*Make: Sensors* Tero Karvinen,Kimmo Karvinen,Ville Valtokari,2014-05-06 *Make: Sensors* is the definitive introduction and guide to the sometimes-tricky world of using sensors to monitor the physical world. With dozens of projects and experiments for you to build, this book shows you how to build sensor projects with both Arduino and Raspberry Pi. Use Arduino when you need a low-power, low-complexity brain for your sensor, and choose Raspberry Pi when you need to perform additional processing using the Linux operating system running on that device.You'll learn about touch sensors, light sensors, accelerometers, gyroscopes, magnetic sensors, as well as temperature, humidity, and gas sensors.

Handbook of Music and Emotion Patrik N. Juslin,John Sloboda,2011-03-17 A successor to the acclaimed 'Music and Emotion', The Handbook of Music and Emotion provides comprehensive coverage of the field, in all its breadth and depth. As well as summarizing what is currently known about music and emotion, it will also stimulate further research in promising directions that have been little studied.

**Machine Learning in Python** Michael Bowles,2015-03-24 Learn a simpler and more effective way to analyze data and predict outcomes with Python Machine Learning in Python shows you how to successfully analyze data using only two core machine learning algorithms, and how to apply them using Python. By focusing on two algorithm families that effectively predict outcomes, this

book is able to provide full descriptions of the mechanisms at work, and the examples that illustrate the machinery with specific, hackable code. The algorithms are explained in simple terms with no complex math and applied using Python, with guidance on algorithm selection, data preparation, and using the trained models in practice. You will learn a core set of Python programming techniques, various methods of building predictive models, and how to measure the performance of each model to ensure that the right one is used. The chapters on penalized linear regression and ensemble methods dive deep into each of the algorithms, and you can use the sample code in the book to develop your own data analysis solutions. Machine learning algorithms are at the core of data analytics and visualization. In the past, these methods required a deep background in math and statistics, often in combination with the specialized R programming language. This book demonstrates how machine learning can be implemented using the more widely used and accessible Python programming language. Predict outcomes using linear and ensemble algorithm families Build predictive models that solve a range of simple and complex problems Apply core machine learning algorithms using Python Use sample code directly to build custom solutions Machine learning doesn't have to be complex and highly specialized. Python makes this technology more accessible to a much wider audience, using methods that are simpler, effective, and well tested. Machine Learning in Python shows you how to do this, without requiring an extensive background in math or statistics.

*Sensoren - messen und experimentieren mit Arduino und Raspberry Pi* Kimmo Karvinen, Tero Karvinen, Ville Valtokari, 2014-11-19 Sensoren sind Ihre Augen, Ohren, Nasen und Fingerspitzen, wenn es darum geht, die physikalische Welt zu erforschen und zu vermessen. Zusammen mit den Minicomputern Arduino und Raspberry Pi ist es ganz einfach, programmgesteuert die Messwerte der Sensoren aufzunehmen, sie zu verarbeiten und Ergebnisse auszugeben oder Aktionen auszulösen. Mit diesem Buch lernen Sie, einfache Geräte zuzubauen, die alles Mögliche messen können - vom Nachweis verschiedener Gase über infrarotes Licht bis hin zu Beschleunigung von Objekten. Unter anderem werden folgende Themen und Projekte aus der physikalischen Welt behandelt: • Entfernungen messen mit Ultraschall und Infrarot • Gase und Rauch: Alkotest und Rauchmelder • Berührung und Druck: berührungsfreier Berührungssensor • Bewegung erkennen und steuern • Licht und Flammen: eine Chamäleonkuppel bauen • Beschleunigung und Winkelgeschwindigkeit: eine Roboterhand steuern • Identität feststellen: eine futuristische Schatztruhe bauen • Elektrizität und Magnetismus: Solarzellen per Web überwachen • Schall: Töne sichtbar machen • Wetter und Klima: Wettervorhersage auf E-Paper In mehr als 50 Projekten und Praxisexperimenten erfahren Sie, wie Sie die Sensoren sowohl mit dem Arduino als auch mit dem Raspberry Pi einsetzen können. Alle Experimente werden ausführlich und anschaulich erklärt, so dass sie zum Nachmachen anregen. Die entsprechenden Programme stehen zum Download bereit.

**Adverbs of Degree in Dutch and Related Languages** Henny Klein, 1998 Adverbs of degree form an intriguing part of the lexicon: numerous, multiform and everchanging. They also show a great variety in distribution. In this study, the characteristics of adverbs of degree are investigated from a semantic point of view. The main focus is on Dutch, but previous studies about English and German adverbs of degree are used to compare with and to build on. The book starts with an

introduction on grading and gradability, and a classification of the adverbs according to the degree they express. Next, the different lexical sources from which the adverbs emerge and the process of grammaticalization are discussed. The main part of the book is devoted to semantic restrictions on the use of adverbs of degree, on the one hand restrictions concerning the modified elements, on the other hand those concerning the environment. Topics include absoluteness versus gradability, positive versus negative evaluation, the strengthening of negation, polarity sensitivity, the logical properties of the adverbs themselves, and restrictions to reduplication and stacking. Besides the main text, three case studies are presented in which the peculiarities of some of the adverbs are investigated in depth, to show more in detail to complexities of their distribution. The appendix gives an overview of Dutch adverbs of degree.

*The Making of a Village* Asoka Kumar Sen, 2020-06-14 *The Making of a Village* examines the social and cultural life of indigenous peoples in India. It unfolds intimate aspects of Adivasi history such as the birth of a village, its demographic formation, forging of social relations, in- and out-migration, and the dialectics of the village as a socio-physical space during precolonial and colonial periods. Drawing on oral, archival and empirical data from eastern India, it highlights the interconnected themes of inflection of identity; the change of the Adivasis from historic agents to colonial subjects and their arcadia to a servile landscape; and the indigenous notion of state. It also initiates a dialogue between the past and present to bring into sharp relief ideas of village community, indigeneity, migration, governance, colonialism, agency, subjecthood, rural change, environment and ecology. Redefining the study of rural sociology in South Asia, this volume will be of great interest to scholars and researchers of modern Indian history, politics, development studies, sociology, social and cultural anthropology, Adivasi and indigenous studies, and South Asian studies.
