Go Diaper Free Andrea Olson, 2021-02-17 Stop changing diapers? start potting your baby. Over half the world's children are potty trained by one year old, yet the average potty training age in the United States is currently three years old. This leaves parents wondering: What did people do before diapers? and How do I help my own baby out of diapers sooner? Elimination Communication, also known as EC, is the natural alternative to full-time diapers and conventional toilet training. Although human babies have been pottied from birth for all human history, we've modernized the technique to work in today's busy world. Go Diaper Free shows parents of 0-18 month babies, step-by-step, how to do EC with confidence, whether full time or part time, with diapers or without. Diaper-free doesn't mean a naked baby making a mess everywhere - it actually means free from dependence upon diapers. With this book, new parents can avoid years of messy diapers, potty training struggles, diaper rash, and unexplained fussiness. Also helpful for those considering EC, in the middle of a potty pause, or confused about how to begin. This 6th edition includes a new section on The Dream Pee, a full text and graphic

revision, more photos of EC in action, and a complete list of further resources. MULTIMEDIA EDITION: includes the book and access to private video library, helpful downloads, additional troubleshooting, and our private online support group run by our Certified Coaches. For less than the cost of a case of diapers, you can learn EC hands-on, the way it's meant to be learned.

The good news is that it's possible—even practical—to raise your kids without diapers. In *Diaper Free!*, Ingrid Bauer shows how you can: * Save thousands of dollars * Reduce landfill waste (single-use disposable diapers are responsible for one third of the non-biodegradable waste in landfills) * Avoid diaper rash * Use the "Four Tools for Diaper Freedom" to enhance your relationship with your baby and deepen communication. Archaeological Theory in Practice Patricia A Urban, Edward Schortman, 2019-03-04 Many students view archaeological theory as a subject distinct from field research. This division is reinforced by the way theory is taught, often in stand-alone courses that focus more on logic and reasoning than on the application of ideas to fieldwork. Divorcing thought from action does not convey how archaeologists go about understanding the past. This book bridges the gap between theory and practice by looking in detail at how the authors and their colleagues used theory to interpret what they found while conducting research in northwest Honduras. This is not a linear narrative. Rather, the book highlights the open-ended nature of archaeological investigations in which theories guide research whose findings may challenge these initial interpretations and lead in unexpected directions. Pursuing those novel investigations requires new theories that are themselves subject to refutation by newly gathered data. The central case study is the writers' work in Honduras. The interrelations of fieldwork, data, theory, and interpretation are also illustrated with two long-running archaeological debates, the emergence of inequality in southern Mesopotamia and inferring the ancient meanings of Stonehenge. The book is of special interest to undergraduate Anthropology/Archaeology majors and first- and second-year graduate students, along with anyone interested in how archaeologists convert the static materials we find into dynamic histories of

long-vanished people.
