Amy Lucas

Astro Ranger William Bourgogne,2021-06-21 One thousand years in the future, humankind has tamed our solar system; and now looks to guard against the threat from emerging extraterrestrial life in nearby deep space. Three amazing ultra-modern space stations have been established at our three closest celestial neighbors: the American station at Proxima Centauri, the French one at Sirius, and the three-mile-long Japanese station at Altair. These make up the defensive Deep Space Triangle, the future frontier for human life. The author is careful to stay true to actual possible science and to keep the unfolding events logical and credible. The result is a fun, adventurous sci fi book that is not too long; and will leave the reader in a happy mood!
