Aviation Weather Services National Aviation Weather Services Committee,Commission on Engineering and Technical Systems,Division on Engineering and Physical Sciences,National Research Council,1995-11-16 Each time we see grim pictures of aircraft wreckage on a rain-drenched crash site, or scenes of tired holiday travelers stranded in snow-covered airports, we are reminded of the harsh impact that weather can have on the flying public. This book examines issues that affect the provision of national aviation weather services and related research and technology development efforts. It also discusses fragmentation of responsibilities and resources, which leads to a less-than-optimal use of available weather information and examines alternatives for responding to this situation. In particular, it develops an approach whereby the federal government could provide stronger leadership to improve cooperation and coordination among aviation weather providers and users.

Aviation Weather: FAA and the National Weather Service are Considering Plans to Consolidate Weather Service Offices, But Face Significant Challenges David A. Powner,2009-12 The Nat. Weather Service's (NWS) weather products are a vital component of the FAA's air traffic control system. In addition to providing aviation weather products developed at its own facilities, NWS also provides staff onsite at each of FAA's en route centers -- the facilities that control high-altitude flight outside the airport tower. FAA and NWS have been exploring options for enhancing the efficiency of the aviation weather services provided at en route centers. This is a summary of a draft report that: (1) determines the status and plans of efforts to restructure the center weather service units; (2) evaluates efforts to establish a baseline of the current performance provided by these units; and (3) evaluates challenges to restructuring them.
