The Phantom in Focus: A Navigator's Eye on Britain's Cold War Warrior David Gledhill,2014-03-26 Have you ever wondered what it was like to fly the Phantom? This is not a potted history of an aeroplane, nor is it Hollywood glamour as captured in Top Gun. This is the story of life on the frontline during the Cold War told in the words of a navigator who flew the iconic jet. Unique pictures, many captured from the cockpit, show the Phantom in its true environment and show why for many years the Phantom was the envy of NATO. It also tells the inside story of some of the problems which plagued the Phantom

in its early days, how the aircraft developed, or was neglected, and reveals events which shaped the aircraft's history and contributed to its demise. Anecdotes capture the deep affection felt by the crews who were fortunate enough to cross paths with the Phantom during their flying careers. The nicknames the aircraft earned were not complimentary and included the 'Rhino', 'The Spook', 'Double Ugly', the 'Flying Brick' and the 'Lead Sled'. Whichever way you looked at it, you could love or hate the Phantom, but you could never ignore it for its sheer power and lethal payload. The Phantom in Focus: A Navigator's Eye on Britain's Cold War Warrior is unique in that the author flew in the legendary Phantom in the front line and captured beautiful and amazing unpublished photographs that will appeal to historians, military specialists and modellers alike.

Aeronautical Chart Users Guide Federal Aviation Administration, 2012-02-01 A critical reference tool for any aeronautical navigator, the ninth edition of the Aeronautical Chart User's Guide presents the most up-to-date information on charts adhering to Visual Flight Rule (VFR) and Instrument Flying Rule (IFR). Hundreds of color images throughout the book are paired with easy-to-understand explanations and definitions. This concise guide allows pilots and students to successfully pre-plan flight paths through any type of environment from man-made obstacles to natural terrain. In addition, the updated Aeronautical Chart User's Guide is a great study aid for current pilots who are preparing for additional certification and for potential pilots who are interested in applying for their first license.

Air Navigation United States. Department of the Air Force, 1951

Flying from the Black Hole Robert O Harder, 2013-03-15 Air Force navigators and bombardiers have long labored under the shadow of pilots—their contributions undervalued, misunderstood, or simply unknown to the general public. This was especially the case with the non-pilot officer aircrew in the Vietnam and Cold War-era B-52 Stratofortress. Of the six people who operated the bomber, three wore navigator wings—two of those men were also bombardiers, the other an electronic warfare officer. Without the navigator-bombardiers in particular, executing the nuclear war strike plan or flying Southeast Asian conventional bombing sorties would have been impossible. This book reveals who these men were and what they did down in the “Black Hole,” a story told by one of their own.
