**Poverty Reduction and Growth Trust - 2018 Borrowing Agreement with the Banque de France** International Monetary Fund. Finance Dept.,International Monetary Fund. Legal Dept.,2018-02-21 The Fund, as Trustee of the Poverty Reduction and Growth Trust (PRGT or Trust), has entered into a new borrowing agreement (the “Agreement”) with the Banque de France (hereafter France), effective on February 1, 2018. This new borrowing agreement with France provides new resources to the Extended Credit Facility Loan Account of the PRGT in the total amount of up to SDR 2 billion. Pursuant to Section III, paragraph 2 of the Instrument to establish the PRGT, the Managing Director is authorized to enter into borrowing agreements and agree to their terms and conditions with lenders to the Loan Accounts of the Trust. This paper presents the new Agreement with France to the Executive Board for information. Including this Agreement with France, the Fund has concluded fifteen new PRGT loan agreements providing total resources of SDR 11.4 billion in the context of the 2014 Board endorsed PRGT fundraising with a goal of SDR 11 billion. To accommodate the better-than-expected outcome, and following consultations with PRGT creditors, the IMF Board increased the PRGT’s cumulative borrowing limit on January 8, 2018. This is the sixth borrowing agreement between France and the Fund as Trustee of the PRGT. The Agreement incorporates the extensions of the commitments and drawdown period for PRGT loans to end-2020 and end-2024, respectively, consistent with the Fund’s framework for concessional lending to low income countries adopted in other PRGT borrowing agreements.

**Banking in China (1890s-1940s)** Hubert Bonin,2020-04-08 From the 1890s to the 1940s,

French State and entrepreneurial companies were enticed to promote French interests, beyond mere colonial targets, for the sake of economic patriotism. Chinese concessions, not including Hong Kong, were thus inserted into geo-economic moves, and French stakeholders asserted their philosophy of competition, and displayed their means of influence and investment. In this book, the author assesses the challenges which confronted French actors in the face of powerful British imperial action overseas, all the more so because German Belgian, Japanese, and then also North-American competitors joined the fray. The book targets three concessions: Canton/Guangzhou, Tientsin/Tianjin, and Hankeou/Wuhan because of their significance in the emergence of a modern economy in the country. The three main sections of the book explore the position of French stakeholders, mainly businessmen, merchant houses, bankers, and a few industrialists, in these three port-cities and China overall. The chapters gauge their capital of influence and networking, commercial tools, and banking skills in the face of competition, the hardships of crossing the changes in economic productive systems or clusters in the various port-cities and their areas, rich with commercial offshoots. Also, several chapters underscore the uncertainties caused by geopolitical and military events in China. For each of the three concessions, commercial and banking systems, assessments of the successes and limits of the French bankers and merchants are investigated, with the aim of evaluating the reality of French entrepreneurialism and power in the regions prospected by the offshoots of French capitalism. The book will be an invaluable resource for academics interested in the history of banking and finance, business, entrepreneurship, colonialism and economic patriotism in Chinese history, in geo-economics and in connected history.

*The Role of Banks in Monitoring Firms* Elisabeth Paulet,1999-05-20 This book addresses issues in the current literature on corporate finance using historical evidence. In particular it looks at the role of universal banks in relaxing the credit constraints of firms, supervising managers and stabilizing share prices. The key issues is whether the Anglo-American asset based financing is more effective than the main-bank approach used in Germany and Japan. Earlier studies have found that firms with a close

relationship with a major bank have high market value compared to book value, although it is difficult to determine whether this is cause or effect
