Banks and Fees: The Status of Off-Site Wetland Mitigation in the United States Environmental Law Institute,

Mitigation Banking David Salvesen, Lindell L. Marsh, Douglas R. Porter, 2013-04-10 Under the Clean Water Act, development that results in the permanent destruction of wetlands must, in most cases, be mitigated by the creation of a new wetland or the restoration of a degraded one. In recent years, the concept of mitigation banking has emerged. Rather than require developers to create and maintain wetlands on their own on a quid pro quo basis, mitigation banking allows them to pay for wetlands that have been created and maintained properly by others to compensate for their damage. The contributors to this volume provide an overview of mitigation banking experience in the United States, examine the key issues and concerns -- from providing assurances to determining the value of credits -- and describe the practice of developing and operating a mitigation bank. Topics include: history and current experience of mitigation banking policies and concerns of local, state, and federal agencies economics of mitigation banking funding, management, and operation of banks starting a mitigation bank

National Wetland Mitigation Banking Study, 1994

Reinventing the World Bank Jonathan R. Pincus, Jeffrey A. Winters, 2018-08-06 Largely ignored for decades, the World Bank increasingly finds itself at the center of an international political maelstrom. Attacked by the Right as the last bastion of socialism and by the Left as an instrument of economic imperialism, the Bank has struggled to adapt to a changing post-Cold War era. Still the world's leading development institution in terms of size and influence, the International Bank for Reconstruction and Development's failure to

articulate and implement a convincing strategy to reduce world poverty has left it vulnerable to the charge that, at least in its present form, it has outlived its usefulness. In a book neither funded nor controlled by its subject, leading North American and British scholars critically examine the World Bank. They contend that an institution that has grown to unmanageable proportions through internally driven change cannot realistically be expected to effect its own reform program. All the Bank's previous attempts at self-redesign have failed, and the contributors argue it is beyond reform; it must be reinvented. Reinvention involves a thoroughgoing and externally controlled process of transformation, starting from basic principles and encompassing three closely related dimensions: operations, or the fit between the Bank's lending program and its development objectives; concepts, its vision of development and anti-poverty strategy; and power, which includes the Bank's relationships with member countries and the wider public, as well as structures of internal governance and accountability.

Money and the Market Kevin Dowd, 2013-12-16 Kevin Dowd asserts that state intervention into financial and monetary systems has failed, and that we would be better off if financial markets were left to regulate themselves. This collection will appeal to students, researchers and policy makers in the monetary and financial area.

Rehabilitating Damaged Ecosystems Jr. Cairns, 2017-12-14 Built on a strong foundation in restoration ecology, this unique handbook provides practitioners, academics, and managers with vital tools needed to plan for ecosystem conservation, to restore degraded ecosystems, to make cost-effective restoration decisions, and to understand important legal issues. *Rehabilitation of Damaged Ecosystems*, Second Edition boasts three completely new chapters and five major chapter revisions. Coastal wetlands restoration, watershed rehabilitation and management, mined land reclamation, revegetation of disturbed ecosystems, and river and stream restoration are only a few of the critical topics explored in this timely reference handbook. This Second Edition provides valuable, reliable data as well as practical methods and techniques for the ongoing fight to protect natural resources and restore damaged ecosystems.

Privatization and Deregulation Surjit S. Sidhu, Mohinder S. Mudahar, 1999-05-31 The contributions in this publication are an outcome of growing concerns around the world about the prevailing inefficiencies in agriculture and agribusiness and the need to improve productivity, profitability, and financial sustainability of agriculture and agribusiness by privatizing state- owned enterprises and eliminating unnecessary government regulations. It is in this context that an international symposium was organized on April 19-30, 1993, to address these policy concerns and thereby to improve the long-term prospects for productive and financially sustainable agriculture and agribusiness development. The policy issues addressed herein

were identified in a series of discussions at IFDC and with the authors. The main objectives were to focus on analytical policy issues that accelerate the process of privatization and market deregulation of publicly owned and operated enterprises and to provide necessary operational guidelines for policy reforms. This publication is structured around four main topics: (1) the role of agribusiness in economic development; (2) possible approaches and guidelines for privatization and deregulation of agribusiness; (3) the necessary enabling policy environment for privatization and deregulation; and (4) selected case studies. The views expressed in this publication belong solely to the respective authors and should not be attributed to IFDC, World Bank, or other organizations represented. Readers should keep in mind that when authors refer to 'current' or 'present' situations, they generally mean 1992/93 unless otherwise specified.

Embark on a breathtaking journey through nature and adventure with this mesmerizing ebook, *Nature's Adventure: Bank Moa*. This immersive experience, available for download in a PDF format (PDF Size: *), transports you to the heart of natural marvels and thrilling escapades. Download now and let the adventure begin!
