Talking in Context Anne Goodfellow,2005 Though linguists estimate that hundreds of languages are in danger of extinction, everyday use of Kwak'wala, an indigenous language spoken in British Columbia, reveals that it has been strategically maintained even among young speakers as a marker of cultural identity. Anne Marie Goodfellow explores the relationship between language, culture, and identity through a case study of the current use of Kwak'wala in two communities, Quatsino and Kingcome Inlet.

I Love You but I'm Not in Love with You Andrew G Marshall, 2010-02-15 How do you fall back in love? This was the underlying problem of one in four couples seeking help from relationship therapist Andrew G. Marshall. They described their problem as: 'I love you but I'm not in love with you'. Noticing how widespread the phenomenon had become, he decided to look more closely. Why were these relationships becoming defined more by companionship than by passion, and why was companionship no longer enough? From his research Andrew has devised his own unique programme. By looking at how a couple communicate, argue, share love, take responsibility, give and learn he offers in seven steps a reassuring and empowering map

for how two individuals can better understand themselves, strengthen their bond and recover that lost magic.

The Future of Risk Management Howard

Kunreuther, Robert J. Meyer, Erwann O. Michel-Kerjan, 2019-07-26
Whether man-made or naturally occurring, large-scale disasters can cause fatalities and injuries, devastate property and communities, savage the environment, impose significant financial burdens on individuals and firms, and test political leadership. Moreover, global challenges such as climate change and terrorism reveal the interdependent and interconnected nature of our current moment: what occurs in one nation or geographical region is likely to have effects across the globe. Our information age creates new and more integrated forms of communication that incur risks that are difficult to evaluate, let alone anticipate. All of this makes clear that innovative approaches to assessing and managing risk are urgently required. When catastrophic risk management was in its inception thirty years ago, scientists and engineers would provide estimates of the probability of specific types of accidents and their potential consequences. Economists would then propose risk management

policies based on those experts' estimates with little thought as to how this data would be used by interested parties. Today, however, the disciplines of finance, geography, history, insurance, marketing, political science, sociology, and the decision sciences combine scientific knowledge on risk assessment with a better appreciation for the importance of improving individual and collective decision-making processes. The essays in this volume highlight past research, recent discoveries, and open questions written by leading thinkers in risk management and behavioral sciences. The Future of Risk Management provides scholars, businesses, civil servants, and the concerned public tools for making more informed decisions and developing long-term strategies for reducing future losses from potentially catastrophic events. Contributors: Mona Ahmadiani, Joshua D. Baker, W. J. Wouter Botzen, Cary Coglianese, Gregory Colson, Jeffrey Czajkowski, Nate Dieckmann, Robin Dillon, Baruch Fischhoff, Jeffrey A. The Worry Cure Robert L. Leahy, Ph.D., 2006-10-24 The comprehensive approach to help you identify, challenge, and overcome all types of worry You wish you didn't spend as much time worrying as you do, but you just can't seem to help it. Worrying feels like second nature. It's what helps you solve your problems and prevents you from making mistakes. It's what motivates you to be prepared—if you didn't worry, things might get out of hand. Worry protects you, prepares you, and keeps you safe. Is it working? Or is it making you tense, tired, anxious, uncertain—and more worried? For more than twenty-five years, Dr. Robert L. Leahy has successfully helped thousands of people defeat the worry that is holding them back. This empowering

seven-step program, including practical, easy-to-follow advice and techniques, will help you: • Determine your “worry profile” and change your patterns of worry • Identify productive and unproductive worry • Take control of time and eliminate the sense of urgency that keeps you anxious • Focus on new opportunities—not on your fear of failure • Embrace uncertainty instead of searching for perfect solutions • Stop the most common safety behaviors that you think make things better—but actually make things worse Designed to address general worries as well as the unique issues surrounding some of the most common areas of worry—relationships, health, money, work, and the need for approval—The Worry Cure is for everyone, from the chronic worrier to the occasional ruminator. It’s time to stop thinking you’re “just a worrier” who can’t change and start using the groundbreaking methods in The Worry Cure to achieve the healthier, more successful life you deserve.
