USB Embedded Hosts Jan Axelson, 2011-11-01 Developers who want to access USB devices from their embedded systems will find a helpful resource in *USB Embedded Hosts: The Developer's Guide*. This new book from the author of *USB Complete* shows how small systems can take advantage of the same wealth of USB devices available to conventional PCs. The book begins with a review of USB host communication protocols. Readers then learn which USB host requirements are relaxed for embedded systems and what new requirements some embedded systems must meet. To help in selecting a development platform, the book explores available hardware and software for USB host communications in small systems. The heart of the book focuses on communicating with USB devices. The topics (with example code) include USB drives, keyboards, virtual serial ports, network bridges, mics, speakers, video cameras, and printers, plus devices that don't fit defined USB classes. Also discussed are systems that support both USB host and device functions. The example code is written for the BeagleBoard-xM open development board using a distribution of Linux targeted to small systems. Also covered is how to use Linux commands and utilities to learn about, monitor, and debug communications with USB devices.

Assistive Technology Ger M. Craddock,2003 This publication covers different themes in the field of assistive technology. The theme New technologies will explore the significant advances in technology research & development and how these can be harnessed to benefit people with disabilities. This will include evolving technologies, affording interesting insights into the future. The theme User Centred Approach will look at fundamental ways in which the EU advocate a philosophy of citizenship and governance and how this philosophy can be advanced to ensure that people with disabilities become central to the assistive technology process Another issue that is explored in this publication is Interdisciplinary Approaches which can be developed within assistive technology and the provision of services to people with disabilities. Finally, it concentrates on ways in which practitioners and users, working together within assistive technology, can achieve best practice in the development and implementation of Guidelines and Standards across a broad spectrum.

MARKETING MANAGEMENT M. GOVINDARAJAN,2007-09-13 The primary focus of this book is on building up a conceptual framework for developing marketing strategies for the corporate enterprise. The book offers an insight into each facet of the marketer's role in relationship to an organization. It highlights the knowledge, the skills and the competencies necessary for marketers to succeed in today's competitive world, and bridges the gap between the

theory of marketing and the realities of the high-tech market. This NEW edition includes comprehensive coverage of the fundamentals of marketing and a discussion on market-focused business strategy. It offers several case study scenarios that let students analyse decisions and practices of marketing wisdom. There is a series of chapter vignettes on contemporary issues in marketing. Chapter-end self-testing material includes a summary, numerous review questions and several discussion questions to help students understand the major concepts and tools of marketing. This book is primarily written for postgraduate students of Business Administration (MBA) for courses in Principles of Marketing/Marketing Management. This book can also be used to advantage by undergraduate students of Business Administration (BBA) for courses in marketing, and by students of engineering where an elective course on Marketing Management is prescribed.
