Dictionary of Aeronautical Terms Dale Crane,2006 Aviation is an industry full of terms, acronyms and technical language. This book helps users understand all the words, abbreviations, phrases, and disciplines of aviation. The most complete collection of aviation terminology available, this Fourth Edition by industry-expert Dale Crane explains as well as defines more than 10,000 terms and includes nearly 500 illustrations to further define and aid visual recognition. Appendices include useful lists and tables, such as the periodic table of elements, phonetic alphabet, Morse code, and an expanded list of aviation acronyms. All specific to the aviation industry, the terms have been gathered from the regulations, the Pilot/Controller Glossary from the AIM, and glossaries from government handbooks and manuals. Also, definitions not found in any government publications are included ...-Publisher.

Victor Wilfred Pagé, 2012-08-01 Unlike some other reproductions of classic texts (1) We have not used OCR (Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

Pilot / Controller Glossary (Air Traffic Plans and Publications) Federal Aviation Administration, 2019-11-28 This Glossary was compiled to promote a common understanding of the terms used in the Air Traffic Control system. It includes those terms which are intended for pilot/controller communications. Those terms most frequently used in pilot/controller communications are printed in bold italics. The definitions are primarily defined in an operational sense applicable to both users and operators of the National Airspace System. Use of the Glossary will preclude any misunderstandings concerning the system's design, function, and purpose. Because of the international nature of flying, terms used in the Lexicon, published by the International Civil Aviation Organization (ICAO), are included when they differ from FAA definitions. These terms are followed by [ICAO]. For the reader's convenience, there are also cross references to related terms in other parts of the Glossary and to other documents, such as the Code of Federal Regulations (CFR) and the Aeronautical Information Manual (AIM).

French-English and English-French Dictionary of Aviation Robert Morris Pierce, 1918

Glossary of Aviation Terms, Termes D'Aviation Victor Wilfred Page, 2017-10-18 Excerpt from Glossary of Aviation Terms, Termes D'aviation: English French, Francais-Anglais As there are numerous young men training in this country, both in ground schools and at flying fields for the aviation service, and as much of this will probably be performed in France, it seems desirable to compile a brief glossary of commonly used aviation terms in both French and English to facilitate intercourse between the pilots and mechanics speaking different languages who work together in the present emergency. These lists are enlarged from a briefer series prepared originally for use in teaching classes at the Signal Corps Aviation School, Mineola, L. I. The illustrations accompanying the text should make everything clear about which any doubt could exist. As no definitions are given, the booklet is more in the nature of a glossary or list of words than a dictionary, and is intended only for use of those already familiar with aviation. Some of the equivalents may not be literally correct, but are selected with a view to listing only terms in common, everyday usage.
