Just as important, the story doesn't gender people or body parts, so most parents and families will find that it leaves room for them to educate their child without having to erase their own experience. Written by a certified sexuality educator, Cory Silverberg, and illustrated by award-winning Canadian artist Fiona Smyth, *What Makes a Baby* is as fun to look at as it is useful to read.

*The Happiest Baby on the Block* Harvey Karp, M.D.,2008-11-19 Perfect for expecting parents who want to provide a soothing

home for the newest member of their family, *The Happiest Baby on the Block*, the national bestseller by respected pediatrician and child development expert Dr. Harvey Karp, is a revolutionary method for calming a crying infant and promoting healthy sleep from day one. In perhaps the most important parenting book of the decade, Dr. Harvey Karp reveals an extraordinary treasure sought by parents for centuries --an automatic "off-switch" for their baby's crying. No wonder pediatricians across the country are praising him and thousands of Los Angeles parents, from working moms to superstars like Madonna and Pierce Brosnan, have turned to him to learn the secrets for making babies happy. Never again will parents have to stand by helpless and frazzled while their poor baby cries and cries. Dr. Karp has found there IS a remedy for colic. "I share with parents techniques known only to the most gifted baby soothers throughout history ...and I explain exactly how they work." In a innovative and thought-provoking reevaluation of early infancy, Dr. Karp blends modern science and ancient wisdom to prove that newborns are not fully ready for the world when they are born. Through his research and experience, he has developed four basic principles that are crucial for understanding babies as well as improving their sleep and soothing their senses:

- The Missing Fourth Trimester: as odd as it may sound, one of the main reasons babies cry is because they are born three months too soon.
- The Calming Reflex: the automatic reset switch to stop crying of any baby in the first few months of life.
- The 5 "S's": the simple steps (swaddling, side/stomach position, shushing, swinging and sucking) that trigger the calming reflex. For centuries, parents have tried these methods only to fail because, as with a knee reflex, the calming reflex only works when it is triggered in precisely the right way. Unlike other books that merely list these techniques Dr. Karp teaches parents exactly how to do them, to guide cranky infants to calm and easy babies to serenity in minutes...and help them sleep longer too.
- The Cuddle Cure: the perfect mix the 5 "S's" that can

soothe even the most colicky of infants. In the book, Dr. Karp also explains: What is colic? Why do most babies get much more upset in the evening? How can a parent calm a baby--in mere minutes? Can babies be spoiled? When should a parent of a crying baby call the doctor? How can a parent get their baby to sleep a few hours longer? Even the most loving moms and dads sometimes feel pushed to the breaking point by their infant's persistent cries. Coming to the rescue, however, Dr. Karp places in the hands of parents, grandparents, and all childcare givers the tools they need to be able to calm their babies almost as easily as...turning off a light. From the Hardcover edition.

**Navajo Infancy** James S. Chisholm,2017-07-05 Navajo Infancy describes the major sources of change and continuity in Navajo infant development. It does so by combining concepts and methods of classical ethology with those of social-cultural anthropology. The goal is to establish the relationships between human nature and culture. By considering the nature of adaptation, and the evolution of human developmental patterns, and through analyses of the determinants of change and continuity in Navajo infant development, Navajo Infancy outlines how the process of development itself may bridge nature and culture. With its special focus on the effect of the cradleboard on Navajo mother-infant interaction, Navajo Infancy raises important developmental issues in its analyses of why the effects of the cradleboard do not last. Incorporating the Brazelton Neonatal Behavioral Assessment Scale into its ethological-anthropological methods, Navajo Infancy demonstrates significant Navajo-Anglo-American differences in newborn temperament. It finds a strong correlation between newborn behavior and prenatal environmental factors, arguing that racial and ethnic differences in behavior at birth go well beyond simple gene pool differences. Navajo Infancy

also describes the individual and group differences in the development of Navajo and Anglo- American children's fear of strangers and patterns of mother-infant interaction. Aspects of attachment theory, transactional theories of development, and anthropological theories of socialization are related to this broad new evolutionary approach to the process of development and nature-culture interaction.
