**World Development Report 2022** World Bank,2022-05-14 The COVID-19 pandemic triggered the largest global economic crisis in more than a century. In 2020, economic activity contracted in 90 percent of countries, the world economy shrank by about 3 percent, and global poverty increased for the first time in a generation. Governments responded rapidly with fiscal, monetary, and financial policies that alleviated the worst immediate economic impacts of the crisis. Yet the world must still contend with the significant longer-term financial and economic risks caused by, or exacerbated by, the pandemic and the government responses needed to mitigate its effects. World Development Report 2022: Finance for an Equitable Recovery examines the central role of finance in the economic recovery from COVID-19. Based on an in-depth look at the consequences of the crisis most likely to affect low- and middle-income economies, it advocates a set of policies and measures to mitigate the interconnected economic risks stemming from the pandemic—risks that may become more acute as stimulus measures are withdrawn at both the domestic and global levels. Those policies include the efficient and transparent management of nonperforming loans to mitigate threats to financial stability, insolvency reforms to allow for the orderly reduction of unsustainable debts, innovations in risk management and lending models to ensure continued access to credit for households and businesses, and improvements in sovereign debt management to preserve the ability of governments to support an equitable recovery.

Recovery of Local and Regional Authorities in Financial Difficulties Steering Committee on Local and Regional Democracy,2002 Local authorities in financial difficulty present a number of challenges for the central government, such as determining how deserving cases can be distinguished from unworthy ones or cases of abuse, whether financial aid or other assistance should be given, and how central government can help local authorities avoid getting into financial trouble. This report by the Steering Committee on Local and Regional Democracy (CDLR) considers these issues in terms of Council of Europe member states. It contains a number of case studies of central assistance to local authorities and seeks to analyse why local authorities are in financial difficulty and how the problem is being dealt with in practice.

**Asset Recovery Handbook** Jean-Pierre Brun,Anastasia Sotiropoulou,Larissa Gray,Clive Scott,2021-02-08 Developing countries lose billions each year through bribery, misappropriation of funds, and other corrupt practices. Much of the proceeds of this corruption find 'safe haven' in the world's financial centers. These criminal flows are a drain on social services and economic development programs, contributing to the impoverishment of the world's poorest countries. Many developing countries have already sought to recover stolen assets. A number of successful high-profile cases with creative international cooperation has demonstrated that asset recovery is possible. However, it is highly complex, involving coordination and collaboration with domestic agencies and ministries in multiple jurisdictions, as well as the capacity to trace and secure assets and pursue various legal options—whether criminal confiscation, non-conviction based confiscation, civil actions, or other alternatives. This process can be overwhelming for even the most experienced practitioners. It is exceptionally difficult for those working in the context of failed states, widespread corruption, or limited resources. With this in mind, the Stolen Asset Recovery (StAR) Initiative has developed and updated this Asset Recovery Handbook: A Guide for Practitioners to assist those grappling with the strategic, organizational, investigative, and legal challenges of recovering stolen assets. A practitioner-led project, the Handbook provides common approaches to recovering stolen assets located in foreign jurisdictions, identifies the challenges that practitioners are likely to encounter, and introduces good practices. It includes examples of tools that can be used by practitioners, such as sample intelligence reports, applications for court orders, and mutual legal assistance requests. StAR—the Stolen Asset Recovery Initiative—is a partnership between the World Bank Group and the United Nations Office on Drugs and Crime that supports international efforts to end safe havens for corrupt funds. StAR works with developing countries and financial centers to prevent the laundering of the proceeds of corruption and to facilitate more systematic and timely return of stolen assets.
