*Cemeterians* Jack W. Plunkett, 2008 Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

Electronic Consumer Contracts in the Conflict of Laws Zheng Sophia Tang, 2015-10-22 The second edition of this highly recommended work addresses the interaction between conflict of laws, dispute resolution, electronic commerce and consumer contracts. In addition it identifies specific difficulties that conflicts lawyers and

consumer lawyers encounter in electronic commerce and proposes original approaches to balance the conflict of interest between consumers' access to justice and business efficiency. The European Union has played a leading role in this area of law and its initiatives are fully explored. It pays particular attention to the most recent development in collective redress and alternative/online dispute resolution. By adopting multiple research methods, including a comparative study of the EU and US approach; historical analysis of protective conflict of laws; doctrinal analysis of legal provisions and economic analysis of law, it provides the most comprehensive examination of frameworks in cross-border consumer contracts.

*Fundamentals of User-Centered Design* Brian Still, Kate Crane, 2017-08-25 There has been some solid work done in the area of User-Centered Design (UCD) over the last few years. What's been missing is an in-depth, comprehensive textbook that connects UCD to usability and User Experience (UX) principles and practices. This new textbook discusses a theoretical framework in relation to other design theories. It provides a repeatable, practical process for implementation, offering numerous examples, methods, and case studies for support, and it emphasizes best practices in specific environments, including mobile and web applications, print products, as well as hardware.

Problems and Materials on Consumer Law Douglas J. Whaley, 2020-07-30 Problems and Materials on Consumer Law, Ninth Edition

*Cases, Problems, and Materials on Contracts* Douglas J. Whaley, David Horton, 2018-10-01 Buy a new version of this textbook and receive access to the Connected eBook with Study Center on CasebookConnect, including: lifetime access to the online ebook with highlight, annotation, and search capabilities; practice questions from your favorite study aids; an outline tool and other helpful resources. Connected eBooks provide what you need most to be successful in your law school classes. Learn more about Connected eBooks Cases, Problems, and Materials on Contracts is known for pioneering the problem method of law school teaching. A staple in classrooms for decades, it stands out from other texts in the scope of its coverage and its use of short, carefully-constructed Problems to expose students to new concepts, reinforce what they have just learned, and stimulate thought. The Eighth Edition, the first since the passing of Thomas Crandall and the addition of David Horton as co-author, is more accessible than ever. It introduces complicated issues with a clear narrative summary or explicit statement of black-letter law. The cases have been tightly edited for best effect. The book can also be easily adapted to fit various pedagogical needs. Although it starts with "Agreement" and moves to "Consideration," it is also designed for teachers who prefer to begin with "Consideration" or "Remedies." It can be used in courses that both include and exclude sales. Finally, because it is shorter than most other texts in this field, it works in 4-unit, 5-unit, and 6-unit courses. New to the Eighth Edition: Substantial input from a new co-author means that the book contains scores of new cases, Problems, and narrative introductions to issues. Each opinion has been streamlined to enhance readability. Where possible, applicable Restatement of Contracts and Uniform Commercial Code sections have been printed in the text, saving students the cost of buying separate supplements. Professors and students will benefit

from: Coverage of the basics of Contracts Law in a format that allows greater exposure to the legal concepts through the many Problems that fill each chapter alongside the most illustrative cases on point Assessment multiple-choice questions at the end of each chapter that are meatier than such questions in most books, focusing not on the “right answer” so much as on what real attorneys must consider when confronted with the issues presented The entire book’s approach not just to teach rules of law but to train students to be lawyers faced with commercial issues. For example, Problems sometimes ask students whether they would be committing malpractice if they took a certain course of conduct, an issue very much on the mind of actual attorneys but seldom mentioned in law school classrooms.

**The Capital One Story** Mary Curran Hackett, 2020-05-26 What can you learn from the most successful companies in the world? *The Capital One Story* will help you understand and adopt the competitive strategies, workplace culture, and daily business practices that enabled an unlikely credit card startup to revolutionize the credit industry. After twenty-five years in the credit card business, Capital One has earned its place in wallets across the world. When the company's two young founders set out to individualize credit, the financial world thought they were crazy... until it was clear that they weren't. Working in the banking industry, Richard Fairbank and Nigel Morris saw that the one-size-fits all standard that the credit card companies employed was leaving big money on the table. They cracked the code and figured out how to customize the credit card experience by offering personalized designs, credit limits, and rewards, revolutionizing the way the credit card industry operated. Known for their ubiquitous advertising campaigns with A-list talent such as Jennifer Garner and Samuel L. Jackson, the youngest bank in the business was once turned down by every one of their competitors but has since grown to dominate the industry. Through the story of Capital One, you'll learn: How to recognize underserved sections of a market. How

rejection by every company in the business doesn't mean it's time to quit. How to determine what people want and how to get it to them. And how to employ marketing campaigns that will change the way people live.
