**Barred by Congress** Robert M. Lichtman, 2022-01-27 In Barred by Congress: How a Mormon, a Socialist, and an African American Elected by the People Were Excluded from Office Robert M. Lichtman provides a definitive history of congressional exclusion and expulsion cases. Lichtman offers a timely investigation of the vital constitutional issues, debated since the nation's founding, concerning permissible and impermissible grounds for excluding a member-elect or expelling a member from Congress. Barred by Congress begins with an exhaustive review of the numerous congressional exclusion and expulsion cases in the eighteenth and nineteenth centuries before focusing on the stories of the last three members-elect to be excluded from Congress: a Mormon, a Socialist, and an African American—each an outsider in American politics—excluded notwithstanding election by the voters. Lichtman illuminates each of these three remarkable individuals with a detailed biographical sketch. Brigham H. Roberts was a Utah Mormon whose exclusion from the House of Representatives in 1900 was fueled by a nationwide anti-Mormon campaign waged by William Randolph Hearst and his newspaper empire, a controversy centered on the issue of polygamy. Victor L. Berger, a Socialist Party leader and editor of an antiwar Milwaukee newspaper during World War I, was elected to the House despite the efforts of the Wilson administration to derail his campaign by indicting him under the Espionage Act; he was excluded in 1919 and again in 1920. Adam Clayton Powell Jr. was a Baptist minister and civil rights advocate who represented the Harlem neighborhood of New York City in the House of Representatives from 1945 until his exclusion in 1967. In Powell v. McCormack, the Supreme Court ruled that Powell's exclusion by the House violated the Constitution, a decision that, a half century later, remains established law but still does not provide complete assurance that the people will be able to (in Alexander Hamilton's words) "choose whom they please to govern them."

Barred Daniel S. Medwed,2022-09-20 A groundbreaking exposé of how our legal system makes it nearly impossible to overturn wrongful convictions Thousands of innocent people are behind bars in the United States. But proving their innocence and winning their release is nearly impossible. In *Barred*, legal scholar Daniel S. Medwed argues that our justice system's stringent procedural rules are largely to blame for the ongoing punishment of the innocent. Those rules guarantee criminal defendants just one opportunity to appeal their convictions directly to a higher court. Afterward, the wrongfully convicted can pursue only a few narrow remedies. Even when there is strong evidence of a miscarriage of justice, rigid guidelines, bias, and deference toward lower courts all too often prevent exoneration. Offering clear explanations of legal procedures alongside heart-wrenching stories of their devastating impact, *Barred* exposes how the system is stacked against the innocent and makes a powerful call for change.

**Mobile Security Products for Android** Philipp Kratzer,Christoph Gruber,Andreas Clementi,David Lahee,Philippe Rödlach,Peter Stelzhammer,2014-10-14 We have once again tested security products for smartphones running Google's Android operating system. Our report covers details of the products made by leading manufacturers. Smartphones represent the future of modern communications. In 2013, more than 1 billion smartphones were sold, a further milestone in the advance of these devices<sup>1</sup>. A study published by Facebook emphasises the importance of smartphones in our lives; about 80% of users make use of their smartphone within 15 minutes of waking up each day. At the same time, the traditional function of a telephone is becoming less and less important. The high quality of integrated cameras means that the smartphone is increasingly used for photography. As well as with photos, users trust their devices with their most personal communications, such as Facebook, WhatsApp and email. This brings some risks with it, as such usage makes the smartphone interesting for criminals, who attempt to infect the device with malware or steal personal data. There is also the danger brought by phishing attacks. These days, the use of security software on a PC or laptop is seen as essential. However, many smartphone users do not yet have the same sense of responsibility, even though their devices store personal data, private photos, Internet banking information or even company data. As modern smartphones are often expensive to buy, they are also an attractive target for thieves. Top-quality smartphones cost several hundred Euros. As it is not possible to physically prevent them from being stolen, they must be made less attractive to thieves. Consequently, many of today's security products contain not only malware protection, but also highly developed theft-protection functions, which make the device less attractive to thieves (e.g. by locking the device), and help the owner to find it again.
