MediaSpeak Roy F. Fox,2000-10-30 This book defines and analyzes the content, structure, and values of three predominant types of public discourse, which are labeled Doublespeak, Salespeak, and Sensationspeak. These media messages are examined to determine how they are constructed and how they influence individuals, ideology, and culture. Discussions are illustrated with a diverse range of examples from popular culture, magazines, Internet sites, politics, television, and film. Fox argues that the Information Age has replaced actual reality with representations of reality. He states that electronic media dominates our lives. Together, these three voices saturate media and technology, profoundly influencing American culture. Fox suggests specific strategies for recognizing and understanding these coded messages. This lively and informative discussion will appeal to anyone who is interested in learning how print and electronic media manipulate both individuals and society as a whole. The extensive research will appeal to media, communications, journalism, and cultural studies scholars alike.

Speaking in Styles Jason Cranford Teague,2009-06-30 Speaking in Styles aims to help Web designers learn the language that will be used to take their vision from the static comp to the live Internet. Many designers think that CSS is code, and that it's too hard to learn. Jason takes an approach to CSS that breaks it down around common design tasks and helps the reader learn that they already think in styles--they just need to learn to speak the language. Jason helps Web designers find their voice, walks them through the grammar of CSS, shows them how to write their design specs in CSS, and how to prepare it for screen, printer or handheld devices. Along the way designers will learn to optimize their code, make it accessible, optimize for search engines, mix it up with Flash, and more.

Examining the Big Bang and Diffuse Background Radiations Menas Kafatos,Y. Kondo,2012-12-06 IAU Symposium No. 168, Examining the Big Bang and Diffuse Background Radiations, took place on August 23-26, 1994 at the XXIIInd IAU General Assembly in the Hague, Netherlands. The meeting attracted a large number - over 250 - of astronomers, reflecting the strong interest engendered by the great advances in cosmology made in recent years. There is still a multitude of unresolved problems in modern cosmology and the symposium offered a wonderful occasion to examine them objectively, at a place where many leading workers in related fields

gathered together. After the introduction by IAU President L. Woltjer and the historical background by Vice President Virginia Trimble, the volume begins with reviews of the cosmic microwave radiation from COBE (Cosmic Background Explorer). Reviews of recent observations then extend from radio to infrared, visible light, ultraviolet, X-rays and gamma-rays. It is followed by theoretical models for the Big Bang and Inflation, and alternative views to the Big Bang. Following a discourse on Probes and Future Tests, the meeting ended with a Panel Discussion on 'Major Unsolved Problems of Cosmology'. Some forty-four contributed papers - both oral and poster reports - are included after the invited talks and panel discussions.

The Moral Background Gabriel Abend, 2016-05-31 In recent years, many disciplines have become interested in the scientific study of morality. However, a conceptual framework for this work is still lacking. In *The Moral Background*, Gabriel Abend develops just such a framework and uses it to investigate the history of business ethics in the United States from the 1850s to the 1930s. According to Abend, morality consists of three levels: moral and immoral behavior, or the behavioral level; moral understandings and norms, or the normative level; and the moral background, which includes what moral concepts exist in a society, what moral methods can be used, what reasons can be given, and what objects can be morally evaluated at all. This background underlies the behavioral and normative levels; it supports, facilitates, and enables them. Through this perspective, Abend historically examines the work of numerous business ethicists and organizations—such as Protestant ministers, business associations, and business schools—and identifies two types of moral background. *Standards of Practice* is characterized by its scientific worldview, moral relativism, and emphasis on individuals' actions and decisions. The Christian Merchant type is characterized by its Christian worldview, moral objectivism, and conception of a person's life as a unity. *The Moral Background* offers both an original account of the history of business ethics and a novel framework for understanding and investigating morality in general.
