The Backyard Bowyer Nicholas Tomihama, 2011-03-10 With over 300 step-by-step pictures, the Backyard Bowyer is geared for the beginning bowyer, backyard hobbyist, and anyone who has ever pondered building a wooden bow. Easy to read and follow steps go down to even the smallest detail in the design and construction of basic archery bows. Learn to craft fine wooden bows without huge investment in equipment and materials, and without being bound by location and limited workspace. Learn to construct: A classic target flat bow, an English Longbow suitable for hunting, and even your own strings and arrows for traditional and primitive archery.

The Impossible Bow Nicholas Tomihama, 2011-09 Archery is almost as old as mankind itself, manifesting in almost every culture and on almost every continent. It is in many ways our link to the past and the stepping stone into another age. It is one of the few ancient pastimes that are still relevant today. Yet nowadays, getting into the ancient sport of archery can be daunting for the average person with no experience or previous exposure to the subject. For many, the hefty price tags on modern bows or the seemingly impossible task of building a bow can be a surefire deterrent. Many do not want to pay the price of a decent bow to try their hand at the bow and arrow, simply to see if they enjoy it or not. If only there was a way to make a bow good enough for a beginner without expending or gambling an immense amount of time or money on it. What if you were told that there was such a bow? That hidden in the ground, in the heart of buildings, on the shelves of most hardware stores, and perhaps even in your home, there was a material that made it all possible? Would you believe it? Well it is true, and that material is PVC pipe, the white or gray plastic pipe that can be found virtually everywhere. It is possible with only a minimal investment and an hour of labor to make a fine bow for target archery that performs just as well as bows worth more than ten times as much. A bow that, if given a little more time and effort, can be made into an efficient hunting tool or serious target shooter. The Impossible Bow shows you how to construct your own PVC pipe bow, with bows ranging from the incredibly simple to the incredibly complex. Learn to build simple bows that require a minimum of tools and little time, more complex bows that can be modified to fit the target archer as well as the experienced hunter looking for more of a challenge, and finally a bow that accurately replicates the weapons of war of the steppe nomads. The best part is that even the most complex bow should cost no more than 10 dollars and be completed in a day, yet can hold up to the rigors of daily use. Don't let anything hold you back from enjoying one of man's oldest and most noble of sports. Join the backyard archery revolution with your very own bow that will defy everything you know and will baffle anyone who sees it. Join me in building an impossible bow. Author's Notes: The bows in this book are great for kids of all ages, from the young to the young at heart. Because of the ability of these bows to mimic many historical bow designs, this book is great for re-enactment archery as well as for the target archer. If made well, one design in particular works well for hunting, and can be modified to work just as well as many primitive hunting bows. This book covers how to make the generic PVC pipe bow that has been the mainstay of do-it-yourself archery for some time now, as well as a couple designs which bring out the hidden performance of PVC as a bow material. These bows also work well for survival situations and

can be made small and can be kept virtually anywhere out of the sun. In the trunk of a car, in a boat, in a hunting cabin, your basement, your attic, the list goes on and on. This book goes over how to make smooth shooting bows from 30 to 70 pounds of pull that can perform well if taken care of. While they aren't top performing bows, they can certainly be used for hunting, fishing, and target archery.

Archery for Beginners Amante P. Marinas, Sr.,2019-05-21 Archery for Beginners is the complete instructional guide for anyone interested in taking up recreational archery. With over 150 illustrations and full-color photos, step-by-step instructions, and easy-to-follow directions, Archery for Beginners is the go-to guide for anyone interested in learning archery basics. Be the next to join more than 8 million Americans who enjoy this popular pastime! Topics included in this book are: Compound and Recurve bows Archery equipment and accessories Training preparation and safety Advanced shooting methods Fun archery games How to make your own bow This book covers all the essentials for the beginning archer--from basic skills and equipment to effective and safe training methods. There are chapters on both recurve and compound bows, the two most popular types, as well as information on how to track your progress.

Simple PVC Pipe Bows Nicholas Tomihama,2012-07-03 Whether it's out fishing, in the woods, at the range or even in the backyard, the sport of archery in all its forms can be fun and rewarding for all ages. In this day of mass production, the draw of being able to make something with your hands is greater than ever. PVC plumbing pipe, with its unique blend of qualities, offers both the experienced and beginner archer an opportunity to build their own dependable bows without any previous experience. Simple PVC Pipe Bows shows you how build a solidly performing bow with little in the way of equipment, work space, time and material cost, whether it's one or hundreds. Youth Recurve : A small and light bow at home in the backyard as well as on the range. It's perfect for women and teen archers with its shorter draw and compact size. While geared for young archers, this bow can hold its own as a short pack bow or training bow for an archer of any age. Horse Bow : This reflexed bow reminiscent of the short bow of the nomads of Central Asia and Eastern Europe is ideal for learning the art of mounted archery. With a smooth draw and compact size, this bow is a sweet shooter on foot as well. Snakey Recurve : Designed after wooden bows which work with the natural contours of gnarled wood, the snakey recurve is an ideal bow for the hunter or fisherman looking to craft his own equipment. Its serpentine curve brings the string in line with the center and tilts the handle making for a bow that is more accurate and comfortable to shoot.

MODERN ARCHERY FOR LIFE (REVISED) Jake Veit,2023-11-27 It was the spring of 1951 when Jake Veit's father, an avid outdoorsman, decided he wanted to learn to bowhunt. As Jake picked up his father's enthusiasm for archery, he began shooting in tournaments and bowhunting small game, and ultimately helped his father found an archery club. While intertwining his entertaining personal experiences while growing up in Ohio and beyond with insight into the ancient sport of archery and accompanying images, Veit provides a fascinating glimpse into all the ways involvement in archery can positively effect its participants. As he leads others through his experiences and the history of a sport that has helped man survive over time, Veit details his tournament experiences, the mental and physical control that he and others had to refine to be successful, how to properly execute a shot sequence and other techniques, and much more. Throughout his presentation, Veit reminds us that archery is a life sport that provides exercise and fun while demonstrating that no one has to win to feel accomplished. Modern Archery for Life shares personal experiences, insight, and images that shine an intriguing light onto an ancient sport that can be enjoyed by all ages.
