Children Reading Pictures Evelyn Arizpe,Morag Styles,2004-08-02 This book describes the fascinating results of a two year study of children's responses to contemporary picturebooks. Children of primary school age, from a range of backgrounds, read and discussed books by the award-winning artists, Anthony Browne and Satoshi Kitamura. They then made their own drawings in response to the books. The authors found that children are sophisticated readers of visual texts, and are able to make sense of complex images on literal, visual and metaphorical levels. They are able to understand different viewpoints, analyse moods, messages and emotions, and articulate personal responses to picturebooks - even when they struggle with the written word. With colour illustrations, and interviews with the two authors whose books were included in the study, this book demonstrates how important visual literacy is to children's understanding and development. Primary and Early Years teachers, literacy co-ordinators and all those interested in children's literature will find this a captivating read.

Red Hat Enterprise Linux 8: Desktops and Administration Richard

Petersen,2019-12-10 This book examines Red Hat Enterprise Linux 8 for the desktop user and administrator (including RHEL 8.1). Though administrative tools are covered, the emphasis is on what a user would need to know to perform tasks. The focus here is on what users face when using Red Hat Enterprise Linux 8, covering topics like applications, the GNOME desktop, shell commands, and the administration and network tools. The GNOME desktop is examined in detail, including configuration options. Administration topics are also covered including user management, software management, repositories, services, systemd, system monitoring, shell configuration, encryption, network connections, shared resources, authentication, SELinux, firewalls, shell configuration, backups, and printers. The book is organized into two parts: desktops and administration.
