Investing in your Child Minder: Psychological Considerations and Practical Skills Sibusiso P.S. Mhlango,2013-03-18 Childminding is one responsibility which is generally taken lightly. Conscious investment is often not made on the emotional wellbeing of child minders. This book arms the reader with the knowledge and skills of recruiting, selecting, orientating, training, compensating, motivating and appraising the performance of child minders. The reader is further exposed to parenting needs for children of different developmental stages. The importance of investing on the emotional wellbeing of the child minder cannot be overstated. The reader is empowered with knowledge and skills of effectively making this investment. This book is a must-read for all parents who want to protect their children from the lasting negative psychological effects which may unwittingly or deliberately be caused by child minders who are given too much responsibility with little boundaries and guidance.

The Victorian Baby in Print Tamara S. Wagner,2020-10-15 The Victorian Baby in Print: Infancy, Infant Care, and Nineteenth-Century Popular Culture explores the representation of babyhood in Victorian Britain. The first study to focus exclusively on the baby in nineteenth-century literature and culture, this critical analysis discusses the changing roles of an iconic figure. A close look at the wide-ranging portrayal of infants and infant care not only reveals how divergent and often contradictory Victorian attitudes to infancy really were, but also challenges persistent clichés surrounding the literary baby that emerged or were consolidated at the time, and which are largely still with us. Drawing on a variety of texts, including novels by Charles Dickens, Wilkie Collins, Mary Elizabeth Braddon, Mrs Henry Wood, and Charlotte Yonge, as well as parenting magazines of the time, childrearing manuals, and advertisements, this study analyses how their representations of infancy and infant care utilised and shaped an iconography that has become definitional of the Victorian age itself. The familiar clichés surrounding the Victorian baby have had a lasting impact on the way we see both the Victorians and babies, and a critical reconsideration might also prompt a self-critical reconsideration of the still burgeoning market for infant care advice today.

Hong Kong Grant Evans,Maria Tam,2013-10-31 Hong Kong has become a by-word for all that is modern and sparkling in Asia today. Yet tourist brochures still play with the old cliché of Hong Kong as a place where 'East meets West'. Images of so-called 'traditional' China, junks sailing Victoria Harbour or old women praying to gods in smoky temples, mingle with those portraying Hong Kong as a consumer and business paradise. This collection of essays attempts to transcend the old polarities. It looks at modern Hong Kong in all its splendour and diversity in the run-up to its re-absorption into Greater China in mid-97, through the mediums of film, food, architecture, rumours and slang. It explores the question of a distinct, modern Chinese identity in Hong Kong, and even when it explores the traditional stamping ground of the older anthropology in the New Territories it finds a dramatically changed context, in particular for women. This collection presents an intriguing insight into the process of transition from 'tradition' to 'modernity' in this Modern Chinese Metropolis.

This book addresses this problem, bringing a wealth of information together in one easy-to-use resource. Bilingual Lexicography from a Communicative Perspective Heming Yong,Jing Peng,2007-06-27 This stimulating new book, as the premier work introducing bilingual lexicography from a communicative perspective, is launched to represent original thinking and innovative theorization in the field of bilingual lexicography. It treats the bilingual dictionary as a system of intercultural communication and bilingual dictionary making as a dynamic process realized by sets of choices, characterizing the overall nature of the dictionary. It examines the dictionary and dictionary making by using a model of lexicography which stresses the three-way relationship of compiler, dictionary context and user and incorporates them into a unified coherent framework. Throughout the study, special focus is on English and Chinese bilingual lexicography. It will serve not only as a valuable guide to those interested in dictionary compilation and theoretical inquiries but also as a textbook for undergraduate and postgraduate courses in bilingual lexicography.

Reading and Loving Leila Berg,2017-11-22 Originally published in 1977. Learning to read is probably the central educational achievement of any child's life. It is also a central concern for parents and teachers. Leila Berg, known for her work in children's literature, believes that the enjoyment of books and the acquisition of reading and writing is not primarily an academic or a technical skill, but grows from a warmly physical and emotional base of shared enjoyment with another human being. This book traces the varied ways that babies learn to communicate, and discusses the place of books in the lives of different groups in the community. It examines the types of books used in school, and demonstrates that, in many cases, books

themselves provide the major inhibition to the development of reading through their stilted and often formalistic vocabulary. The author's aim is that all children's first experience of reading should be a loving and sensuous one, so that they can come to discover the power of books themselves.

Infant Mortality and Working-Class Child Care, 1850-1899 Melanie Reynolds,2016-05-21 Infant Mortality and Working-Class Child Care, 1850-1899 unlocks the hidden history of working-class child care during the second half of the nineteenth century, seeking to challenge those historians who have cast working-class women as feckless and maternally ignorant. By plotting the lives of northern women whilst they grappled with industrial waged work in the factory, in agriculture, in nail making, and in brick and salt works, this book reveals a different picture of northern childcare, one which points to innovative and enterprising child care models. Attention is also given to day-carers as they acted in loco parentis and the workhouse nurse who worked in conjunction with medical paediatrics to provide nineteenth-century welfare to pauper infants. Through the use of a new and wide range of source material, which includes medical and poor law history, Melanie Reynolds allows a fresh and new perspective of working-class child care to arise.

The New Maids Professor Helma Lutz,2011-08-11 The New Maids is a pioneering book, grounded on rich, empirical evidence, which examines the relationship between globalization, transnationalism, gender and the care economy. Expertly addressing the thorny questions that surround the increasing number of migrant domestic workers and cleaners, child-carers and caregivers who maintain modern Western households, the author argues that domestic work plays the defining role in global ethnic and gender hierarchies. Using a central ethnographic study of immigrant domestic workers and their German employees as its starting point, The New Maids uses the voices of such women themselves to provide unique conceptual and evidential support for this vital new approach argument. This exciting book will not only enhance the reader's understanding of the new care-economy, it also sets standards for feminist global methodology.

Childminder (Routledge Revivals) Brian Jackson,Sonia Jackson,2013-09-13 First published in 1979, this book looks at the subject of childminding in Britain at the time it was written. It is based on a national survey that was commissioned by the Social Science Research Council and on action to help childminders funded by the Wates Foundation at Manchester University, UK. Previous to this study it was calculated that more than one million children under the age of five had a working mother, but little research had been done into childminders themselves. This book evaluates the number and nature of the childminders in Britain that were looking after the nation’s children in the 70s. It argues that parents have a right to choose to work if society can guarantee loving and skilled care for their children. However, the authors suggest that this was not the case at the time and state that childminders were in need of better governmental support.
