Flickering Treasures Amy Davis,2017-08-01 These vintage and contemporary images of Baltimore movie palaces explore the changing face of Charm City with stories and commentary by filmmakers. Since the dawn of popular cinema, Baltimore has been home to hundreds of movie theaters, many of which became legendary monuments to popular culture. But by 2016, the number of cinemas had dwindled to only three. Many theaters have been boarded up, burned out, or repurposed. In this volume, Baltimore Sun photojournalist Amy Davis pairs vintage black-and-white images of downtown movie palaces and modest neighborhood theaters with her own contemporary color photos. *Flickering Treasures* delves into Baltimore's cultural and cinematic history, from its troubling legacy of racial segregation to the technological

changes that have shaped both American cities and the movie exhibition business. Images of Electric Park, the Century, the Hippodrome, and scores of other beloved venues are punctuated by stories and interviews, as well as commentary from celebrated Baltimore filmmakers Barry Levinson and John Waters. A map and timeline reveal the one-time presence of movie houses in every corner of the city, and fact boxes include the years of operation, address, architect, and seating capacity for each of the 72 theaters profiled, along with a brief description of each theater's distinct character.

A Biography of a Map in Motion Christian J. Koot, 2018

Reveals the little known history of one of history's most famous maps – and its maker Tucked away in a near-forgotten collection, Virginia and Maryland as it is Planted and Inhabited is one of the most extraordinary maps of colonial British America. Created by a colonial merchant, planter, and diplomat named Augustine Herrman, the map pictures the Mid-Atlantic in breathtaking detail, capturing its waterways, coastlines, and communities. Herrman spent three decades travelling between Dutch New Amsterdam and the English Chesapeake before eventually settling in Maryland and making this map. Although the map has been reproduced widely,

the history of how it became one of the most famous images of the Chesapeake has never been told. *A Biography of a Map in Motion* uncovers the intertwined stories of the map and its maker, offering new insights into the creation of empire in North America. The book follows the map from the waterways of the Chesapeake to the workshops of London, where it was turned into a print and sold. Transported into coffee houses, private rooms, and government offices, Virginia and Maryland became an apparatus of empire that allowed English elites to imaginatively possess and accurately manage their Atlantic colonies. Investigating this map offers the rare opportunity to recapture the complementary and occasionally conflicting forces that created the British Empire. From the colonial and the metropolitan to the economic and the political to the local and the Atlantic, this is a fascinating exploration of the many meanings of a map, and how what some saw as establishing a sense of local place could translate to forging an empire.

Streets and Slums Frederick J. Brown, 2015-08-09 Excerpt from *Streets and Slums: A Study in Local Municipal Geography (With Maps)* Just as the growth and development of countries are determined to a great extent by their physical geography, the growth and development of cities depend largely upon what may

be called their municipal regularity, the width and directions of the streets, and their distance apart. Some cities, we all know, are laid out more regularly than others, most of our American cities aiming at great uniformity, one series of parallel streets being crossed at right angles by another series of parallel streets. While such regularity, or the absence of it, is a thing immediately obvious to the most careless observer, there is another respect in which cities differ from each other which is important, but not so obvious, indeed is very generally lost sight of, and only a few people who have studied the maps, and have done some measuring and figuring, know anything about it. And that is the wastefulness or economy of space with which a city is laid out, the shape and size of the blocks, the proportion which the area of the streets bears to the area of blocks. Some cities are laid out very extravagantly. Washington is a familiar instance. There is no city in the world laid out on such an extravagant scale. The streets and avenues are so many and so wide, that the proportion of the total area of the city which they cover is much greater than in any other city. It is so expensively planned that under normal conditions the owners of real estate would probably be simply ruined by the cost of maintaining such a city, so great is the area of streets to be kept

paved, cleaned, lighted and policed, to say nothing of the parks and reservations to be kept in order. But the general government has come to the rescue of the tax-payers, and bears half the expense of running the city.
