### Earth A Planet Called Home Jaiveer Misra,2021-01-30

Earth A Planet Called Home is a story about Jazz, an alien who lives on Corbo, far away in the 50th galaxy. Upon receiving strange signals from planet Earth, he decides to embark on a journey that will change his life forever. While the journey through 49 other galaxies and shimmering planets is an exciting one, he is not prepared for his spaceship to crash-land in the middle of a graveyard on Earth! Soon Jazz begins to learn about a way of life that is unknown yet familiar to him. Using his superpowers to adapt to his new environment, he is taken aback by the sadness around him in a place that was once bright and beautiful. At the same time, he learns of the wonderful things that make Earth unique – human beings, furry golden dogs, delicious food, and wonderful friends. Where will Jazz finally find a home? Will he stay, or will he repair his spaceship and head back to Corbo? Read on to find out in this heartwarming story filled with adventure, love and, importantly, hope. This is a special story written by Jaiveer and illustrated by his grandmother. What greater testament can there be of love and that special bond that defines us as human beings. “Sparkling with the honesty of youth. A story for our times, heartwarming and filled with the life-giving hope born of love. We need more stories like this, please, Jaiveer!” Faith Singh Anokhi Jaipur Virasat Foundation

### **Escape to the Galaxies** Vidyasagar

Mundroy,2021-04-17 NOTHING IS SAFE ON EARTH; YOU NEED A BACKUP PLANET. YOU CAN NEVER FIND A PLANET

LIKE EARTH; YOU CAN'T SEARCH FOREVER. THERE IS NOTHING LIKE A PERFECT PLANET. Earth was once a beautiful planet with abundant natural resources. After making the planet uninhabitable, the humans escaped to Mars and to exoplanets in nearby galaxies. But, did they feel comfortable and safe on the new planets? After living happily on Mars for two millennia, who ever expected that Earth would haunt the human settlers on Mars once again? Halik, a young officer on planet Sulok in Triangulum, took the mantle of saving Mars from Earth. Before he could think about saving Mars, he had to learn a lot about Earth – why the humans left the planet, how they travelled across galaxies, how they made Mars and exoplanets liveable and the new species they encountered.

**The Story of Planet Earth** Renu Anand, 2016-04-22

For thousands of years, humans have probed and pondered over our planetary home. How was the Earth formed? How old is it? How did it become a living world? Today, because of our expanded knowledge and the wonders of technology, we know a lot more about Earth than our ancestors. We know that it is an evolving planet, undergoing never-ending changes, perhaps at a pace unequalled in its recent, or even remote, past. The Story of Planet Earth gives a detailed, yet interesting, account of a lot more aspects related to the creation of Earth – Earth's origin in light of the Big Bang explosion, arrival of water on its surface, formation of its atmosphere, evolution of life forms from unicellular organisms to giants like dinosaurs, changes from its core to crust and its current state in terms of unsettling global changes, a majority of which find their roots in our greed and thoughtlessness. The book goes beyond time, into the future, to see what may be in store for our forthcoming generations, if we don't care about this –home– of ours.

'\$500,000,000 reward offered to first party finding a live dinosaur'. The stampede is on for the money with one exception, Michael Richter, Paleontologist, who has clues from earlier expeditions of a possible area for success. His reward will be the major lift to his prestige. He and his three man crew are successful, but only two survive, Michael and the Geologist, Gabriella Pali, when a foreign spaceship rescues them and brings them to their planet UL-1 of the star Epsilon Eridani in the Milky Way, 10 and 1/2 light years from Earth. The planet had experienced the same problems as Earth society is experiencing now in the first decade of year 2000. The major difference being that the UL-1 population decided to make changes and succeeded. Astronaut Gena, a five foot seven blond Holon, explained that the two are not prisoners, but as guests of the planet, they would be brought back to Earth whenever requested. Mission is to show Earth society benefits of partnering in search of life's beginning, only if Earth society ceases behaving as a warrior society. Michael and Gabriella choose staying and working with UL-1 scientists on colonization.

They recommend that UL-1 bring an American two-man-spaceship to UL-1 and try to enlist the astronauts to be their representatives on Earth. The astronauts are allowed to freely roam everywhere seeing all of the advances including colonization. They decide to bring the message back to Earth. Their struggle is massive. How to convince Earth society to abandon warrior ways and join UL-1? How to eliminate personal hatreds of color, sexual behavior, religions and fear? How to--? How to--? Many years passed, one step forward and two backward. The astronauts finally gave up and moved immediate families to UL-1. Then----- ARMAGEDDON. Twenty years later, the rebirth begins.
