air quality and thermal control Illumination, acoustics, and electricity Fire protection, signal systems, and transportation Occupant comfort and building usability are the most critical factors in the success of a building design, and with environmental concerns mounting, it's becoming more and more important to approach projects from a sustainable perspective from the very beginning. As the definitive guide to environmental control systems for over 75 years, Mechanical and Electrical Equipment for Buildings is a complete resource for students and professionals alike.

Pet-Specific Care for the Veterinary Team Lowell Ackerman, 2021-03-23 A practical guide to identifying risks in veterinary patients and tailoring their care accordingly Pet-specific care refers to a practice philosophy that seeks to proactively provide veterinary care to animals throughout their lives, aiming to keep pets healthy and treat them effectively when disease occurs. Pet-Specific Care for the Veterinary Team offers a practical guide for putting the principles of pet-specific care into action. Using this approach, the veterinary team will identify risks to an individual animal, based on their particular circumstances, and respond to these risks with a program of prevention, early detection, and treatment to improve health outcomes in pets and the satisfaction of their owners. The book combines information on medicine and management, presenting specific guidelines for appropriate medical interventions and material on how to improve the financial health of a veterinary practice in the process. Comprehensive in scope, and with expert contributors from around the world, the book covers pet-specific care prospects, hereditary and non-hereditary considerations, customer service implications, hospital and hospital team roles, and practice management aspects of pet-specific care. It also reviews specific risk factors and explains how to use these factors to determine an action plan for veterinary care. This important book: Offers clinical guidance for accurately assessing risks for each patient Shows how to tailor veterinary care to address a patient's specific risk factors Emphasizes prevention, early detection, and treatment Improves treatment outcomes and provides solutions to keep pets healthy and well Written for veterinarians, technicians and nurses, managers, and customer service representatives, Pet-Specific Care for the Veterinary Team offers a hands-on guide to taking a veterinary practice to the next level of care.

Auto-Movement for Beginners Harry Eilenstein,2021-04-29 Auto-movement, i.e. the non-consciously controlled movements of the body, comprise a large part

of the techniques used in magic: the pendulum, the divining rod, automatic writing, glossolalia (speaking in languages one has not learned), and several forms of telekinesis. Auto-movement also occurs in inconspicuous places such as drawing the right tarot card – which, after all, is not consciously controlled. There are also some forms of auto-movement, where the movement has not been decided by the one who moves, as in sleepwalking, hypnosis, stigmata, possession, etc. ... and in advertising, which also leads people to do something that they have not decided themselves. There are also some collective forms of auto-movement such as the crop circles. Auto-movement is primarily a monitor for the subconscious mind. Since telepathy is an ability of the subconscious mind, auto-movement can also be used for telepathic perception. Correspondingly, auto-movement is also helpful in the use of telekinesis, which is an ability of the subconscious to act. All in all, a closer look at the various forms of automatic, non-consciously controlled movements, as in scrying, results in a much better understanding of the psyche and a more effective approach to magic, as well as some new techniques, such as sending out one's own body, in which one's own body can perform tasks that would not be possible in normal consciousness.
