- 🔍 **PERSONAL RELATIONSHIPS AND INTIMACY IN THE AGE OF SOCIAL MEDIA** Cristina Miguel,2018-11-11 This book examines how intimate relationships are built, negotiated and maintained through social media. The study takes a cross-platform approach, analysing three social media platforms of different genres – Badoo, Couchsurfing and Facebook – and exploring two interactive forces that shape the way people communicate through social media: the platforms’ architecture and policies, and actual practises of use. Combining analysis of the political economy of social media with users’ perspectives of their own practises – as well as exploring the tensions between the two – the book provides a detailed picture of intimacy as a complex structure of continuity and change.
- 🔍 **FACEBOOK NATION** Newton Lee,2014-10-16 Facebook’s psychological experiments and Edward Snowden’s NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama, in his 2011 State of the Union Address, called America “the nation of Edison and the Wright brothers” and “of Google and Facebook.” U.S. Chief Information Officer Steven VanRoekel opines that America has become a “Facebook nation” that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness – a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA’s secret PRISM program has reinvigorated WikiLeaks founder Julian Assange’s accusation that “Facebook is the most appalling spying machine that has ever been invented.” Facebook CEO Mark Zuckerberg once said, “We exist at the intersection of technology and social issues.” This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple-Wood and Facebook ROI experts Dennis Yu and Alex Houq.

The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 132 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in this three-volume set. - 🔍 **MEDIATED INTIMACIES** Rikke Andreassen,Michael Nebeling Petersen,Katherine Harrison,Tobias Raun,2017-10-30 Social media, characterized by user-generated content, interactivity, participation and community formation, have gained much research attention in recent years. At the same time, intimacy, affectivity and emotions are increasingly growing as fields of study. While these two areas are often interwoven, the actual interconnections are rarely studied in detail. This anthology explores how social media construct new types of intimacies, and how practices of intimacy shape the development and use of new media, offering empirical knowledge, theoretical insights and an international perspective on the flourishing field of digital intimacies. Chapters present a range of research tools used, such as interviews, online ethnography, visual analysis, text analysis and video analysis. There is also rich variation in sources for the empirical material studied, including Tumblr, YouTube, dating sites, hook-up sites, Facebook, Snapchat, Couchsurfing, selfies, blogs and photographs, as well as smartphones, tablets and computers. By focusing on the intersection between social media and intimacies, and their continuous co-constitution, this anthology offers new insights into the vast landscape of contemporary media reality. It will be a valuable resource for teachers, students and scholars with an interest in new media, communication, intimacy and affectivity.
- 🔍 **LOVE IN THE TIME OF ALGORITHMS** Dan Slater,2013-01-24 “If online dating can blunt the emotional pain of separation, if adults can afford to be increasingly demanding about what they want from a relationship, the effect of online dating seems positive. But what if it’s also the case that the prospect of finding an ever more compatible mate with the click of a mouse means a future of relationship instability, a paradox of choice that keeps us chasing the illusive bunny around the dating track?” It’s the mother of all search problems: how to find a spouse, a mate, a date. The escalating marriage age and declining marriage rate mean we’re spending a greater portion of our lives unattached, searching for love well into our thirties and forties. It’s no wonder that a third of America’s 90 million singles are turning to dating Web sites. Once considered the realm of the lonely and desperate, sites like eHarmony, Match, OkCupid, and Plenty of Fish have been embraced by pretty much every demographic. Thanks to the increasingly efficient algorithms that power these sites, dating has been transformed from a daunting transaction based on scarcity to one in which the possibilities are almost endless. Now anyone—young, old, straight, gay, and even married—can search for exactly what they want, connect with more people, and get more information about those people than ever before. As journalist Dan Slater shows, online dating is changing society in more profound ways than we imagine. He explores how these new technologies, by altering our perception of what’s possible, are reconditioning our feelings about commitment and challenging the traditional paradigm of adult life. Like the sexual revolution of the 1960s and ’70s, the digital revolution is forcing us to ask new questions about what constitutes “normal”: Why should we settle for someone who falls short of our expectations if there are thousands of other options just a click away? Can commitment thrive in a world of unlimited choice? Can chemistry really be quantified by math geeks? As one of Slater’s subjects wonders, “What’s the etiquette here?” Blending history, psychology, and interviews with site creators and users, Slater takes readers behind the scenes of a fascinating business. Dating sites capitalize on our quest for love, but how do their creators’ ideas about profits, morality, and the nature of desire shape the virtual worlds they’ve created for us? Should we trust an industry whose revenue model benefits from our avoiding monogamy? Documenting the untold story of the online-dating industry’s rise from ignominy to ubiquity—beginning with its early days as “computer dating” at Harvard in 1965—Slater offers a lively, entertaining, and thought provoking account of how we have, for better and worse, embraced technology in the most intimate aspect of our lives.

- 🔍 **HOLD ON** Peter Toohey,2020-05-12 What do you do when you’re not asleep and when you’re not eating? You’re most likely waiting—to finish work, to get home, or maybe even to be seen by your doctor. Hold On is less about how to manage all that staying where one is until a particular time or event (OED) than it is about describing how we experience waiting. Waiting can embrace things like hesitation and curiosity, dithering and procrastination, hunting and being hunted, fearing and being feared, dread and illness, courting and parenting, anticipation and excitement, curiosity, listening to and even performing music, being religious, being happy or unhappy, being bored and being boring. They’re all explored here. Waiting is also characterized by brain chemicals such as serotonin and dopamine. They can radically alter the way we register the passing of time. Waiting is also the experience that may characterize most interpersonal relations—mismanage it at your own risk. Hold On contains advice on how to cope with waiting—how to live better—but its main aim is to show how important the experience of waiting is, in popular and highbrow culture, and, sometimes, in history. Detouring into psychology, neurology, ethology, philosophy, film, literature, and especially art, Peter Toohey’s illuminates in unexpected ways one of the most common of human experiences. After reading his book, you’ll never wait the same way again.

📖 **Routledge Handbook of Families in Asia** Stella R. Quah, 2015-03-24 Research on the family has expanded considerably across Asia but studies tend to be fragmented, focusing on narrow issues within limited areas (cities, towns, small communities) and may not be accessible to international readers. These limitations make it difficult for researchers, students, policy makers, and practitioners to obtain the information they need. The Routledge Handbook of Families in Asia fills that gap by providing a current and comprehensive analysis of Asian families by a wide range of experts in a single publication. The thirty-two chapters of this comparative and multi-disciplinary volume are organized into nine major themes: conceptual approaches, methodological issues, family life in the context of culture, family relationships across the family life cycle, issues of work and income, stress and conflict, family diversity, family policy and laws, and environmental setting of homes. Each chapter examines family life across Asian countries, studying cultural similarities and differences and exploring how families are changing and what trends are likely to develop in the future. To provide a fruitful learning experience for the reader, each chapter offers examples, relevant data, and a comprehensive list of references. Offering a complete interdisciplinary overview of families in Asia, the Handbook will be of interest to students, academics, policy makers and practitioners across the disciplines of Asian studies, sociology, demography, social work, law, social policy, anthropology, geography, public health and architecture.
